MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read in conjunction with our consolidated and non-consolidated financial statements prepared in accordance with accounting principles generally accepted in Japan ("Japanese GAAP") for banks, including the notes to those financial statements, included elsewhere in this annual report. Except as otherwise indicated, the financial information in the following discussion is based on our consolidated financial statements.

The discussion below contains forward-looking statements regarding the intent, belief or current expectations of management with respect to our financial condition and future results of operations. In many cases, but not all, we use such words as "anticipate," "believe," "estimate," "expect," "intend," "plan," "probability," "risk" and similar expressions in relation to us or our management to identify forward-looking statements. These statements reflect our current views with respect to future events and are subject to risks, uncertainties and assumptions. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those we currently anticipate or target. We do not intend to update these forward-looking statements.

In this section, except where the context indicates otherwise, "we" or "our" means Shinsei Bank, Limited and its subsidiaries and affiliates accounted for by the equity-method, and "Shinsei" or the "Bank" refers to Shinsei Bank, Limited alone.

Financial and operational data that are stated in multiples of ¥0.1 billion have been truncated. All percentages have been rounded to the nearest 0.1%.

OVERVIEW

Shinsei Bank, Limited is a diversified Japanese financial institution providing a range of financial products and services to both institutional and individual customers. Our business is organized around three business groups, the Institutional Group, the Global Markets Group and the Individual Group:

- As of April 1, 2011, We have implemented organizational changes as part of its efforts to achieve an even more appropriate provision of financial products and services that meet institutional customer needs, by building a more strategic and systematic business promotion structure. To better serve our customers, the Institutional Group focuses primarily on corporate and public sector finance and advisory business, while the Global Markets Group concentrates on financial markets business and serving financial institution clients. The Institutional Group consists of business promoted by the Bank and Showa Leasing Co., Ltd. (Showa Leasing).
- The Individual Group consists of the retail banking business and the consumer finance business. We continue to improve the quality of our retail banking services to suit customer needs through strengthening our housing loan business and expanding our branch network including Consulting Spots to efficiently develop asset management operations. In the consumer finance business, Shinsei launched an unsecured personal loan service from October 1, 2011, in addition to existing installment sales credit, credit card and settlement businesses through APLUS FINANCIAL Co., Ltd. (APLUS FINANCIAL), and an unsecured personal loan service through Shinsei Financial Co., Ltd. (Shinsei Financial) and SHINKI Co., Ltd (SHINKI).

FINANCIAL SUMMARY FOR FISCAL YEAR ENDED MARCH 31, 2013

We recognized consolidated net income of ¥51.0 billion and consolidated cash basis net income of ¥60.4 billion for the fiscal

year ended March 31, 2013, a significant increase as compared to ¥6.4 billion and ¥16.0 billion for the previous fiscal year, respectively. The fiscal year ended March 31, 2013 was the last year of the Bank's First Medium-Term Management Plan. In line with the Medium-Term Management Plan, potential losses including non core assets were significantly reduced, and continuous efforts were made to expand the customer base. As a result, the impact of non recurring factors was restricted, and the Bank's earning capacity became steady and firm, due to which the Bank's performance stabilized during the fiscal year ended March 31, 2013, and the net income target of ¥51.0 billion set in the Medium-Term Management Plan was achieved.

Total revenue amounted to ¥199.0 billion for the fiscal year ended March 31, 2013, including net interest income of ¥111.6 billion, a decrease as compared to ¥116.9 billion for the previous fiscal year. This was due to a reduction in non core assets and the declining balance of consumer finance loans on account of the ongoing effects of the revised Money-Lending Business Control and Regulation Law. However, the loan balance has increased during the fiscal year ended March 31, 2013, and quarterly net interest income has been trending stably. Non interest income was ¥87.3 billion for the fiscal year ended March 31, 2013, an increase as compared to ¥86.0 billion for the previous fiscal year. Regarding general and administrative expenses, we continued promoting operational efficiency. However, as we continued to expand our business base, the general and administrative expenses, excluding amortization of goodwill and intangible assets acquired in business combinations, were ¥130.9 billion for the fiscal year ended March 31, 2013, a slight increase as compared to ¥130.3 billion for the previous fiscal year. Net credit costs amounted to ¥5.5 billion. The institutional loan balance increased due to efforts to make new loan disbursements and additional provisions were recorded for real estate finance. However, large reserves for credit losses were not recorded as in

OVERVIEW (continued)

previous years, as a result of a reduction in non core assets aimed at limiting potential risks. In addition, collections on written-off claims were recorded. As a result, net credit costs improved as compared to ¥12.2 billion for the previous fiscal year.

In the Institutional Group, the rebuilding of the customer base and stabilization of earnings continues, as ordinary business profit after net credit costs of ¥26.3 billion was recorded for the fiscal year ended March 31, 2013, an increase as compared to ¥19.4 billion for the previous fiscal year, and performance remained stable. In the Global Markets Group, ordinary business profit after net credit costs of ¥12.7 billion was recorded for the fiscal year ended March 31, 2013, an increase as compared to ¥4.2 billion for the previous fiscal year. Revenue accumulation was steady, due to efforts made towards expansion of the customer base, and development and provision of products tailored to the needs of our customers. In addition, collections on written-off claims were recorded. In the Individual Group, revenue decreased as compared to the previous fiscal year due to the decrease in loan balance in the consumer finance business. However, as the pace of the decline in loan balance decreased, ordinary business profit after net credit costs of ¥26.9 billion was recorded for the fiscal year ended March 31, 2013.

Balance of loans and bills discounted increased from ¥4,136.8 billion as of March 31, 2012, to ¥4,292.4 billion as of March 31, 2013. This was mainly due to an increase in loans to institutional customers and housing loans. The pace of the decrease in the consumer finance loan balance slowed, and although marginal, the balance increased during the fourth quarter of the fiscal year ended March 31, 2013.

Net interest margin of 2.02% was recorded for the fiscal year ended March 31, 2013, a slight decrease as compared to 2.04% for the previous fiscal year. This was mainly due to the decrease in the balance of consumer finance loans bearing relatively high interest rates resulting in a decrease in the yield on interest-earning assets. However, time deposits bearing high interest rates sold in previous years reached maturity, and expenses on interest-bearing liabilities of deposits and negotiable certificates of deposit also decreased, which mitigated the decrease in the net interest margin.

Tier I capital and total capital increased due to the accumulation of consolidated net income and amortization of goodwill and intangible assets acquired in business combinations during the fiscal year ended March 31, 2013, which resulted in improvement of the total capital adequacy ratio and Tier I capital ratio on a consolidated basis, to 12.2% and 10.4%, respectively, as of March 31, 2013 compared to 10.3% and 8.8% as of March 31, 2012.

The ratio of non performing loans to total claims was 5.3%, a decrease compared to 6.7% as of March 31, 2012. The balance of non performing loans under the Financial Revitalization Law (non-consolidated) totaled ¥242.6 billion as of March 31, 2013, a

decrease of ¥53.3 billion during the fiscal year ended March 31, 2013, mainly due to sales and collections of non performing loans etc.

SIGNIFICANT EVENTS**TAKE OVER OF OWNERSHIP OF A MAJORITY OF LLOYDS RETAIL BANKING SERVICES IN JAPAN**

On June 12, 2012, Shinsei reached an agreement with Lloyds TSB Bank plc ("Lloyds TSB") in which Lloyds TSB transferred ownership of its overseas remittance business, a significant part of Lloyds Banking Group's retail banking services in Japan, to Shinsei, which was subject to the approval of the Financial Services Agency of Japan (FSA). The agreement follows Lloyds Banking Group's decision to run down its retail banking services in Japan. Following the business transfer, Shinsei launched Go Remit Overseas Remittance Service as a new overseas remittance service for individual and business customers from March 4, 2013, further enhancing its remittance service offering.

ISSUANCE OF UNSECURED CALLABLE SUBORDINATED BONDS

On October 26, 2012, Shinsei issued unsecured callable subordinated bonds of ¥6.4 billion through a public offering in Japan, and on June 7, 2013, issued the unsecured callable subordinated bonds of ¥10.0 billion to retail investors in Japan.

Note: (1) Net income excludes Amortization of goodwill and intangible assets acquired in business combinations, net of tax benefit. Average equity excludes goodwill and intangible assets acquired in business combinations, net of associated deferred tax liability.

TOTAL REVENUE

We reported total revenue of ¥199.0 billion for the fiscal year ended March 31, 2013, which represents a slight decrease as compared to ¥202.9 billion for the previous fiscal year. While net interest income decreased due to the reduction in non core assets and the lower balance of consumer finance loans, non interest income increased as compared to the previous fiscal year.

NET INTEREST INCOME

A net interest income of ¥111.6 billion was recorded for the fiscal year ended March 31, 2013, a decrease of ¥5.2 billion from ¥116.9 billion recorded for the previous fiscal year. This was mainly due to compression of non core assets, and the lower balance of consumer finance loans. However, the rate of decline in consumer finance loans has slowed, and although marginal, the balance increased during the fourth quarter of the fiscal year ended March 31, 2013. In addition, a steady accumulation was recorded in loans for institutional customers and housing loans, resulting in an increase in the loan balance as of March 31, 2013. As a result, quarterly net interest income has been trending stably in the fiscal year ended March 31, 2013, although a decrease in the balance of consumer finance loans with higher interest rates had a considerable impact.

RESULTS OF OPERATIONS (CONSOLIDATED) (continued)**NET REVENUE ON INTEREST-EARNING ASSETS**

The table below shows the principal components of net revenue on interest-earning assets.

TABLE 1. INTEREST-EARNING ASSETS AND INTEREST-BEARING LIABILITIES (CONSOLIDATED)

Total interest expenses	—	36.1	—	—	42.8	—
Net interest income	—	¥ 111.6	—	—	¥ 116.9	—

Notes: (1) Other interest-earning assets and other interest-bearing liabilities include interest swaps and funding swaps.

(2) Represents a simple average of the balance as of the beginning and the end of the fiscal years presented.

(3) n.m. is not meaningful.

Net revenue on interest-earning assets includes net interest income as well as revenue earned on lease receivables and leased investment assets and installment receivables. We consider income on lease transactions and installment receivables to be a component of interest income, while Japanese GAAP does not include income on lease transactions and installment receivables in net interest income. In our consolidated statements of income, income on lease transactions and installment receivables is reported in net other business income under

Japanese GAAP.

The net interest margin decreased slightly to 2.02% for the fiscal year ended March 31, 2013, compared to 2.04% for the previous fiscal year.

This reflects the decrease in the yield on interest-earning assets caused by the lower balance of high-yield consumer finance loans. However, the decrease in the rate on interest-bearing liabilities caused by a decrease in the rate on deposits including negotiable certificates of deposit, from 0.52% for the

RESULTS OF OPERATIONS (CONSOLIDATED) (continued)

previous fiscal year to 0.43% for the fiscal year ended March 31, 2013, caused by relatively high-yield time deposits reaching maturity, which mitigated the decrease in the net interest margin.

Net revenue on interest-earning assets for the fiscal year ended March 31, 2013 was ¥147.2 billion, decreasing from ¥153.5 billion for the previous fiscal year.

While the total expense on interest-bearing liabilities decreased by ¥6.7 billion from ¥42.8 billion for the previous fiscal year to ¥36.1 billion for the fiscal year ended March 31, 2013, this was offset by a ¥13.0 billion decrease in total revenue on interest-earning assets. The decrease in total revenue on interest-earning assets was due to the lower yield on loans and bills discounted, and a decrease in the balance of securities.

NET TRADING INCOME

The table below shows the principal components of net trading income.

TABLE 2. NET TRADING INCOME (CONSOLIDATED)

Fiscal years ended March 31	Billions of yen		
	2013	2012	% Change
Income from trading securities	¥ 4.0	¥ 0.2	1,861.9
Income from securities held to hedge trading transactions	(2.5)	(3.0)	16.4
Income from trading-related financial derivatives	18.6	16.5	13.1
Other, net	(0.0)	(0.0)	(349.1)
Net trading income	¥ 20.0	¥13.6	46.9

Net trading income includes revenues from derivatives with customer-driven transactions and those from proprietary trading. Net trading income of ¥20.0 billion was recorded for the

NET FEES AND COMMISSIONS

Net fees and commissions were mainly from non recourse finance on domestic real estate, servicing fees in specialty finance and principal transactions, guarantee and other businesses operated by consumer finance subsidiaries, and sales of mutual funds and variable annuities. Net fees and commissions of ¥19.1 billion were recorded for the fiscal year ended March 31, 2013, as compared to ¥25.1 billion for the previous fiscal year, mainly due to the decrease in servicing fee income of subsidiaries, while fees increased from mutual funds and structured bonds in retail banking.

fiscal year ended March 31, 2013, an increase of ¥6.3 billion as compared to ¥13.6 billion for the previous fiscal year.

NET OTHER BUSINESS INCOME

The table below shows the principal components of net other business income.

TABLE 3. NET OTHER BUSINESS INCOME (LOSS) (CONSOLIDATED)

Income on lease transactions and installment receivables, net	35.6	36.6	(3.0)
Net other business income	¥ 48.1	¥ 47.2	1.9

RESULTS OF OPERATIONS (CONSOLIDATED) (continued)

Net other business income of ¥48.1 billion was recorded for the fiscal year ended March 31, 2013, an increase of ¥0.9 billion as compared to ¥47.2 billion for the previous fiscal year. Income on installment receivables of ¥25.2 billion was recorded, an increase as compared to ¥23.7 billion for the previous fiscal year, combining the amount at APLUS FINANCIAL which steadily increased, and the results at Showa Leasing. Income from monetary trust management at the principal transactions business, which focuses on credit trading, was recorded at ¥8.2 billion, at approximately the same level as the ¥8.1 billion recorded in the previous fiscal year. In ALM operations, net income from sales of Japanese national government bonds was recorded at ¥4.9 billion for the fiscal year ended March 31, 2013, an increase as

compared to ¥1.8 billion for the previous fiscal year. On the other hand, income from leased assets was recorded at ¥10.3 billion, a decrease as compared to ¥12.9 billion.

In addition, the previous fiscal year included gains of ¥6.3 billion, net of withholding tax, on sales of foreign equities that had been classified as non core assets, ¥5.2 billion of impairment of major listed securities, ¥3.3 billion of impairment of bonds related to domestic real estate non recourse finance, and ¥1.5 billion of impairment of private equity investments. However, during the fiscal year ended March 31, 2013, no major gains on sales or impairments of securities were recorded; impairment of bonds related to domestic real estate non recourse finance of ¥2.5 billion, and impairment of private equity investments of ¥1.0 billion.

TOTAL REVENUE

Due to the factors described above, total revenue in the fiscal year ended March 31, 2013 was ¥199.0 billion, as compared with ¥202.9 billion for the previous fiscal year.

GENERAL AND ADMINISTRATIVE EXPENSES

The table below sets forth the principal components of general and administrative expenses.

TABLE 4. GENERAL AND ADMINISTRATIVE EXPENSES (CONSOLIDATED)

Fiscal years ended March 31	Billions of yen		
	2013	2012	% Change
Personnel expenses	¥ 53.9	¥ 53.4	0.9
Premises expenses	19.4	20.4	(4.8)
Technology and data processing expenses	17.6	17.2	2.0
Advertising expenses	9.2	9.1	0.6
Consumption and property taxes	6.5	6.3	2.1
Deposit insurance premium	3.5	4.6	(23.7)
Other general and administrative expenses	20.6	18.9	8.9
General and administrative expenses	130.9	130.3	0.5
Amortization of goodwill and intangible assets acquired in business combinations	10.8	11.9	(9.6)
Total general and administrative expenses	¥ 141.7	¥ 142.3	(0.4)

General and administrative expenses, excluding amortization of goodwill and intangible assets acquired in business combinations, were ¥130.9 billion for the fiscal year ended March 31, 2013, increasing slightly from ¥130.3 billion for the previous fiscal year. With the aim of expanding our customer base and stabilizing our earnings, we prioritized the allocation of management resources to relevant business areas while promoting business rationalization and streamlining by practicing strict expense management for each expense category.

Personnel expenses of ¥53.9 billion for the fiscal year ended March 31, 2013 increased slightly from ¥53.4 billion for the previous fiscal year. Although we have allocated additional personnel to relevant business areas with the aim of expanding our customer base and stabilizing our earnings, we ensured there was

not any excessive increase in personnel expenses by implementing personnel expense streamlining across our businesses.

Non personnel expenses were ¥77.0 billion for the fiscal year ended March 31, 2013, almost at the same level of ¥76.9 billion for the previous fiscal year, as we have worked to rationalize expenses across all of our business lines through strict expense control discipline, while also enhancing our business infrastructure. Premises expenses of ¥19.4 billion for the fiscal year ended March 31, 2013 decreased from ¥20.4 billion for the previous fiscal year, reflecting our continuous efforts at expense streamlining. Technology and data processing expenses of ¥17.6 billion for the fiscal year ended March 31, 2013 increased from ¥17.2 billion for the previous fiscal year, mainly due to additional depreciation from capital expenditures related to system development. Advertising

RESULTS OF OPERATIONS (CONSOLIDATED) (continued)

expenses of ¥9.2 billion for the fiscal year ended March 31, 2013 were almost at the same level as compared to ¥9.1 billion for the previous fiscal year, as we have promoted advertising activities with the aim to expand our customer base in concurrence with lowering of respective unit costs. Consumption and property taxes of ¥6.5 billion for the fiscal year ended March 31, 2013 increased from ¥6.3 billion for the previous fiscal year due to the enhancement of business infrastructure including capital expenditures related to system development. Deposit insurance premium expenses of ¥3.5 billion for the fiscal year ended March 31, 2013 decreased from ¥4.6 billion for the previous fiscal year, mainly due to the reduction of the insurance premium rate. Other general and administrative expenses of ¥20.6 billion for the fiscal year ended March 31, 2013 increased from ¥18.9 billion for the previous fiscal year, including an increase in temporary staff expenses as we began operating a new IT system in parallel with the old system.

AMORTIZATION OF GOODWILL AND INTANGIBLE ASSETS ACQUIRED IN BUSINESS COMBINATIONS

Amortization of goodwill and intangible assets acquired in business combinations associated with the acquisition of consumer and commercial finance companies totaled ¥10.8 billion for the fiscal year ended March 31, 2013 compared to ¥11.9 billion for the previous fiscal year. The lower amount is attributable to factors including the sum-of-the-years' digits method for amortization of goodwill and intangible assets acquired in business combinations related to Shinsei Financial. Amortization of goodwill and intangible assets acquired in business combinations of APLUS FINANCIAL was ¥0.8 billion for the fiscal year ended March 31, 2013 related to the amortization of goodwill for Zen-Nichi Shinpan, a subsidiary of APLUS FINANCIAL. Full impairment of goodwill and intangible assets for APLUS FINANCIAL was taken as of March 31, 2010.

TABLE 5. AMORTIZATION OF GOODWILL AND INTANGIBLE ASSETS ACQUIRED IN BUSINESS COMBINATIONS (CONSOLIDATED)

Fiscal years ended March 31	Billions of yen		
	2013	2012	% Change
Shinsei Financial	¥ 7.4	¥ 8.5	(13.1)
SHINKI	(0.3)	(0.3)	0.0
APLUS FINANCIAL	0.8	0.8	(0.0)
Showa Leasing	2.8	2.9	(1.1)
Others	0.0	(0.0)	2,053.1
Amortization of goodwill and intangible assets acquired in business combinations	¥ 10.8	¥ 11.9	(9.6)

NET CREDIT COSTS

The following table sets forth the principal components of net credit costs.

TABLE 6. NET CREDIT COSTS (CONSOLIDATED)

Fiscal years ended March 31	Billions of yen		
	2013	2012	% Change
Losses on write-off or sales of loans	¥ 8.4	¥ 5.7	46.6
Net provision of reserve for loan losses:			
Net provision (reversal) of general reserve for loan losses	(5.3)	(5.9)	10.0
Net provision of specific reserve for loan losses	19.1	42.2	(54.7)
Net provision (reversal) of reserve for loan losses to restructuring countries	—	(0.0)	100.0
Subtotal	13.7	36.3	(62.0)
Net provision (reversal) of specific reserve for other credit losses	(0.0)	(17.2)	(99.9)
Other credit costs (recoveries) relating to leasing business	(0.4)	(1.6)	70.7
Recoveries of written-off claims	(16.2)	(10.8)	(49.9)
Net credit costs	¥ 5.5	¥ 12.2	(55.0)

RESULTS OF OPERATIONS (CONSOLIDATED) (continued)

The principal components of net credit costs are provisions or reversals of reserve for loan losses. In accordance with Japanese regulatory requirements, Shinsei maintains general and specific reserves for loan losses, a reserve for loans to restructuring countries, as well as a specific reserve for other credit losses. Certain of our subsidiaries, particularly Shinsei Financial, APLUS FINANCIAL, SHINKI and Showa Leasing, also maintain general and specific reserves for loan losses.

Net credit costs for the fiscal year ended March 31, 2013 of ¥5.5 billion were recorded, showing a significant improvement as compared to ¥12.2 billion for the previous fiscal year. We have been able to achieve this significant improvement because although the balance of loans and bills discounted increased due to accumulation of institutional business loans and housing loans, large reserves for credit losses were not

recorded as in previous years as a result of reduction of non core assets aimed at limiting potential risks, and strict credit management. There was also an improvement in the credit-worthiness of some institutional accounts.

For the fiscal year ended March 31, 2013, recoveries of written-off claims were ¥16.2 billion, compared to ¥10.8 billion of recoveries of written-off claims for the previous fiscal year. This shows that the performance of ¥21.7 billion recorded for the fiscal year ended March 31, 2013 has improved as compared to ¥23.1 billion recorded for the previous fiscal year, even when excluding recoveries of written-off claims from net credit costs.

The recoveries of written-off claims for the fiscal year ended March 31, 2013 of ¥16.2 billion included ¥8.5 billion at Shinsei Bank (non-consolidated basis), ¥6.5 billion at Shinsei Financial, and ¥1.0 billion at SHINKI.

OTHER GAINS (LOSSES), NET

The table below sets forth the principal components of other gains (losses).

TABLE 7. OTHER GAINS (LOSSES), NET (CONSOLIDATED)

Fiscal years ended March 31	Billions of yen		
	2013	2012	% Change
Net gain (loss) on disposal of premises and equipment	¥ 0.1	¥ (0.5)	135.4
Pension-related costs	(0.0)	(0.3)	85.0
Gains on write-off of unclaimed debentures	0.8	1.2	47.3
Provision of reserve for losses on interest repayments	—	(32.8)	100.0
Impairment losses on long lived assets	(0.9)	(1.0)	16.1
Business restructuring cost	—	(0.0)	100.0
Gain on sale of subsidiary's stock	0.4	2.4	(81.8)
Other, net	1.6	(1.8)	138.6
Total	¥ 2.1	¥ (32.9)	106.6

Other gains of ¥2.1 billion were recorded for the fiscal year ended March 31, 2013, a significant improvement as compared to other losses of ¥32.9 billion for the previous fiscal year, which was mainly due to an absence of additional provisions of reserves for losses on interest repayments for the previous fiscal year, as provisions of reserves for losses on interest repayments of ¥32.8 billion were recorded.

INCOME BEFORE INCOME TAXES AND MINORITY INTERESTS

As a result of the foregoing, income before income taxes and minority interests totaled ¥53.8 billion for the fiscal year ended March 31, 2013, as compared to ¥15.3 billion for the previous fiscal year.

INCOME TAXES (BENEFIT)

Current and deferred income taxes reflected a net income of ¥0.7 billion compared to a net expense of ¥5.3 billion for the

previous fiscal year. For the fiscal year ended March 31, 2013, we recorded ¥0.5 billion of current income tax expense and ¥1.3 billion of deferred income tax income, which was impacted from tax reform as well. For the previous fiscal year, ¥2.9 billion of current income tax expense and ¥2.4 billion of deferred income tax expense were recorded.

MINORITY INTERESTS IN NET INCOME OF SUBSIDIARIES

Minority interests in net income of subsidiaries for the fiscal year ended March 31, 2013 were ¥3.5 billion. Minority interests in net income of subsidiaries largely reflect dividends accrued on perpetual preferred securities issued by the bank's subsidiaries, and minority interests in the net income of other consolidated subsidiaries for the fiscal year ended March 31, 2013. Minority interests in net income of subsidiaries for the fiscal year ended March 31, 2013 were the same as the ¥3.5 billion recorded for the previous fiscal year.

RESULTS OF OPERATIONS (CONSOLIDATED) (continued)

TABLE 8. MINORITY INTERESTS IN NET INCOME OF SUBSIDIARIES (CONSOLIDATED)

Fiscal years ended March 31	Billions of yen		
	2013	2012	% Change
Dividends on preferred securities (hybrid Tier I capital) issued by foreign SPCs	¥ 3.1	¥ 3.0	1.6
Others	0.4	0.4	(14.5)
Minority interests in net income of subsidiaries	¥ 3.5	¥ 3.5	(0.6)

NET INCOME

We recognized a consolidated net income of ¥51.0 billion for the fiscal year ended March 31, 2013, compared to ¥6.4 billion for the previous fiscal year.

Consolidated cash basis net income for the fiscal year ended March 31, 2013 was ¥60.4 billion, compared to ¥16.0 billion for the previous fiscal year. The cash basis net income is calculated by excluding amortization and impairment of goodwill and intangible assets acquired in business combinations, net of tax benefit, from net income under Japanese GAAP.

RECONCILIATION FROM REPORTED-BASIS RESULTS TO OPERATING-BASIS RESULTS

In addition to analyzing our results of operations in the format used for our financial statements, which we refer to as the "reported-basis," our management also reviews our results on an "operating-basis" to assess each of our business lines and to measure our results against targeted goals. Operating-basis results are calculated by adjusting the reported-basis results principally for the amortization of goodwill and intangible assets acquired in business combinations, certain revenue items, amortization of net actuarial losses and lump-sum payments. In essence, the operating-basis results represent what we consider to be "core" business results and are in conformity with Japanese GAAP at the net income (loss) level. The following summary table provides a reconciliation between our results on a reported-basis and operating-basis.

TABLE 9. RECONCILIATION FROM REPORTED-BASIS RESULTS TO OPERATING-BASIS RESULTS (CONSOLIDATED)

Fiscal years ended March 31	Billions of yen					
	2013			2012		
	Reported-basis	Reclassifications	Operating-basis	Reported-basis	Reclassifications	Operating-basis
Revenue:

Other gains (losses), net ⁽¹⁾	2.1	(2.3)	(0.1)	(32.9)	(2.4)	(35.4)
Income before income taxes and minority interests	53.8	—	53.8	15.3	—	15.3
Income taxes and minority interests	2.7	—	2.7	8.9	—	8.9
Net income	¥ 51.0	¥ —	¥ 51.0	¥ 6.4	¥ —	¥ 6.4

Notes: (1) Reclassifications consist principally of adjustments relating to lump-sum compensation and amortization of net actuarial gains or losses from general and administrative expenses to other gains (losses), net.
(2) Amortization of goodwill and intangible assets acquired in business combinations is reclassified under ordinary business profit after net credit costs.

RESULTS OF OPERATIONS (CONSOLIDATED) (continued)**BUSINESS LINES RESULTS**

Management monitors the performance of these business lines on an operating-basis. The business line discussion below covers the operating-basis ordinary business profit (loss) after net credit costs (recoveries).

Note: (1) Results for Advisory business is included in the Institutional Business Sub-Group, formerly shown in Others, in line with the organizational change on April 27, 2012.

RESULTS OF OPERATIONS (CONSOLIDATED) (continued)

The Institutional Group business recorded net interest income of ¥29.8 billion for the fiscal year ended March 31, 2013, an increase from ¥27.2 billion for the previous fiscal year, as the progress made in rebuilding our customer base led to an increase in the loan balance. Non interest income was ¥27.0 billion for the fiscal year ended March 31, 2013, a decline from ¥35.0 billion for the previous fiscal year. However, the amount recorded for the previous fiscal year included gains of ¥6.3 billion, net of withholding tax, from sales of foreign equities categorized as non core assets.

Regarding sub-groups in the Institutional Group, the Institutional Business Sub-Group put effort into identifying new outlets for corporate lending and increasing the loan balance as well as strengthening relationships with existing customers, in order to rebuild our customer base. As a result, net interest income grew steadily to ¥10.1 billion for the fiscal year ended March 31, 2013 from ¥9.2 billion for the previous fiscal year. In addition, non interest income also increased to ¥4.7 billion for the fiscal year ended March 31, 2013 from ¥0.3 billion for the previous fiscal year which included ¥3.9 billion of impairment on listed shares.

The Structured Finance Sub-Group recorded total revenue of ¥20.4 billion for the fiscal year ended March 31, 2013, a decrease from ¥21.0 billion for the previous fiscal year. Reduction of non performing loans in real estate finance and new loan disbursements in specialty finance and other businesses led to higher quality asset replacement. As a result, revenue was almost at the same level as compared to the previous fiscal year.

The Principal Transactions Sub-Group recorded total revenue of ¥11.4 billion for the fiscal year ended March 31, 2013, an increase from ¥11.2 billion for the previous fiscal year. The performance continued to be stable mainly due to continued domestic credit trading operations efforts. In addition, ¥1.0 billion of impairment on private equity investment was recognized for the fiscal year ended March 31, 2013, compared to ¥1.5 billion for the previous fiscal year.

Total revenue at Others was a loss of ¥3.9 billion for the fiscal year ended March 31, 2013. Total revenue for the previous fiscal year included gains of ¥6.3 billion, net of withholding tax, from sales of foreign equities categorized as non core assets.

General and administrative expenses were ¥24.2 billion for the fiscal year ended March 31, 2013, marking a slight decrease

from ¥25.0 billion for the previous fiscal year. This small decrease was due to the scale-down and exit from non core businesses and efficiency improvements in each business, while the group focused on areas where the Bank can demonstrate its strengths to improve profitability.

Net credit costs were ¥6.3 billion for the fiscal year ended March 31, 2013, a decrease from ¥17.8 billion for the previous fiscal year. This significant improvement of net credit costs reflects the absence of large credit reserves recorded in previous years, as a result of continued divestiture of non core assets to mitigate potential risks, and also an improvement in the credit-worthiness of some accounts during the previous fiscal year in the Institutional Group, despite an increase in the loan balance due to an expansion of new financing and additional reserves for real estate finance.

As a result, the Institutional Group recorded an ordinary business profit after net credit costs of ¥26.3 billion for the fiscal year ended March 31, 2013, an increase from ¥19.4 billion for the previous fiscal year. In addition, we believe this performance to be relatively stable and steady, as there was limited impact of non recurring factors during the previous fiscal year, while net interest income increased in line with the increase in the loan balance.

Showa Leasing recorded ¥6.3 billion of ordinary business profit after net credit costs for the fiscal year ended March 31, 2013, a marginal increase as compared to ¥6.0 billion for the previous fiscal year. Total revenue recorded was ¥14.0 billion for the fiscal year ended March 31, 2013, an increase as compared to ¥12.4 billion for the previous fiscal year which included impairment recorded on equity holdings, however, due to net credit recoveries of ¥0 billion (¥85 million) for the fiscal year ended March 31, 2013, compared to recoveries of ¥1.3 billion for the previous fiscal year, and the gain in total revenue was mitigated by the drop in credit recoveries.

GLOBAL MARKETS GROUP

The Global Markets Group consists of: 1) Financial Institutions Sub-Group which provides financial products and services for financial institutions, 2) Markets Sub-Group which deals with foreign exchange, derivatives and other capital markets business, and 3) Others including asset management, wealth management, and Shinsei Securities' businesses.

Net credit costs (recoveries)	(7.5)	(2.6)	(181.6)
Ordinary business profit after net credit costs (recoveries)	¥ 12.7	¥ 4.2	200.8

Note: (1) Results for Treasury Sub-Group is included in Corporate/Other, formerly shown in the Global Markets Group, in line with the organizational change on July 1, 2012.

The Global Markets Group generated total revenue of ¥14.2 billion for the fiscal year ended March 31, 2013, an increase from ¥11.2 billion for the previous fiscal year. The total revenue improved because of continuous efforts to rebuild the customer base, as well as development and provision of financial products which meet customers' needs.

The Financial Institutions Sub-Group's total revenue was ¥4.5 billion for the fiscal year ended March 31, 2013, increasing from ¥3.3 billion for the previous fiscal year. The sub-group deepened cooperation with the Markets Sub-Group to reinforce its sales promotion efforts, and strived to provide various products and transactions in line with customers' needs. The strong performance reflects solid revenues from transactions with customers.

The Markets Sub-Group earned total revenue of ¥7.2 billion for the fiscal year ended March 31, 2013, increasing from ¥6.2

billion for the previous fiscal year. The volume of customer transactions for the previous fiscal year was low. However, the volume of customer transactions increased during the fiscal year ended March 31, 2013, and total revenue rose due to the sub-group's efforts to improve its business structure and enhance its capabilities to meet customers' needs.

Others earned total revenue of ¥2.4 billion for the fiscal year ended March 31, 2013, compared to ¥1.6 billion for the previous fiscal year.

The Global Markets Group recorded ¥9.0 billion of general and administrative expenses for the fiscal year ended March 31, 2013, a decrease from ¥9.7 billion for the previous fiscal year. Continuous cost rationalization was implemented across the group, while the allocation of resources to relevant business areas for rebuilding the customer base was prioritized. As a result, expenses decreased as compared to the previous fiscal year.

RESULTS OF OPERATIONS (CONSOLIDATED) (continued)

Net credit recoveries of ¥7.5 billion were recorded for the fiscal year ended March 31, 2013, compared to recoveries of ¥2.6 billion for the previous fiscal year. The Global Markets Group has continued to reduce non core assets, recording a reversal of reserve for these assets and recoveries of written-off claims during the previous fiscal year. The group proceeded to collect on written-off claims and recorded recoveries of written-off claims during the fiscal year ended March 31, 2013 as well, thereby recording net credit recoveries.

As a result, the Global Markets Group recorded ¥12.7 billion of ordinary business profit after net credit costs for the fiscal year ended March 31, 2013, a significant increase from ¥4.2

billion for the previous fiscal year. This significant increase at the Global Markets Group is mainly due to the earnings derived from transactions with customers and continuous efforts to rebuild the customer base, in addition to recoveries of written-off claims being recorded.

INDIVIDUAL GROUP

The Individual Group consists of: 1) Retail Banking, 2) Shinsei Financial and Shinsei Bank Card Loan Lake ("Shinsei Bank Lake"), 3) SHINKI, 4) APLUS FINANCIAL, and 5) Others including Shinsei Property Finance Co., Ltd. and Consumer Finance Sub-Group.

TABLE 13. INDIVIDUAL GROUP TOTAL REVENUE BY PRODUCT/ENTITY (CONSOLIDATED)

Fiscal years ended March 31	Billions of yen		
	2013	2012	% Change
Retail Banking:	¥ 33.1	¥ 36.0	(8.3)
Deposits and Debentures Net Interest Income	17.6	21.3	(17.2)
Deposits and Debentures Non Interest Income ⁽¹⁾	3.6	4.1	(12.6)
Asset management	4.3	4.3	1.5
Loans	7.4	6.3	17.8
Shinsei Financial and Shinsei Bank Lake ⁽²⁾	37.6	43.9	(14.4)
SHINKI	6.3	7.8	(19.1)
APLUS FINANCIAL	47.8	48.5	(1.5)
Others ⁽³⁾	1.6	1.7	(8.4)
Total revenue	¥ 126.4	¥ 138.1	(8.4)

Notes: (1) Includes revenue from structured deposits of ¥3.1 billion and ¥5.2 billion for the fiscal year ended March 31, 2013 and 2012, respectively.

(2) Results for Shinsei Financial and Shinsei Bank Card Loan Lake (started on October 1, 2011) are combined on a management accounting basis from October 1, 2011.

(3) Includes Shinsei Property Finance and unallocated Consumer Finance Sub-Group financials.

The Individual Group's ordinary business profit after net credit costs decreased to ¥26.9 billion for the fiscal year ended March 31, 2013 compared to ¥47.2 billion for the previous fiscal year. Ordinary business profit after net credit costs of Shinsei Financial and Shinsei Bank Lake, SHINKI and APLUS FINANCIAL for the fiscal year ended March 31, 2013 were above their respective performance for the previous fiscal year.

RETAIL BANKING

Total revenue of Retail Banking decreased to ¥33.1 billion for the fiscal year ended March 31, 2013, from ¥36.0 billion for the previous fiscal year. Net interest income increased in tandem with the increase in the net loan balance due to a focus on new housing loan disbursements. However, net interest income from deposits including liquid deposits decreased due to prevailing low interest rates. As a result, net interest income decreased to ¥26.0 billion for the fiscal year ended March 31, 2013, from ¥29.1 billion for the previous fiscal year. Non interest income was ¥7.0 billion for the fiscal year ended March 31, 2013, as compared to ¥6.9 billion for the previous fiscal year. Non interest income was at the same level of the previous year, due to the efforts undertaken to accrue

fee income from other investment products by developing and offering products which meet customer's needs, such as products with a limited risk range, despite the sale of structured yen deposits being temporarily discontinued.

Due to the implementation of various rationalization and efficiency measures, such as reconsidering the unit price for advertising or the impact of a substantial reduction of deposit insurance premium rates, general and administrative expenses decreased to ¥30.2 billion for the fiscal year ended March 31, 2013 compared to ¥31.3 billion for the previous fiscal year.

Net credit costs totaled ¥16 million for the fiscal year ended March 31, 2013, compared to ¥1.2 billion for the previous fiscal year. As a result, ordinary business profit after net credit costs was ¥2.8 billion for the fiscal year ended March 31, 2013, compared to ordinary business profit after net credit costs of ¥3.5 billion for the previous fiscal year.

SHINSEI FINANCIAL AND SHINSEI BANK CARD LOAN LAKE

Ordinary business profit after net credit costs of Shinsei Financial and Shinsei Bank Card Loan Lake was ¥12.4 billion for the fiscal year ended March 31, 2013, compared to ¥24.7 billion

RESULTS OF OPERATIONS (CONSOLIDATED) (continued)

for the previous fiscal year.

Total revenue was ¥37.6 billion for the fiscal year ended March 31, 2013, compared to ¥43.9 billion for the previous fiscal year, as the loan balance continued to decrease due to the ongoing effects of the revised Money-Lending Business Control and Regulation Law. However, the declining pace of the combined loan balances at Shinsei Financial and Shinsei Bank Card Loan Lake has slowed, due to the commencement of the Bank-based consumer finance business from October 2011, and although marginal, there has been an increase in the fourth quarter of the fiscal year ended March 31, 2013. Specifically, the loan balance decreased by ¥64.8 billion in the previous fiscal year, however the decrease was ¥16.6 billion for the first nine months ended December 31, 2012, and an increase of ¥2.3 billion was recorded for the fourth quarter of the fiscal year ended March 31, 2013 (after including the loan balance of the Bank's consumer finance business).

Consumer finance is expected to incur a certain amount of net credit costs due to the inherent nature of the business. However, we are implementing strict credit management and have established a strong structure for loan collections, while credit quality continues to improve due to the income-linked borrowing limitation regulation implemented in 2010. Combined with the decline in loan balance, this resulted in net credit recoveries of ¥0.1 billion for the fiscal year ended March 31, 2013. Also, the fact that net credit recoveries of ¥8.0 billion were recorded for the previous fiscal year reflects the impact of a significant decrease in the loan balance of the previous fiscal year.

SHINKI

Ordinary business profit after net credit costs of SHINKI was ¥2.2 billion for the fiscal year ended March 31, 2013, compared to ¥4.7 billion for the previous fiscal year. Similar to Shinsei Financial, SHINKI's total revenue also decreased due to the revised Money-Lending Business Control and Regulation Law. However, the rate of decline has slowed.

APLUS FINANCIAL

Ordinary business profit after net credit costs of APLUS FINANCIAL amounted to ¥8.1 billion for the fiscal year ended March 31, 2013, compared to ¥13.0 billion for the previous fiscal year. Net interest income decreased to ¥9.2 billion for the fiscal year ended March 31, 2013, compared to ¥12.5 billion for the previous fiscal year due to the decrease in loan balance following implementation of the revised Money-Lending Business Control and Regulation Law. However, non interest income increased to ¥38.5 billion for the fiscal year ended March 31, 2013, compared to ¥35.9 billion for the previous fiscal year due to the steady increase in volume in the installment sales credit and settlement business. General and administrative expenses

increased to ¥33.2 billion for the fiscal year ended March 31, 2013, from ¥30.2 billion for the previous fiscal year, due to an increase in depreciation for technology, despite continued rationalization and efficient business processes. Net credit costs increased to ¥6.4 billion for the fiscal year ended March 31, 2013, from ¥5.2 billion for the previous fiscal year.

INTEREST REPAYMENT

With regard to reserves for losses on interest repayments, an additional provision of reserve of ¥32.8 billion was made for the previous fiscal year, no additional reserves were made in the fiscal year ended March 31, 2013. The usage of reserves for losses on interest repayment for the fiscal year ended March 31, 2013 decreased, compared to the previous fiscal year at Shinsei Financial, SHINKI and APLUS FINANCIAL.

Shinsei Financial's usage of reserves for losses on interest repayments and others amounted to ¥4.8 billion for the fiscal year ended March 31, 2013, from ¥7.7 billion for the previous fiscal year. Additional reserves were not made resulting in a total balance of ¥21.3 billion in reserves for losses on interest repayment as of March 31, 2013, compared to ¥26.2 billion as of March 31, 2012. Losses on interest repayment at Shinsei Financial have been recorded for the portion of the portfolio not covered by the GE Japan Holdings Co., Ltd. ("GE") indemnity included in the purchase agreement of Shinsei Financial from GE.

SHINKI's usage of reserves for losses on interest repayments amounted to ¥6.2 billion for the fiscal year ended March 31, 2013, from ¥11.0 billion for the previous fiscal year. Additional reserves were not made resulting in a total balance of ¥7.8 billion in reserves for losses on interest repayment as of March 31, 2013, compared to ¥14.0 billion as of March 31, 2012.

APLUS FINANCIAL and its consolidated subsidiaries' usage of reserves for losses on interest repayments amounted to ¥4.8 billion for the fiscal year ended March 31, 2013, from ¥6.4 billion for the previous fiscal year. Additional reserves were not made resulting in a total balance of ¥5.7 billion in reserves for losses on interest repayment as of March 31, 2013, compared to ¥10.6 billion as of March 31, 2012.

Notes: (1) Results for Treasury Sub-Group is included in Corporate/Other, formerly shown in the Global Markets Group, in line with the organizational change on July 1, 2012.

(2) Includes company-wide accounts, allocation variance of indirect expense and elimination amount of inter-segment transactions.

CORPORATE/OTHER

Corporate/Other includes company-wide accounts, allocation variance of indirect expense and elimination amount of inter-segment transactions. For the fiscal year ended March 31, 2013, ordinary business loss after net credit costs was ¥1.1 billion.

The Treasury Sub-Group, which governs the ALM for the Bank overall, was transferred to the Finance Group as part of organizational changes implemented on July 1, 2012, and its results are

now included in the Corporate/Other segment. Treasury Sub-Group's total revenue was a profit of ¥4.4 billion for the fiscal year ended March 31, 2013, compared to a loss of ¥6.1 billion for the previous fiscal year. The sub-group holds liquidity reserves and Japanese national government bonds for ALM purposes and during the fiscal year ended March 31, 2013 the sub-group also traded Japanese national government bonds to facilitate liquidity management and earned sales gains at the same time. Net sales gains increased from ¥1.8 billion for the previous fiscal year to ¥4.9 billion for the fiscal year ended March 31, 2013.

RESULTS OF OPERATIONS (NON-CONSOLIDATED)

OVERVIEW

We disclose non-consolidated financial information in addition to our consolidated financial statements. As a recipient of public funds, we are required by the FSA to update and report on non-consolidated performance in relation to targets set forth in our Revitalization Plan on a quarterly basis and to publicly disclose that information semi-annually.

Shinsei recorded a net income for the fiscal year ended March

31, 2013 of ¥24.6 billion on a non-consolidated basis. Differences between the net incomes on a non-consolidated basis and consolidated basis are mainly because of the gains and losses from our consolidated subsidiaries, including Showa Leasing, Shinsei Financial, APLUS FINANCIAL and SHINKI, the gains and losses on our investment in our equity-method affiliate, Jih Sun Financial Holding Co., Ltd., and the dividends received from our major consolidated subsidiaries.

TABLE 16. COMPARISON OF TARGETS AND RESULTS FOR KEY MEASURES IN THE REVITALIZATION PLAN (NON-CONSOLIDATED)

Fiscal years ended March 31	Billions of yen (except percentages)			
	2013		2012	
	Target	Actual	Target	Actual
Net income	¥ 22.0	¥ 24.6	¥ 15.0	¥ 13.8
Total expenses (without taxes) ⁽¹⁾	66.3	64.1	64.0	59.1
Return on equity based on net business profit ⁽²⁾	4.7%	3.9%	5.2%	5.1%

Notes: (1) Equals Shinsei's total general and administrative expenses excluding business taxes such as consumption tax.

(2) Equals net business profit (*jisshitsu gyomu jun-eki*), as such term is defined under "Supplemental Measures" below, divided by average total equity excluding stock acquisition rights.

SUPPLEMENTAL MEASURES

In addition to the reporting items set forth in our non-consolidated financial statements, the Banking Act of Japan requires us to disclose gross business profit (*gyomu sorieki*) on a non-consolidated basis. Furthermore, in the Japanese banking industry, net business profit (*jisshitsu gyomu jun-eki*) has traditionally been used as a measure of the profitability of core banking operations. We review these non Japanese GAAP performance measures in monitoring the results of our operations.

Gross business profit (*gyomu sorieki*) is the sum of:

- net interest income, which excludes interest expense related to investment in monetary assets held in trust;
- net fees and commissions, which includes net gain (loss) on monetary assets held in trust (in keeping with the definition of gross business profit in our revitalization plan);

- net trading income; and
- net other business income, which excludes net gain (loss) on monetary assets held in trust and on equity securities.

Net business profit (*jisshitsu gyomu jun-eki*) is gross business profit (*gyomu sorieki*) minus non-consolidated expenses, which corresponds to general and administrative expenses adjusted for certain items.

While these non Japanese GAAP business profit measures should not be viewed as a substitute for net income, management believes that these measures provide a meaningful way of comparing a number of the important components of Shinsei's revenues and profitability from year to year. The following table sets forth these supplemental financial data and corresponding reconciliations to net income under Japanese GAAP for the fiscal years ended March 31, 2013 and 2012.

RESULTS OF OPERATIONS (NON-CONSOLIDATED) (continued)

TABLE 17. SUPPLEMENTAL MEASURES (NON-CONSOLIDATED)

Fiscal years ended March 31	Billions of yen	
	2013	2012
Gross business profit (gyomu sorieki):		
Net interest income	¥ 62.0	¥ 70.3
Net fees and commissions ⁽¹⁾	10.3	18.0
Net trading income	14.5	13.4
Net other business income (loss)	6.3	(6.9)
Total gross business profit	93.3	94.8
Expenses ⁽²⁾	67.3	62.6
Net business profit (jishitsu gyomu jun-eki)	25.9	32.1
Net credit costs	(1.2)	10.9
Other, net ⁽³⁾	(1.5)	(3.0)
Net operating income (keijo rieki)	25.7	18.1
Extraordinary income (loss)	(2.3)	(1.8)
Income before income taxes	23.4	16.2
Current income taxes (benefit)	(0.7)	0.1
Deferred income taxes	(0.4)	2.1
Net income	¥ 24.6	¥ 13.8

Notes: (1) Includes net gain (loss) on monetary assets held in trust of ¥5.1 billion in the fiscal year ended March 31, 2013 and ¥12.2 billion in the previous fiscal year.

(2) General and administrative expenses with certain adjustment.

(3) Excludes net gain (loss) on monetary assets held in trust.

CRITICAL ACCOUNTING POLICIES

GENERAL

Our financial statements are prepared in accordance with Japanese GAAP. The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent liabilities at the date of the financial statements, as well as the reported amounts of revenues and expenses during the reporting period. In addition, certain accounting principles require significant judgment by management in applying complex accounting principles to individual transactions to determine the most appropriate accounting treatment. We have established procedures and processes to facilitate making the estimates and assumptions necessary to value assets and liabilities, record transactions and prepare the financial statements. On an ongoing basis, management evaluates its estimates and judgments, including those related to the valuation of assets and liabilities. Although actual results may differ from these estimates under different assumptions and conditions and future changes in the key assumptions could change future valuations and results, we have used the best information available at the time to make our estimates. Significant accounting policies are described in Note 2 to the Consolidated Financial Statements included in this annual report.

Management believes the following are our critical accounting policies. These policies were considered “critical” because:

- the estimates involved in these policies require us to make assumptions about matters that are uncertain at the time the estimates are made; and
- different estimates that we reasonably could have used in the current period, or changes in the accounting estimate

that are reasonably likely to occur from period to period, could have a material impact on the presentation of our financial condition, or changes in our financial condition or results of operations.

RESERVE FOR CREDIT LOSSES

The reserve for loan losses, a separate component of the reserve for credit losses, is management’s estimate of the credit losses to be incurred in the lending portfolio and is discussed in further detail in “—Financial Condition—Asset Quality and Disposal of Non Performing Loans of Shinsei.” We establish a specific reserve, a general reserve and a reserve for loans to restructuring countries based on our self-assessment guidelines to absorb estimated credit losses in the lending portfolio.

A specific reserve is provided for claims against obligors in the legally bankrupt, virtually bankrupt and possibly bankrupt categories. For claims against obligors in the legally and virtually bankrupt categories, the unsecured, unguaranteed portion of the claim is written off or otherwise fully reserved because such portion is deemed unlikely to be collected. For claims against obligors in the possibly bankrupt category, a specific reserve is principally determined by estimating discounted future cash flows, other than in cases where it is difficult to reasonably estimate future cash flows.

A general reserve is provided for claims against normal obligors, as well as claims against need caution obligors (including substandard obligors). Shinsei applies the discounted cash flow method in calculating the amount of a general reserve for most of its claims against substandard obligors. The amount of the reserve for claims against normal obligors and claims against

CRITICAL ACCOUNTING POLICIES (continued)

need caution obligors (other than substandard obligors of Shinsei which are subject to the discounted cash flow method) is based on the total amount of, as well as the expected loss ratios for, claims against each category of obligor. Using the expected loss ratios, which are based on the historical loss ratios calculated in accordance with the pre-defined method in internal reserves guidelines, Shinsei reserves for the estimated amount of losses for the next three years for claims against substandard obligors, for the remaining term of the claims with respect to claims against normal obligors given ratings of 5A through 6C in Shinsei's credit ratings system and claims against need caution obligors other than substandard obligors or other need caution obligors, and for the next year for claims against normal obligors given ratings higher than 5A.

Shinsei reviews its classification of obligors quarterly, although every month it downgrades obligors whose financial condition has deteriorated based on the results of its self-assessment process. A reserve for loans to restructuring countries is provided for estimated losses on those loans due to political and economic conditions in the countries.

Estimating Shinsei's specific reserve for claims against obligors in the possibly bankrupt category and the general reserve for claims against obligors in the substandard category is subject to a number of significant judgments and uncertainties regarding discounted cash flows due to the changing financial conditions of the obligors and general economic conditions surrounding the obligors' business operations. In addition, because the secured portion of claims is not covered by a specific reserve, actual losses on such claims are also subject to significant judgments and uncertainties regarding the fair value of collateral. Estimating the general reserve for claims against obligors in the normal and other need caution categories could be affected by changes made by management in the methodologies used to calculate the migration analyses of obligors or the assumptions used in the calculation of the reserve. As a result, actual losses in the non performing loans portfolio could be greater or less than we have estimated. If the estimated credit losses are not enough to cover actual losses incurred from the ultimate disposition of the portfolio, it would result in additional write-offs or additional reserves in the future for the lending portfolio, increasing our reported total credit costs. If the estimate is in excess of actual losses, it would result in a reduction of our total credit costs.

APLUS FINANCIAL establishes loan loss reserves based on the historical loss ratio for delinquent and non delinquent accounts. The amount of reserves in the case of delinquent accounts primarily depends on the number of months for which a particular account is past due. In addition, APLUS FINANCIAL writes off the entire amount of any claims it deems uncollectible, either as a result of personal bankruptcy or otherwise.

Shinsei Financial and SHINKI establish loan loss reserves in the same manner as APLUS FINANCIAL, and Showa Leasing establishes reserves on the basis of obligor classification in accordance with its self-assessment guidelines.

RESERVE FOR LOSSES ON INTEREST REPAYMENTS

On October 13, 2006, the Japanese Institute of Certified Public Accountants (the "JICPA") issued "Audit Guidelines on Consumer Finance Companies' Provisions for Possible Losses on Reimbursements of Excess Interest Payments," or the Guidelines. These guidelines stipulate that consumer and commercial finance companies make certain provisions for possible losses on reimbursements of excess interest payments and loan losses related to consumer finance loans extended at interest rates in excess of the maximum interest rate prescribed in the Interest Rate Restriction Act of Japan. The reserve is established in the amount of the estimated future reimbursement requests based on past experience. If any of the assumptions change due to changes in circumstances, an additional reserve could become necessary.

In addition, a reserve for losses on interest repayments of Shinsei Financial is calculated considering the terms stipulated in the share transfer agreement entered into by and between the Bank and the seller, GE, for the acquisition of Shinsei Financial, under which the sharing of interest repayment costs between the Bank and GE is determined.

VALUATION OF FINANCIAL INSTRUMENTS MEASURED AT FAIR VALUE

We have various types of financial instruments in our trading and banking books. Pursuant to Japanese GAAP, we record some of our financial instruments at their fair values, which are measured based on market prices or third-party quotes or, if both are unavailable, our internal valuation methodologies.

Although we strive to follow market standards in making assumptions and determining scenarios necessary for these valuation methodologies, the outcomes of our methodologies could differ from those derived from other methodologies.

AVAILABLE-FOR-SALE SECURITIES

We record available-for-sale securities, both debt and equity, at their fair values except for securities whose fair value cannot be reliably determined, such as non marketable equity securities, etc. The net unrealized gains or losses on these securities are included in and presented as a separate component of equity.

Available-for-sale securities include some securities without readily obtainable market prices or quotes. These securities primarily consist of residual interests and debt investments in collateralized debt obligations as well as illiquid corporate bonds. We estimate the fair values of these securities based on histori-

CRITICAL ACCOUNTING POLICIES (continued)

cal data concerning market prices and quotes. In some cases, we determine fair value using internal valuation methodologies that are subject to complex assumptions, including those relating to scenarios, interest rates and volatility.

IMPAIRMENT IN VALUE OF DEBT AND EQUITY SECURITIES

Available-for-sale debt and equity securities, and held-to-maturity debt securities are both exposed to the risk of decline in their fair values. If the decline in fair values of available-for-sale securities and held-to-maturity securities whose fair value can be reliably determined is deemed to be significant, impairment loss is recognized in the amortized/acquisition cost of the securities since the decline in fair values is deemed to be other than temporary. To determine whether an other-than-temporary impairment has occurred, we apply the following rule, which depends on the obligor classification of the security issuer based on our self-assessment guidelines:

Securities issued by “legally bankrupt,” “virtually bankrupt” and “possibly bankrupt” obligors	The fair value of securities is lower than the amortized/acquisition cost
Securities issued by “need caution” obligors	The fair value of securities is 30% or more lower than the amortized/acquisition cost
Securities issued by “normal” obligors	The fair value of securities is 50% or more lower than the amortized/acquisition cost

See “—Financial Condition—Asset Quality and Disposal of Non Performing Loans—Self-Assessment Guidelines and Reserve Policies—Definition of Obligor Classifications,” for the definition of each obligor classification.

For available-for-sale securities, whose fair value cannot be reliably determined, if the net asset value of a security has declined in excess of 50% of its acquisition cost, we deem the impairment to be other-than-temporary in principle.

FINANCIAL ASSETS AND LIABILITIES HELD FOR TRADING PURPOSES

Our trading book assets and liabilities consist of derivative financial instruments, securities, short-term money market investments and other monetary claims maturing within a short period of time.

In addition, we hold certain securities investments, such as foreign fund trusts and corporate bonds, financial assets backed by loans and receivables as well as mortgages included in securities, other monetary claims purchased and monetary assets held in trust that are not recorded in the trading book, but are

held for trading purposes in the banking book. All of these trading-purpose assets and liabilities are booked at their fair values, and changes in value are reflected in our net income (loss). The fair values of trading-purpose assets that are traded actively in open markets are based on observable market prices of the same or similar securities and monetary claims.

When actively traded market prices are not available, we estimate the fair values of the assets and liabilities held for trading purposes using our internal valuation methodologies. These methodologies require us to use our judgment in both making assumptions regarding market parameters, such as swap rates for interest rate and currency swaps with longer maturities, as well as determining the required scenarios, such as future cash flow projections for financial assets underlying purchased monetary claims. In addition, we adjust the fair value estimates for derivative financial instruments to reflect credit and liquidity risks.

CREDIT TRADING ACTIVITIES

We are engaged in credit-trading activities in Japan and foreign countries, in which we purchase monetary claims such as loans, bonds, guarantees, receivables and lease receivables without intending to hold them to maturity. To recover our investment, we either collect on the claim, including through repayments, legal proceedings and discounted payoffs, or resell or securitize the claim. Claims purchased are recorded either in monetary assets held in trust or other monetary claims purchased, depending on the structure used for the purchase, and are principally measured at fair value. Fair value is estimated in the same way as it is for assets held for trading purposes. The internal valuation methodology we use to calculate the fair value of these claims primarily relies on a discounted cash flow method based on cash flow projections and implied discount rates. As estimations of future cash flows and discount rates are based on complex processes and contain an element of judgment, changes in assumptions could lead to different estimates of the fair value of monetary assets held in trust and other monetary claims purchased, which could in turn impact the related gain or loss amounts in our financial statements.

VALUATION OF DEFERRED TAX ASSETS

We record deferred tax assets for deductible temporary differences and tax loss carry-forwards and evaluate them in accordance with the guidelines of the JICPA. Under the JICPA guidelines for the valuation of deferred tax assets, if a company records a material amount of tax loss carry-forwards, in most cases, it is deemed difficult to reasonably estimate future “Taxable Income” (which, for the purpose of utilizing deferred tax assets, is treated as taxable income before adjustments for existing temporary differences and tax loss carry-forwards). If,

CRITICAL ACCOUNTING POLICIES (continued)

however, a company is able to reasonably estimate future Taxable Income for the next fiscal year, it may record deferred tax assets based on deductible temporary differences and tax loss carry-forwards to the extent that it is probable that those differences or carry-forwards would be used during the next fiscal year. In addition, the JICPA guidelines provide that a company with a material amount of tax loss carry-forwards could recognize deferred tax assets as realizable based on future Taxable Income, reasonably estimated, for up to the next five fiscal years if the tax loss carry-forwards had been incurred due to certain non recurring events, such as the restructuring of businesses, and there was not necessarily any significant doubt as to the company's ability to earn Taxable Income in the future.

As a result of Taxable Income (as defined in the previous paragraph) recorded in recent periods, we could have recorded deferred tax assets realizable based on a reasonable estimate of income for at least a part of the next five fiscal years if we would have demonstrated that we would record actual Taxable Income for the foreseeable future. We have evaluated the available evidence concerning our future Taxable Income and other possible sources of the realization of deferred tax assets, and have concluded that we should record deferred tax assets that are realizable only in the following fiscal year for Shinsei and most of its subsidiaries. We have recorded a valuation allowance to reduce deferred tax assets accordingly. The actual Taxable Income amount for the fiscal year ended March 31, 2014 may be different from our estimate, which would result in a larger or smaller amount of deferred tax assets that should have been recognized.

"Act for Partial Revision to the Income Tax Act, etc. in order to Build a Tax Framework in Response to Changes in the Structure of the Economic Society" (Law No. 114 for 2011) and "Act on Special Measures for Securing Financial Resources Required to Implement Actions for Recovery from the Great East Japan Earthquake" (Law No. 117 for 2011) were promulgated in December 2, 2011. Since the fiscal year beginning on or after April 1, 2012, the corporate tax rate has been reduced and the reconstruction special corporate tax has been imposed. In connection with this change, the effective statutory tax rate for calculating deferred tax assets and deferred tax liabilities has been changed from the existing 40.7% to 38.0% for temporary differences and tax loss carry-forwards that are expected to be realized between the fiscal year beginning on April 1, 2012 and the fiscal year beginning on April 1, 2014; and to 35.6% for temporary differences and tax loss carryforwards that are expected to be realized in and after the fiscal year beginning on April 1, 2015. With these tax rate changes, deferred tax assets have decreased by ¥824 million and deferred tax liabilities have decreased by ¥162 million

while unrealized gain (loss) on available-for-sale securities has increased by ¥30 million and income taxes-deferred have increased by ¥851 million.

Since the fiscal year beginning on or after April 1, 2012, the use of tax loss carryforwards has been limited to the equivalent of 80% of taxable income before deducting tax loss carryforwards. Due to this limitation, in the fiscal year ending on March 31, 2012, deferred tax assets decreased by ¥202 million and deferred tax liabilities increased by ¥291 million while income taxes-deferred increased by ¥494 million.

RESERVE FOR EMPLOYEES' RETIREMENT BENEFITS

Shinsei, APLUS FINANCIAL and Showa Leasing each have a non contributory defined benefit pension plan, and Shinsei Financial and certain of Shinsei's consolidated domestic subsidiaries have unfunded severance indemnity plans, which cover substantially all of our employees. A reserve for employees' retirement benefits is provided for the payment of employees' retirement benefits in future years. We follow guidelines for accounting for employees' retirement benefit plans issued by the JICPA and estimate the amounts of the projected benefit obligation and the fair value of pension plan assets at the end of the fiscal year using assumptions for the expected rate of return on plan assets and the discount rate.

We determine the expected rate of return on plan assets based on the targeted average long-term performance of the assets. Because assumptions regarding the rate of return on assets are affected by changing general economic and market conditions, we need to make significant judgments to determine appropriate assumptions underlying the estimate of long-term performance, which also impact the estimate of the reserve for employees' retirement benefits and net periodic retirement benefit cost.

We have selected the interest rate for Japanese government bonds with a maturity which is the closest to the period of time for effective settlement of the benefit obligation under the pension plan as the basis for the discount rate. If we become aware of information that leads us to determine that a different period for settling the benefit obligation is required, the discount rate could be changed accordingly, which may have an impact on the related amounts reported in our financial statements. Changing our methodologies for calculating the estimated settlement period would also affect our estimate of the discount rate and related amounts in our financial statements.

HEDGE ACCOUNTING

We follow guidelines issued by the JICPA regarding hedge accounting applicable to financial assets and liabilities exposed to a risk of change in fair value or cash flow. Derivative transactions that meet the hedge accounting criteria are primarily accounted

CRITICAL ACCOUNTING POLICIES (continued)

for under a deferral method whereby unrealized gains and losses are deferred in a separate component of equity until the gains and losses on the hedged items are realized.

We adopted portfolio hedging in accordance with Industry Audit Committee Report No.24 issued by the JICPA. Under portfolio hedging activities to mitigate the change in fair value, a portfolio of hedged items with common maturities such as deposits or loans is designated and matched with a group of hedging instruments such as interest rate swaps, which offset the effect of fair value fluctuations of the hedged items by identified maturities. The effectiveness of the portfolio hedging is assessed by each group.

As for portfolio hedging activities to fix the cash flows, the effectiveness is assessed based on the correlation between the base interest rate index of the hedged cash flow and that of the hedging instrument. The interest rate swaps of certain consolidated subsidiaries which qualify for hedge accounting and meet specific matching criteria are not measured at fair values, but the net payments or receipts under the swap agreements are recognized and included in interest expenses or income.

Shinsei applies either deferral hedge accounting or fair value hedge accounting in accordance with Industry Audit Committee Report No.25 of the JICPA to the derivative transactions that meet the hedge accounting criteria for mitigating foreign currency fluctuation risks of Shinsei's financial assets and liabilities such as fund swap and certain currency swap transactions. Fund swap transactions are foreign exchange swaps, and consist of spot foreign exchange contracts bought or sold and forward foreign exchange contracts sold or bought. Such transactions are contracted for the purpose of lending or borrowing in a different currency and converting the corresponding principal equivalents and foreign currency equivalents to pay and receive, whose amounts and due dates are predetermined at the time of the transactions, into forward foreign exchange contracts sold or bought. Under deferral hedge accounting, hedged items are identified by grouping the foreign currency-denominated financial assets and liabilities by currencies and designating derivative transactions such as currency swap transactions and forward exchange contracts as hedging instruments. Hedge effectiveness is reviewed by comparing the total foreign currency position of the hedged items and hedging instruments by currency.

In accordance with Industry Audit Committee Report No.25 of the JICPA, Shinsei also applies deferral hedge accounting and fair value hedge accounting to translation gains or losses from foreign currency assets of net investments in foreign non-consolidated subsidiaries, affiliates and securities available for sale (other than bonds denominated in foreign currencies) when such foreign currency exposures recorded as assets are hedged with offsetting foreign currency liabilities and the liabilities exceed the acquisition cost of such foreign currency assets.

IMPAIRMENT OF LONG-LIVED ASSETS

We review our long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset or asset group may not be recoverable. Impairment losses on an asset or asset group establish a new cost basis for the assets. We evaluate our long-lived assets for impairment using our best estimates based on reasonable and supportable assumptions and projections. An impairment loss would be recognized if the carrying amount of an asset or asset group exceeds the sum of the undiscounted future cash flows expected to result from the continued use and eventual disposition of an asset or asset group. The impairment loss would be measured as the amount by which the carrying amount of the asset exceeds its recoverable amount, which is the higher of the discounted cash flows from the continued use and eventual disposition of the asset or the net selling price at disposition.

BUSINESS COMBINATIONS

For consolidated financial statement purposes, assets and liabilities of acquired subsidiaries are recorded primarily on the basis of their estimated fair values at the date of the acquisition.

We acquired controlling interests in APLUS FINANCIAL and Showa Leasing on September 29, 2004 and March 23, 2005, respectively. On December 13, 2007, we acquired a controlling interest in SHINKI, which was previously an affiliate, through the purchase of additional shares. On September 22, 2008, the Bank, together with APLUS FINANCIAL, acquired 100% of the controlling interest (equity and debt) in Shinsei Financial, and its subsidiaries.

In connection with the consolidation of APLUS FINANCIAL, Showa Leasing, SHINKI and Shinsei Financial, we recognized the assets (including intangibles) and liabilities of those entities primarily at their fair values. We used quoted market prices in active markets as the best evidence of fair value, where available. If quoted market prices were not available, the estimate of fair value was based on the best information available, including prices for similar assets and liabilities and the results using other fair value measurement methodologies. We adopted the following methodologies based on the nature of the assets and liabilities being valued and the availability of information:

- market approach: market transactions involving the sale of comparable assets;
- income approach: present value of earnings attributable to the asset.

As a result of fair value recognition, reserves for credit losses were offset with the corresponding loans or other assets.

We also recognized certain identifiable intangible assets in connection with the acquisition of Showa Leasing, Shinsei Financial and their consolidated subsidiaries, because they

CRITICAL ACCOUNTING POLICIES (continued)

were separable such as contractual or other legal rights. The identified other intangible assets consist of trade names and customer and/or merchant relationships, among others, which are valued using variations of the income approach and which are being amortized over various periods and using different methodologies depending on the nature of the asset. See Note 2 (C) to the Consolidated Financial Statements.

The excess of the purchase price over the fair value of the net assets acquired, including identified intangible assets, was recorded as goodwill and is being amortized on a consistent basis primarily over 20 years. The amortization period of 20 years is the maximum period allowed under Japanese GAAP and was determined based upon the Bank's business strategy. With regard to the acquisitions undertaken before April 1, 2010, accounted for under the previous accounting standard, when the purchase price was lower than the fair value of the net assets acquired, including identified intangible assets, the difference is recorded as negative goodwill and primarily amortized on a straight-line basis over 20 years, which is the maximum period allowed under the previous accounting standards. Any unamortized balances of identified other intangible assets and goodwill are subject to impairment testing periodically.

IMPAIRMENT OF GOODWILL AND INTANGIBLE ASSETS ACQUIRED IN BUSINESS COMBINATIONS

We conduct impairment testing for goodwill and intangible assets acquired in business combinations as a result of certain triggering events such as:

- An expectation of an operating loss or negative cash flow for two consecutive years;
- Impairment of underlying investment securities is recognized;
- A significant adverse change in the environment surrounding the business operations of the subsidiary, such as a change in the law which significantly impacts the business in a negative way; and
- Management decisions that could have an adverse effect on the value of goodwill and intangible assets acquired in business combinations

As the first step of the impairment test, we estimate the undiscounted future cash flows of the business. If the value of the undiscounted future cash flows is less than the book value of the net assets, including goodwill and intangible assets acquired in business combinations, of the business, it is determined that impairment exists and the next step of the impairment test is performed to measure the amount of impairment loss.

The next step of the impairment test compares the "value

in use," which is calculated as the discounted value of future cash flows of the business, and the net asset book value which includes unamortized balances of goodwill and intangible assets acquired in business combinations. (i) Impairment loss for the total of goodwill and intangible assets acquired in business combinations, is recognized as an amount by which the net asset book value exceeds the "value in use." The fair value of intangible assets acquired in business combinations is determined in the same manner used to apply purchase accounting at the date of the initial acquisition, and (ii) the impairment loss on intangible assets acquired in business combinations, is determined as the difference between the fair value and book value. Finally the impairment loss on goodwill is calculated as (i) less (ii) above.

ASSET RETIREMENT OBLIGATIONS

Effective April 1, 2010, the Group has applied ASBJ Statement No.18 "Accounting Standard for Asset Retirement Obligations" and ASBJ Guidance No.21 "Guidance on Accounting Standard for Asset Retirement Obligations."

Under this accounting standard, an asset retirement obligation is defined as a legal obligation imposed either by law or contract that results from the acquisition, construction, development and the normal operation of a tangible fixed asset and is associated with the retirement of such tangible fixed asset.

The asset retirement obligation is recognized as the sum of the discounted cash flows required for the future asset retirement and is recorded in the period in which the obligation is incurred. Upon initial recognition of a liability for an asset retirement obligation, an asset retirement cost is capitalized by increasing the carrying amount of the related fixed asset by the amount of the liability.

The asset retirement cost is subsequently allocated to expense through depreciation over the remaining useful life of the asset. Over time, the liability is accreted to its present value each period. Any subsequent revisions to the timing or the amount of the original estimate of undiscounted cash flows are reflected as an increase or a decrease in the carrying amount of the liability and the capitalized amount of the related asset retirement cost.

RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

See "(AD) NEW ACCOUNTING PRONOUNCEMENTS" in Note 2 "SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES" to the Consolidated Financial Statements.

FINANCIAL CONDITION

TOTAL ASSETS

As of March 31, 2013, we had consolidated total assets of ¥9,029.3 billion, representing a 4.9% increase from March 31, 2012.

Our loans and bills discounted balance was ¥4,292.4 billion as of March 31, 2013. It increased by ¥155.6 billion compared to the balance of ¥4,136.8 billion as of March 31, 2012. The Institutional Group grew their balance of loans and bills discounted, due to efforts to make new loan disbursements, while housing loans increased in the Individual Group. On the other hand, we saw continued reduction of our non core assets, and a lower loan balance within our consumer finance business due to the impact of the revised Money-Lending Business Control and Regulation Law. However, the pace of decrease in the consumer finance loan balance has gradually become less pronounced, mainly due to the commencement of the Bank-based consumer finance business from October 2011. The loan balance within our consumer finance business has increased slightly on a quarterly basis in the fourth quarter of the fiscal

year ended on March 31, 2013. The total loans and bills discounted increased due to an increase in core business loans and bills discounted which exceeded the negative factors.

SECURITIES

The following table sets forth the composition of our consolidated portfolio of trading securities in the banking book, available-for-sale securities and held-to-maturity securities as of March 31, 2013. As reflected below, 82.5% of the securities will mature during the next five years. The balance of securities as of March 31, 2013 was ¥1,842.3 billion, almost the same of ¥1,873.4 billion as of March 31, 2012. Over half of the investments in securities were consisted of Japanese national government bonds for ALM purposes, including liquidity reserves. In the course of portfolio management, the total balance of Japanese national government bonds was ¥1,337.3 billion as of March 31, 2013, as compared to ¥1,285.1 billion as of March 31, 2012.

TABLE 18. SECURITIES BY MATURITY (CONSOLIDATED)

FINANCIAL CONDITION (continued)

LOAN PORTFOLIO

As of March 31, 2013, loans and bills discounted totaled ¥4,292.4 billion. This represented 47.5% of total consolidated assets. Installment receivables of APLUS FINANCIAL, Showa Leasing and our other non bank subsidiaries are classified in our consolidated balance sheets as other assets, and are not reflected in our data on loans and bills discounted.

Most of our loan portfolio was originated by Shinsei and our

domestic subsidiaries. Of loans we originated, loans to the finance and insurance industry and the real estate industry accounted for 31.1% of total loans as of March 31, 2013. Loans to the real estate industry consisted in part of non recourse and project finance loans. Loans to others of ¥1,768.1 billion as of March 31, 2013 included loans extended to Shinsei's retail banking, Shinsei Bank Lake, Shinsei Financial's, APLUS FINANCIAL's and SHINKI's individual customers amounting, in aggregate, to ¥1,561.3 billion.

Over three years to five years	624.6	629.8
Over five years to seven years	155.6	131.7
Over seven years	650.5	627.2
Indefinite term	50.7	61.9
Total loans:		
One year or less	¥ 1,019.7	¥ 1,097.5
Over one year to three years	887.5	821.7
Over three years to five years	640.0	665.8
Over five years to seven years	308.9	323.4
Over seven years	1,240.4	1,103.2
Indefinite term	127.7	90.8
Total loans	¥ 4,224.4	¥ 4,102.6

Note: (1) Loans with maturities of one year or less are not broken down by type of interest rate.

ASSET QUALITY AND DISPOSAL OF NON PERFORMING LOANS OF SHINSEI

At March 31, 2013, 71.9% of our consolidated non performing loans as disclosed in accordance with the guidelines of the Japanese Bankers Association (JBA) were held by Shinsei and most of the remaining non performing loans were held by Shinsei Financial and APLUS FINANCIAL. This discussion of our asset quality presents information of Shinsei on a non-consolidated basis unless specified otherwise. In particular, non performing claims as defined in the Financial Revitalization Law are only disclosed on a non-consolidated basis, and therefore do not include non performing loans held by Shinsei Financial, APLUS FINANCIAL, Showa Leasing and SHINKI. For a discussion of the non performing claims of Shinsei Financial, APLUS FINANCIAL, Showa Leasing and SHINKI see "—Asset Quality of Shinsei

Financial, APLUS FINANCIAL, Showa Leasing and SHINKI."

We classify our obligors and assess our asset quality based on our self-assessment guidelines developed in accordance with guidelines published by the FSA. We generally perform our self-assessment quarterly. The self-assessment process involves classifying obligors based on their financial condition and then categorizing claims against obligors in order of collection risk. Based on these classifications, we establish reserves and disclose our non performing loans and other claims using criteria specified in the Financial Revitalization Law. We also disclose our non performing loans under a format devised by the JBA for the disclosure of risk-monitored loans.

The following table compares the scope of each category of claim under the Financial Revitalization Law and each type of risk-monitored loan, as well as the obligor type to which they relate as of March 31, 2013:

	Other need caution				
Normal	0A–6C	0.4% for total claims	Normal claims 4,317.8		Normal 3,999.3
Total non performing claims and ratio to total claims			242.6, 5.3% (Total amount of coverage, coverage ratio) (232.7*, 95.9%)		Total risk-monitored loans and ratio to total loans and bills discounted 225.0, 5.3%
			*Total amount of reserve for loan losses is 74.0, collateral and guarantees is 158.6		

Notes: (1) Financial and operational data that are stated in multiples of ¥0.1 billion have been truncated. All percentages have been rounded to the nearest 0.1%.

(2) The Financial Revitalization Law requires us to classify and disclose "claims" which include, in addition to loans and bills discounted, foreign exchange claims, securities lent, private placement bonds guaranteed by Shinsei, accrued income and suspense payments in other assets, as well as customers' liabilities for acceptances and guarantees. By comparison, as for risk-monitored loans, the format devised by the Japanese Bankers' Association only classifies, and calls for disclosure of, certain loans and bills discounted.

(3) Shaded claims denoted claims that are considered to be non performing under the Financial Revitalization Law.

(4) The general reserve is calculated to total claims and contains the reserve to secured portion as well.

In October 2002, the FSA announced the "Program for Financial Revival" that has led to more stringent evaluations of claims. This program requires banks to use discounted cash flow analyses, among other measures, when providing loan loss reserves against major borrowers with substandard claims. Through the program, the FSA also sought greater scrutiny of the effect of recording large amounts of deferred tax assets on the quality of a bank's regulatory capital. We

have exceeded the FSA's requirements for employing the discounted cash flow method, applying it to approximately 90%, by principal amount, and ¥500 million or more in outstanding balance, of our claims against substandard obligors and possibly bankrupt obligors, excluding non Japanese transactions and transactions with individuals as their future cash flows cannot be reasonably estimated.

FINANCIAL CONDITION (continued)

SELF-ASSESSMENT GUIDELINES AND RESERVE POLICIES

DEFINITION OF OBLIGOR CLASSIFICATIONS	
OBLIGOR CLASSIFICATION	DEFINITION
Legally bankrupt (<i>hatan-saki</i>)	Obligors who have already gone bankrupt, from a legal and/or formal perspective.
Virtually bankrupt (<i>jisshitsu hatan-saki</i>)	Obligors who have not yet gone legally or formally bankrupt but who are substantially bankrupt because they are in serious financial difficulties and are not deemed to be capable of restructuring.
Possibly bankrupt (<i>hatan kenen-saki</i>)	Obligors who are not yet bankrupt but are in financial difficulties and are very likely to go bankrupt in the future because they are having difficulty implementing their management improvement plans. This includes obligors who are receiving ongoing support from financial institutions.
Need caution (<i>youchui-saki</i>)	Obligors who require close attention because there are problems with their borrowings, such as reduced or suspended interest payments, problems with fulfillment, such as substantial postponements of principal or interest payments, or problems with their financial position as a result of their poor or unstable business conditions. The term "need caution obligors" includes "substandard obligors" (<i>youkanri-saki</i>), which refers to obligors with "substandard claims," that is, loans past due for three months or more or restructured loans. Claims against need caution obligors that are not substandard claims are sometimes referred to as "claims against other need caution obligors" (<i>sono ta youchui-saki</i>).
Normal (<i>seijou-saki</i>)	Obligors whose business conditions are favorable and who are deemed not to have any particular problems in terms of their financial position.

DEFINITIONS OF CLAIMS CLASSIFIED UNDER THE FINANCIAL REVITALIZATION LAW	
CATEGORY	DEFINITION
Claims against bankrupt and quasi-bankrupt obligors (<i>hasan kosei saiken oyobi korera ni junzuru saiken</i>)	Claims against obligors under bankruptcy and similar claims, as provided for under the Bankruptcy Law, the Corporate Reorganization Law, the Civil Rehabilitation Law and similar laws.
Doubtful claims (<i>kiken saiken</i>)	Claims against obligors that are not yet in bankruptcy but have experienced deterioration in their financial condition and operating performance and for which there is a high probability of contractual defaults on principal and interest payments.
Substandard claims (<i>youkanri saiken</i>)	Loans past due for three months or more and restructured loans, excluding those categorized as claims against bankrupt and quasi-bankrupt obligors or doubtful claims.
Normal claims (<i>seijou saiken</i>)	Claims against obligors that are experiencing no particular problems with their financial condition or operating performance, other than claims in any of the three categories above.

DEFINITIONS OF CATEGORIES OF RISK-MONITORED LOANS	
CATEGORY	DEFINITION
Loans to bankrupt obligors (<i>hatan-saki saiken</i>)	Loans to legally bankrupt obligors.
Non accrual delinquent loans (<i>entai-saki saiken</i>)	Loans to virtually bankrupt and possibly bankrupt obligors.
Loans past due for three months or more (<i>san-ka-getsu ijou entai saiken</i>)	Loans on which principal and/or interest are past due three months or more.
Restructured loans (<i>kashidashi jouken kanwa saiken</i>)	Loans with lending terms that have been changed in ways favorable to the borrower, including reducing interest rates, providing grace periods for repayment and forgiving a portion of the debt.

FINANCIAL CONDITION (continued)

RESERVE POLICIES	
CLAIMS AGAINST OBLIGORS, AS CATEGORIZED UNDER SELF-ASSESSMENT GUIDELINES	RESERVE POLICY
Claims against legally and virtually bankrupt obligors Claims against possibly bankrupt obligors	We either write off directly or make a provision for, in the specific reserve for loan losses, the full amount of the unsecured, unguaranteed portion of the claim. For most claims against possibly bankrupt obligors, we make a provision in the specific reserve for loan losses in an amount calculated based on the discounted cash flow method. For the remaining claims, we make a provision to that reserve for the unsecured, unguaranteed portion of the claims in the amount of the product of that portion and the higher of 70% or the estimated loss ratio, based on historical losses on claims in this category, for the next three years.
Claims against substandard obligors	For most claims against substandard obligors, we make a provision in the general reserve for loan losses in an amount calculated based on the discounted cash flow method. For the remaining claims, we make a provision to that reserve for the estimated amount of losses over three years computed based on the expected loss ratio for claims in this category.
Claims against need caution obligors, other than claims against substandard obligors Claims against normal obligors	We make a provision, in the general reserve for loan losses, for the estimated amount of losses over the average remaining term of the loans computed based on the expected loss ratio for claims in this category. For claims against obligors rated 5A through 6C under our credit rating system, we make a provision, in the general reserve for loan losses, for the estimated amount of losses over the average remaining term of the loans computed based on the expected loss ratio for claims in this category. For the remaining claims, we make a provision to that reserve for the estimated amount of losses over a year computed based on the expected loss ratio for claims in this category.

CLAIMS CLASSIFIED UNDER THE FINANCIAL REVITALIZATION LAW

Under the Financial Revitalization Law, Japanese banks categorize their total claims in four categories by reference to the nature of the relevant assets. In addition to loans and bills discounted, claims that are subject to disclosure under the Financial Revitalization Law include foreign exchange claims, securities lent, private placement bonds guaranteed by Shinsei, accrued income and suspense payments in other assets, as well as customers' liabilities for acceptances and guarantees.

DISCLOSURE OF CLAIMS CLASSIFIED UNDER THE FINANCIAL REVITALIZATION LAW

Our current management team has consistently emphasized the monitoring of non performing loans. Shinsei's total amount of non performing claims as disclosed pursuant to the Financial

Revitalization Law decreased by ¥53.3 billion, or 18.0%, to ¥242.6 billion, between March 31, 2012 and 2013. During the fiscal year ended March 31, 2013, claims against bankrupt and quasi-bankrupt obligors decreased from ¥49.1 billion to ¥38.6 billion, doubtful claims decreased from ¥245.2 billion to ¥198.3 billion, and substandard claims increased from ¥1.5 billion to ¥5.6 billion as a result of our self assessment. The ratio of non performing claims disclosed under the Financial Revitalization Law to total non-consolidated claims as of March 31, 2013 decreased to 5.3%, compared to 6.7% as of March 31, 2012.

Shinsei's claims against other need caution obligors, excluding substandard claims, totaled ¥196.0 billion as of March 31, 2013, a 33.3% decrease from ¥293.9 billion as of March 31, 2012. These include private placement bonds guaranteed by Shinsei and classified as claims against other need caution obligors. These claims represented 4.3% of total non-consolidated claims as of March 31, 2013, down from 6.6% as of March 31, 2012.

TABLE 22. CLAIMS CLASSIFIED UNDER THE FINANCIAL REVITALIZATION LAW (NON-CONSOLIDATED)

As of March 31	Billions of yen (except percentages)	
	2013	2012
Claims against bankrupt and quasi-bankrupt obligors	¥ 38.6	¥ 49.1
Doubtful claims	198.3	245.2
Substandard claims	5.6	1.5
Total claims disclosed under the Financial Revitalization Law ⁽¹⁾	242.6	295.9
Normal claims and claims against other need caution obligors, excluding substandard claims	4,317.8	4,149.8
Total claims	¥ 4,560.4	¥ 4,445.7
Ratio of total claims disclosed under the Financial Revitalization Law to total claims	5.3%	6.7%

Note: (1) Total claims consists of loans and bills discounted, foreign exchange claims, securities lent, accrued interest income and suspense payments in other assets, as well as customers' liabilities for acceptances and guarantees.

FINANCIAL CONDITION (continued)

COVERAGE RATIOS

As of March 31, 2013, Shinsei's non-consolidated coverage ratios for claims classified under the Financial Revitalization Law, which for each category of claims is the total of collateral pledged against claims, guarantees for claims and reserve for loan losses, measured against total claims, were 100.0% for claims against bankrupt and quasi-bankrupt obligors, 96.3% for

doubtful claims and 55.1% for substandard claims. For all claims classified under the Financial Revitalization Law, the coverage ratio was 95.9%, a decrease from 96.7% as of March 31, 2012.

Shinsei directly writes off, rather than reserves, the portion of claims against bankrupt and quasi-bankrupt obligors that are estimated to be uncollectible. In the fiscal years ended March 31, 2013 and 2012, ¥58.1 billion and ¥74.9 billion, respectively, of such claims were written off on a non-consolidated basis.

TABLE 23. COVERAGE RATIOS FOR NON PERFORMING CLAIMS DISCLOSED UNDER THE FINANCIAL REVITALIZATION LAW (NON-CONSOLIDATED)

	Billions of yen (except percentages)				
	Amounts of coverage				Coverage ratio
	Amount of claims	Reserve for loan losses	Collateral and guarantees	Total	
As of March 31, 2013:					
Claims against bankrupt and quasi-bankrupt obligors	¥ 38.6	¥ —	¥ 38.6	¥ 38.6	100.0%
Doubtful claims	198.3	72.9	118.0	190.9	96.3
Substandard claims	5.6	1.1	2.0	3.1	55.1
Total	¥ 242.6	¥ 74.0	¥ 158.6	¥ 232.7	95.9%
As of March 31, 2012:					
Claims against bankrupt and quasi-bankrupt obligors	¥ 49.1	¥ 3.6	¥ 45.4	¥ 49.1	100.0%
Doubtful claims	245.2	72.5	162.9	235.4	96.0
Substandard claims	1.5	0.4	1.1	1.5	99.0
Total	¥ 295.9	¥ 76.6	¥ 209.5	¥ 286.1	96.7%

CHANGES IN AMOUNT OF NON PERFORMING CLAIMS

The table below sets forth Shinsei's experience since March 31, 2011 with the removal of non performing claims and the emergence of new claims on a non-consolidated basis:

TABLE 24. CHANGES IN AMOUNT OF NON-PERFORMING CLAIMS (NON-CONSOLIDATED)

	Billions of yen			
	Substandard claims	Doubtful claims	Claims against bankrupt and quasi-bankrupt obligors	Total
Balance of non performing claims as of March 31, 2011	¥ 6.3	¥ 210.7	¥ 62.4	¥ 279.5
Claims newly added April 1, 2011 to March 31, 2012	0.7	59.5	1.4	61.7
Claims removed April 1, 2011 to March 31, 2012	(2.1)	(27.7)	(15.5)	(45.4)
Claims migrating between classifications April 1, 2011 to March 31, 2012	(3.4)	2.6	0.7	—
Net change	(4.8)	34.5	(13.3)	16.3
Balance of non performing claims as of March 31, 2012	¥ 1.5	¥ 245.2	¥ 49.1	¥ 295.9
Claims newly added April 1, 2012 to March 31, 2013	3.7	3.1	1.2	8.0
Claims removed April 1, 2012 to March 31, 2013	(0.4)	(38.8)	(22.0)	(61.3)
Claims migrating between classifications April 1, 2012 to March 31, 2013	0.8	(11.1)	10.3	—
Net change	4.1	(46.9)	(10.4)	(53.3)
Balance of non performing claims as of March 31, 2013	¥ 5.6	¥ 198.3	¥ 38.6	¥ 242.6

In the fiscal year ended March 31, 2013, ¥8.0 billion of claims were newly classified as substandard or worse, while Shinsei removed ¥61.3 billion of claims in these categories during the same period. Of the newly added non performing claims, ¥3.1 billion were classified as doubtful claims, and ¥3.7 billion were

substandard claims.

For the fiscal year ended March 31, 2012, ¥61.7 billion of claims were newly classified as substandard or worse, while Shinsei removed ¥45.4 billion of claims in these categories during the same period.

FINANCIAL CONDITION (continued)

RESERVE FOR CREDIT LOSSES

The following table sets forth a breakdown of our total reserve for credit losses on a non-consolidated basis as of the dates indicated:

TABLE 25. RESERVE FOR CREDIT LOSSES (NON-CONSOLIDATED)

As of March 31	Billions of yen (except percentages)	
	2013	2012
General reserve for loan losses	¥ 28.5	¥ 39.6
Specific reserve for loan losses	74.0	77.6
Reserve for loans to restructuring countries	0.0	0.0
Subtotal of reserve for loan losses	102.6	117.2
Specific reserve for other credit losses	3.9	3.9
Total reserve for credit losses	¥ 106.5	¥ 121.1
Total claims ⁽¹⁾	¥ 4,560.4	¥ 4,445.7
Ratio of total reserve for loan losses to total claims	2.3%	2.6%
Ratio of total reserve for credit losses to total claims	2.3%	2.7%

Note: (1) Total claims consists of loans and bills discounted, foreign exchange claims, securities lent, accrued interest income and suspense payments in other assets, as well as customers' liabilities for acceptances and guarantees.

As of March 31, 2013 and 2012, Shinsei's total reserve for credit losses on a non-consolidated basis was ¥106.5 billion and ¥121.1 billion, respectively, constituting 2.3% and 2.7%, respectively, of total claims.

TABLE 26. RESERVE RATIOS BY BORROWERS' CATEGORY (NON-CONSOLIDATED)

As of March 31	Percentages	
	2013	2012
Legally and virtually bankrupt (unsecured portion)	100.0%	100.0%
Possibly bankrupt (unsecured portion)	96.1%	95.4%
Substandard (unsecured portion)	36.9%	240.9% ⁽¹⁾
Need caution (total claims)	5.5%	5.8%
(unsecured portion)	27.4%	15.1%
Normal (total claims)	0.4%	0.6%

Note: (1) The general reserve is calculated to total claims and contains the reserve to secured portion as well.

RISK-MONITORED LOANS

Consolidated risk-monitored loans decreased by 15.9% during the fiscal year ended March 31, 2013 to ¥312.8 billion. The decrease of ¥63.8 billion in non accrual delinquent loans during the period

were primarily attributable to collection of non-consolidated loans.

The following tables set forth information concerning our consolidated and non-consolidated risk-monitored loans as of the dates indicated:

TABLE 27. RISK-MONITORED LOANS (CONSOLIDATED)

As of March 31	Billions of yen (except percentages)	
	2013	2012
Total loans and bills discounted	¥ 4,292.4	¥ 4,136.8
Loans to bankrupt obligors (A)	20.5	8.1
Non accrual delinquent loans (B)	252.9	316.7
Subtotal (A)+(B)	¥ 273.4	¥ 324.8
Ratio to total loans and bills discounted	6.4%	7.9%
Loans past due for three months or more (C)	¥ 1.2	¥ 1.7
Restructured loans (D)	38.1	45.3
Total risk-monitored loans (A)+(B)+(C)+(D)	¥ 312.8	¥ 371.9
Ratio to total loans and bills discounted	7.3%	9.0%
Reserve for credit losses	¥ 161.8	¥ 180.6

FINANCIAL CONDITION (continued)

Note: (1) As of March 31, 2013, reserve for loan losses and collateral/guarantees for risk monitored loans related to asset-backed investments were ¥0.3 billion and ¥5.0 billion, respectively, and the coverage ratio was 91.6%.

FINANCIAL CONDITION (continued)

ASSET QUALITY OF SHINSEI FINANCIAL, APLUS FINANCIAL, SHOWA LEASING AND SHINKI

Shinsei Financial, APLUS FINANCIAL, Showa Leasing and SHINKI classify their obligors and assess their asset quality based on the self-assessment guidelines developed in accordance with guidelines published by the FSA. They generally perform their self-assessment quarterly and at least semi-annually. Shinsei Financial's, APLUS FINANCIAL's, Showa Leasing's

and SHINKI's assessments, where applicable, include, among other things, an assessment of credit extended to credit card customers as well as lease obligors, unsecured personal loans and customer guarantees.

The following tables set forth information concerning consolidated risk-monitored loans and risk-monitored installment receivables held by Shinsei, Shinsei Financial, APLUS FINANCIAL, Showa Leasing, SHINKI and other subsidiaries as of the dates indicated:

TABLE 31. RISK-MONITORED LOANS BREAKDOWN FOR LARGE ENTITIES (CONSOLIDATED)

Note: (1) Neither Shinsei nor SHINKI had any such installment receivables.

FUNDING AND LIQUIDITY

We continue to optimize its funding base through deposits from retail customers. Total deposits and negotiable certificates of deposit increased from ¥5,362.4 billion as of March 31, 2012 to ¥5,457.5 billion as of March 31, 2013. The retail deposits balance totaled ¥4,694.9 billion as of March 31, 2013,

an increase of ¥32.5 billion compared to March 31, 2012. Retail Banking constitutes 86.5% of our total funding through customer deposits and debentures. The following table shows changes in the proportion of our overall funding represented by funds raised from deposits and debentures in our Retail and Institutional Banking businesses.

FINANCIAL CONDITION (continued)

TABLE 33. DIVERSIFICATION BY FUNDING TYPE (CONSOLIDATED)

As of March 31	Billions of yen	
	2013	2012
Retail deposits	¥ 4,694.9	¥ 4,662.4
Retail debentures ⁽¹⁾	253.8	268.5
Institutional deposits	762.5	700.0
Institutional debentures	8.4	25.6
Total	¥ 5,719.8	¥ 5,656.5

Note: (1) Excludes unclaimed matured debentures.

DEPOSITS

The following table sets forth the composition of our time deposits by remaining maturity as of the dates indicated:

TABLE 34. MATURITY SCHEDULE OF TIME DEPOSITS (CONSOLIDATED)

As of March 31	Billions of yen	
	2013	2012
Less than three months ⁽¹⁾	¥ 1,487.0	¥ 1,626.4
Three months or more, but less than six months	184.9	260.7
Six months or more, but less than one year	548.3	167.3
One year or more, but less than two years	521.5	609.5
Two years or more, but less than three years	209.3	464.6
Three years or more	299.3	164.0
Total	¥ 3,250.5	¥ 3,292.7

Note: (1) Less than three months includes time deposits that have matured but have not yet been paid.

DEBENTURES AND CORPORATE BONDS

The following table sets forth the composition of our debentures and corporate bonds by remaining maturity as of the dates indicated:

TABLE 35. MATURITY SCHEDULE OF DEBENTURES AND CORPORATE BONDS (CONSOLIDATED)

Debentures

Fiscal year ending March 31	Billions of yen
2014	¥ 45.5
2015	44.2
2016	56.8
2017	57.2
2018 and thereafter	58.5
Total	¥ 262.3

Corporate Bonds

Fiscal year ending March 31	Billions of yen
2014	¥ 1.5
2015	34.5
2016	61.1
2017	4.6
2018 and thereafter	72.3
Total	¥ 174.2

FINANCIAL CONDITION (continued)**OTHER**

The securitization of loans and other assets is another component of our funding strategy. We will continue to explore additional issuance opportunities subject to market conditions.

directly by our credit ratings and changes thereto. On August 24, 2011, Moody's downgraded Shinsei's long-term credit rating to Ba1, outlook "Negative" from Baa3, outlook "Stable" and Shinsei's short-term credit rating from Prime-3 to Not Prime. Shinsei's credit ratings as of July 1, 2013 are set forth in the table below:

CREDIT RATINGS

Our borrowing costs and ability to raise funds are impacted

TAXATION

SCHEDULE OF TAX LOSS CARRYFORWARDS

As of March 31, 2013, Shinsei had ¥168.0 billion of tax loss carryforwards based on the consolidated corporate tax system.

TABLE 38. SCHEDULE OF TAX LOSS CARRY-FORWARDS

Year tax loss carry-forwards generated/renewed	Billions of yen	
	Amount	Date of expiry
Shinsei Bank		
March 31, 2009	¥ 107.4	March 31, 2018

Total	¥ 58.8	

The table above sets forth a schedule of tax loss carryforwards of Shinsei Bank, APLUS FINANCIAL, Shinsei Financial, Showa Leasing and SHINKI as of March 31, 2013. Because APLUS FINANCIAL, Shinsei Financial, Showa Leasing and SHINKI are not wholly-owned subsidiaries, we are unable to include their results in our consolidated tax returns.

In the event that Shinsei, APLUS FINANCIAL, Shinsei Financial, Showa Leasing or SHINKI, as the case may be, generates less taxable income in a given fiscal year than the tax loss carryforward that will expire at year-end, the benefit of the unused portion of the expiring tax loss carryforward will be lost.

We record deferred tax assets for tax loss carryforwards and evaluate them in accordance with the JICPA guidelines.

See “—Critical Accounting Policies— Valuation of Deferred Tax Assets” on pages 81-82.

CONSOLIDATED CORPORATE TAX SYSTEM

We have filed our tax returns under the consolidated corporate tax system since the fiscal year ended March 31, 2004. Under the consolidated system, we base corporate tax payments on the combined profits or losses of Shinsei and its wholly-owned domestic subsidiaries.

Showa Leasing and APLUS FINANCIAL have also adopted the consolidated corporate tax system beginning with the fiscal year ended March 31, 2007 and March 31, 2011, respectively.

FINANCIAL CONDITION (continued)

CAPITAL RESOURCES AND ADEQUACY

EQUITY

The following table sets forth a summary of our equity as of March 31, 2013 and 2012:

TABLE 39. EQUITY (CONSOLIDATED)

As of March 31	Billions of yen (except percentages)	
	2013	2012
Common stock	¥ 512.2	¥ 512.2
Capital surplus	79.4	79.4
Stock acquisition rights	1.2	1.3
Retained earnings	107.2	58.8
Treasury stock, at cost	(72.5)	(72.5)
Accumulated other comprehensive income:		
Unrealized gain (loss) on available-for-sale securities	3.8	(0.6)
Deferred gain (loss) on derivatives under hedge accounting	(11.6)	(11.7)
Foreign currency translation adjustments	1.4	(1.1)
Total	¥ 621.3	¥ 565.7
Minority interests	62.3	61.8
Total equity	¥ 683.6	¥ 627.6
Ratio of total equity to total assets	7.6%	7.3%

CAPITAL RATIOS

From the fiscal year ended March 31, 2007, the Basel II methodology has been adopted to calculate capital ratios. For credit risk, the Foundation Internal Ratings Based Approach (FIRB) has been applied. For operational risk, the Standardized Approach (TSA) has been adopted and the Internal Model

Method has been used for market risk.

Our total capital adequacy ratio as of March 31, 2013 was 12.2%, compared with 10.3% as of March 31, 2012. Our Tier I capital ratio, or the ratio of Tier I capital to risk assets, increased from 8.8% as of March 31, 2012 to 10.4% as of March 31, 2013.

FINANCIAL CONDITION (continued)

TABLE 40. CAPITAL RATIOS (CONSOLIDATED)

As of March 31	Billions of yen (except percentages)	
	2013	2012

Preferred securities issued by foreign SPC	57.5	56.7
Goodwill	(35.3)	(41.9)
Intangible assets acquired in business combinations	(12.4)	(16.2)
Gain on sale of securitization	(9.5)	(9.7)
50% of expected loss provision shortfall	(20.3)	(30.2)
Total Tier I (A)	608.8	537.1
Step-up preferred securities	24.0	23.6
Supplementary items (Tier II):		
General reserve for loan losses	8.9	9.1
Perpetual preferred stocks	—	—
Perpetual subordinated debt and bonds	29.3	28.7
Non perpetual preferred stocks	—	—
Non perpetual subordinated debt and bonds	140.4	159.1
Total	¥ 178.7	¥ 197.0
Amount eligible for inclusion in capital (B)	178.7	197.0
Deduction (C)	¥ 71.7	¥ 107.2
Intentional capital investment to other financial institutions	5.8	6.1
Capital investment to affiliate companies	39.1	38.6
50% of expected loss provision shortfall	20.3	30.2
Expected losses on exposures under PD/LGD measures such as equities	0.8	1.4
Unrated securitization exposure	5.5	30.8
Exclusion from deductions	—	—
Total capital (D) [(A)+(B)-(C)]	¥ 715.8	¥ 626.9
Risk assets:		
On-balance sheet items	¥ 4,443.3	¥ 4,537.4
Off-balance sheet items	807.5	908.6
Market Risk ⁽²⁾	228.2	268.8
Operational Risk ⁽²⁾	368.5	387.5
Total (E)	¥ 5,847.7	¥ 6,102.5
Consolidated capital adequacy ratio (D) / (E)	12.2%	10.3%
Consolidated Tier I capital ratio (A) / (E)	10.4%	8.8%

Notes: (1) In accordance with Japanese FSA Notification Number 79 (issued in 2008 as a special treatment of the FSA Notification Number 19 issued in 2006), unrealized losses on available-for-sale securities were not included in the Tier I capital of Japanese banks that use a domestic standard for calculating capital adequacy ratios.

(2) Derived by multiplying the capital requirement by 12.5 (i.e., the reciprocal of the minimum capital ratio of 8%).

COMPOSITION OF TIER I CAPITAL

In March 2009, Shinsei executed an innovative securities exchange transaction in which investors holding APLUS FINANCIAL Class-D preferred shares, which were included in our Tier II capital, were given an opportunity to exchange their holdings for newly issued Shinsei hybrid Tier I securities. In connection with this securities exchange and with a new hybrid Tier I securities issuance, Shinsei issued ¥48.2 billion of new hybrid Tier I securities. Of this amount, ¥39.1 billion was placed with investors who exchanged their holdings of APLUS FINANCIAL Class-D preferred shares issued to new hybrid Tier I investors, in addition, ¥9.1 billion was issued to new hybrid Tier I investors. In connection with this securities exchange,

Shinsei made an investment of ¥64.5 billion in APLUS FINANCIAL Class-H preference shares.

The issuance of hybrid Tier I securities domestically at attractive levels facilitated our strategy of selectively repurchasing our outstanding capital securities. In particular, we repurchased a total of ¥91.0 billion of our U.S. dollar and JPY denominated hybrid Tier I step-up and non step-up securities and recorded a gain of ¥24.9 billion in connection with these repurchases in the fiscal year ended March 31, 2011. On March 15, 2011 we issued 690,000,000 new shares of its common stock through an international offering. The capital raising was geared to strengthen the Bank's core capital (common equity Tier I) ahead of impending new capital regulations, enhance its credit posi-

FINANCIAL CONDITION (continued)

tion and support efforts to expand its customer base and stabilize earnings as it works towards sustainable growth. The amount of proceeds of ¥71.8 billion obtained from the international offering was used for general corporate purposes. This capital increase led to an increase of Tier I through an increase of the capital stock and the capital surplus.

PREFERRED SECURITIES ISSUED BY SUBSIDIARIES OUTSIDE JAPAN

On February 23, 2006, we issued \$775.0 million of step-up non cumulative perpetual preferred securities. The dividend on the preferred securities is 6.418% for the initial ten years. In addition, on March 23, 2006, we issued \$700.0 million of non step-up non cumulative perpetual preferred securities. The dividend on the non step-up perpetual preferred securities is 7.16% for the initial ten years. On December 14, 2010, we concluded a cash tender offer for these perpetual preferred securities.

On March 30, 2009, we issued ¥22.6 billion in step-up non cumulative perpetual preferred securities. The dividend on the preferred securities is 5.00% for the initial ten years. In addition, on March 30, 2009, we also issued ¥25.6 billion in non step-up non cumulative perpetual preferred securities. The dividend on the non step-up perpetual preferred securities is 5.50% for the initial ten years.

On October 2, 2009 we issued ¥9.0 billion of non step-up non cumulative perpetual preferred securities. The dividend on the preferred securities is 5.5% for the initial six years of ¥4.0 billion of preferred securities and floating rate (JPY base Libor+4.55%) of ¥5.0 billion of preferred securities.

The proceeds from the offerings of the preferred securities are recorded as minority interests in subsidiaries and counted towards Tier I capital. The amount of such proceeds which may be counted towards Tier I capital is constrained by the amount of other Tier I capital outstanding. Our ability to raise additional regulatory capital in this manner could be constrained in the

future, including due to the Basel Committee's proposed changes to capital adequacy regulations.

COMPOSITION OF TIER II CAPITAL

During the fiscal year ended March 31, 2011, the composition of our Tier II capital changed significantly as a result of our repurchases of upper Tier II and lower Tier II subordinated bonds. Our principal buybacks included ¥8.4 billion in aggregate principal amount (£63.2 million at the date of repurchase) of our Sterling Notes. We also repurchased ¥40.1 billion in aggregate principal amount which consists of €342.8 million of our Euro Notes, at the date of repurchase. While the repurchases reduced the amount of Tier II securities outstanding, we recorded a gain of ¥4.5 billion in connection with the repurchase of our Tier II bonds, including the Sterling Notes and the Euro Notes.

In September 2010, we completed an exchange offer for two series of foreign currency denominated subordinated bonds. We recorded a gain of approximately ¥3.0 billion in connection with the exchange offers in the fiscal year ended March 31, 2011.

The principal components of our Tier II capital are subordinated debt and bonds. As of March 31, 2013, we had ¥153.7 billion of subordinated bonds, ¥153.2 billion of which were issued by Shinsei and ¥92.0 billion of subordinated debt from private lenders, ¥17.0 billion of which were perpetual loans. None of our current Tier II capital consists of public funds. The other major element of our Tier II capital is the general reserve for loan losses.

Tier II capital is subject to the limitation that it cannot exceed the amount of Tier I capital, and non perpetual subordinated debt and bonds amortized on a straight line basis in the remaining five years before maturity cannot exceed half of the amount of Tier I capital. Subject to those ceilings, the entire amount of perpetual and non perpetual subordinated debt and bonds can be included in Tier II capital as of March 31, 2013. The table below sets forth the amount of our subordinated debt and bonds, as well as the portion included in our Tier II capital:

TABLE 41. SUBORDINATED DEBT AND BONDS (CONSOLIDATED)

Billions of yen

As of March 31, 2013	Perpetual ⁽¹⁾	Perpetual included in Tier II	Non perpetual ⁽¹⁾	Non perpetual included in Tier II ⁽²⁾	Total	Total included in Tier II ⁽²⁾
Subordinated debt	¥ 17.0	¥ 17.0	¥ 75.0	¥ —	¥ 92.0	¥ —
Subordinated bonds	12.3	12.3	141.3	—	153.7	—
Total	¥ 29.3	¥ 29.3	¥ 216.3	¥ 140.4	¥ 245.7	¥ 169.7

As of March 31, 2012	Perpetual ⁽¹⁾	Perpetual included in Tier II	Non perpetual ⁽¹⁾	Non perpetual included in Tier II ⁽²⁾	Total	Total included in Tier II ⁽²⁾
Subordinated debt	¥ 17.0	¥ 17.0	¥ 76.0	¥ —	¥ 93.0	¥ —
Subordinated bonds	11.7	11.7	133.9	—	145.7	—
Total	¥ 28.7	¥ 28.7	¥ 209.9	¥ 159.1	¥ 238.7	¥ 187.8

Notes: (1) Stated at par value.

(2) Non perpetual subordinated debt and bonds included in Tier II and total subordinated debt and bonds included in Tier II are not broken down by type of debt and bonds.

FINANCIAL CONDITION (continued)

Interest rates on ¥28.8 billion of our perpetual subordinated debt and bonds included in Tier II capital as of March 31, 2013 will increase between January 2013 and December 2015.

¥28.8 billion of our perpetual subordinated debt and bonds included in Tier II capital as of March 31, 2013 will become prepayable between January 2013 and December 2015. ¥0.5 billion of perpetual subordinated bonds are currently prepayable.

Interest rates on ¥2.0 billion of non perpetual subordinated debt as of March 31, 2013 will increase in September 2014. Interest rates on ¥5.0 billion of non perpetual subordinated debt as of March 31, 2013 has already increased due to step-up clause. Interest rates on the remaining ¥68.0 billion of non perpetual subordinated debt as of March 31, 2013 are fixed rates until maturity.

¥48.0 billion of non perpetual subordinated debt as of March 31, 2013 will become prepayable between June 2013 and September 2016.

Shinsei issued ¥50.0 billion of dated subordinated bonds for the first time as Shinsei, not LTCB, on March 25, 2005. These dated subordinated bonds cannot be repaid until maturity, on March 25, 2015, and bear interest at a fixed rate of 1.96%. Shinsei issued an additional ¥50.0 billion of dated subordinated bonds on October 31, 2005. These dated subordinated bonds cannot be repaid until maturity, on October 30, 2015, and bear interest at a fixed rate of 2.01%.

Shinsei issued €1.0 billion of step-up callable subordinated notes bearing interest at a fixed rate of 3.75% on February 23, 2006 (the Euro Notes). Interest rates on these notes were to be increased and the notes had an option to be prepayable, in February 2011. Although, on January 20, 2011, we decided to forego the call option for early redemption of these notes on the first callable date, February 23, 2011. The outstanding principal amount of the Euro Notes as of March 31, 2011 was €200 million.

In December 2009, Shinsei issued ¥5.0 billion of callable dated non perpetual subordinated bonds to retail investors bearing interest at a fixed rate of 3.4%. The maturity is December 28, 2017 and the bonds are redeemable at the principal amount prior to the maturity date, contingent upon approval by the FSA, on any coupon payment date falling on or after December 28, 2012.

In October 2012, Shinsei issued ¥6.4 billion of callable dated non perpetual subordinated bonds bearing interest at a fixed rate of 4.0%. The maturity is October 26, 2022 and the bonds are redeemable at the principal amount on October 26 2017, contingent upon approval by the FSA. In December 2012, Shinsei has called ¥5.0 billion of callable dated non perpetual subordinated bonds to retail investors.

OFF-BALANCE SHEET ARRANGEMENTS

We use off-balance sheet arrangements, including investments through special purpose entities, securitizations, lines and letters of credit, loan commitments and loan participations, in the ordinary course of business, including in our securitization and financing businesses, as well as to manage our own liquidity risk. The main purposes of such off-balance sheet arrangements are to develop our institutional banking business as well as to diversify our sources of liquidity. The following is a discussion of the principal off-balance sheet arrangements we use.

SECURITIZATION

We structure, arrange, distribute and service mortgage-backed securities and asset-backed securities both for third-parties and ourselves. Our securitization services utilize special purpose entities, which may be organized in the form of trusts, partnerships or corporations, mainly to protect the securitized assets from creditors of transferors even in bankruptcy. Assets securitized include commercial loans, residential mortgage loans, installment receivables and lease receivables.

REPACKAGING

One aspect of our securitization business involves our repackaging of assets purchased by special purpose entities that we establish into new financial instruments that represent undivided interests in the underlying assets. Repackaging the assets generally entails analyzing the cash flows from the underlying assets, using various means to rearrange the timing and order of cash flows, and then combining them with other cash flows to create new financial instruments that can be tailored to meet the demands of a broad range of investors.

Often the assets are repackaged into residual or subordinated interests, mezzanine interests and senior interests. The residual interests are the first to suffer any losses as a result of any decline in the value of the underlying financial assets, while the senior interests are structured to be the last to absorb such losses. In instances where we repackage assets on our own initiative, rather than for our customers, we generally retain the residual interests and either sell the senior or mezzanine interests immediately to third-parties or hold them temporarily before placing them with investors. Revenues on these transactions consist of gains on sales of the repackaged senior and mezzanine interests, transaction arrangement fees received from the originators of the assets, fees for underwriting the senior instruments, and returns on the residual interests.

The principal risk inherent in these repackagings is credit risk on the securitized financial instruments that is absorbed by the retained residual interests. We may record losses on the

FINANCIAL CONDITION (continued)

residual interests due to declines in the value of the underlying financial assets. We manage this credit risk through quarterly assessing our retained interests and providing valuation allowances for them based on those assessments, taking into consideration how much we believe we will be able to collect on the underlying assets. We generally transfer financial assets to special purpose entities on a "true sale" basis, which means that we would neither be entitled nor required to reacquire the financial assets so transferred.

ARRANGEMENT

We also securitize customers' assets on their behalf, drawing on our know-how and experience in establishing securitization vehicles tailored to accommodate clients' needs, analyzing cash flows from the financial assets, structuring them into classes of securitized interests, arranging credit enhancements and locating investors for the securities to be issued. We generally place the securities representing the senior interests from these transactions with third-party investors. We may choose, however, to acquire temporarily a portion of these senior securities for later sale and often structure financial arrangements, including repackaging, that enhance the liquidity of these senior securities in order to attract third-party investors. These securities are recorded in other monetary claims purchased and recorded at fair value.

Our revenue on these transactions consists of fees, generally fixed, for arranging the transaction and for underwriting the sale of the financial instruments. We typically record those fees as having been received at the completion of all arrangements for the customer.

On these transactions, we act as an arranger, an underwriter, a servicer, a trustee or an administrator, or combination of some of these roles, for our corporate customers. As our customers usually retain the residual interests and the related risk of loss on them, we are not exposed to risks of incurring losses inherent in such residual interests.

As of March 31, 2013 and 2012, we held ¥51.5 billion and ¥42.9 billion, respectively, of debt securities and residual interests from securitization transactions.

LOAN PARTICIPATIONS

We have sold or transferred participation interests in certain of our loans. Loan participation involves the original lender transferring economic interests in the loan to others, while the original lender retains title to the loan itself.

Under Japanese GAAP, where substantially all of the economic interest in and risks of the loans are transferred to the participants, the original lenders are not deemed to bear recourse obligations for the participating interests or to have any rights to repurchase such interests. As a result, the original

lender may remove the loans from its balance sheet as if the loans were sold to the participants. Because substantially all of the economic interest and risks have been transferred to the participants, we believe that we are not taking any substantial economic risk on the portions of loans in which we have sold participating interests.

As of March 31, 2013 and 2012, the total principal amount of participation interests in loans transferred to third-parties removed from the loan account was ¥16.2 billion and ¥18.4 billion, respectively.

OFF-BALANCE SHEET ARRANGEMENTS TO EXTEND CREDIT, ACCEPTANCES AND GUARANTEES

We have off-balance sheet commitments to extend credit to customers up to certain predetermined amounts at current market rates, in consideration of which we receive fee income that is recorded on an accrual basis for the period of the commitments. The unfunded amounts of these commitments and established credit line of overdrafts were ¥3,802.0 billion and ¥4,026.2 billion as of March 31, 2013 and 2012, out of which the accounts with original agreement terms of less than one year or which were cancelable, were ¥3,636.3 billion and ¥3,806.5 billion as of March 31, 2013 and 2012, respectively.

In addition, we provide acceptances and guarantees, which include lines and letters of credit and guarantees on customers' borrowings from other creditors. These acceptances and guarantees require us to satisfy our customers' obligations in the event they fail to do so, although we would have a claim for reimbursement against them. Under Japanese GAAP for banks, these acceptances and guarantees are deemed to be both contingent assets and liabilities, and are recorded as both assets and liabilities in the principal amount of the acceptances and guarantees. We record the fees we earn from providing acceptances and guarantees on an accrual basis over the period of the acceptance or guarantee. As of March 31, 2013 and 2012, we had ¥511.0 billion and ¥562.6 billion, respectively, of outstanding acceptances and guarantees.

APLUS FINANCIAL extends credit in the form of guarantees. The most significant component of APLUS FINANCIAL's guarantee business is providing guarantees on installment shopping credit provided by other lenders to customers of APLUS FINANCIAL's partner merchants. APLUS FINANCIAL also offers collection guarantees for foreign automobile dealers. Off-balance sheet commitments and acceptances and guarantees increased as a result of our acquisition of APLUS FINANCIAL and the consolidation from September 30, 2004. As of March 31, 2013 and 2012, ¥495.0 billion and ¥548.1 billion of our outstanding acceptances or guarantees, respectively, were attributable to this guarantee business.

EXPOSURE TO SECURITIZED PRODUCTS AND RELATED INVESTMENTS

EXPOSURE TO SECURITIZED PRODUCTS AND RELATED INVESTMENTS

Tables 42 through 45 below set forth certain information regarding our exposure to securitized products and related investments

as of March 31, 2012, as of September 30, 2012 and as of and for the fiscal year ended March 31, 2013. Table 46 provides definitions for the defined terms used in Tables 42 through 45.

Notes: (1) Represents transactions under both banking book and trading book. The above table is based on provisional financial and operational data at the time of the financial results announcement and may differ slightly from the final data.

(2) Transactions which are netted with buy and sell.

EXPOSURE TO SECURITIZED PRODUCTS AND RELATED INVESTMENTS (continued)

TABLE 46. DEFINED TERMS FOR TABLES 42-45

Names	Definitions
RMBS	Residential mortgage-backed securities and other related assets, including beneficial interests backed by mortgage loans. Recorded in "trading securities," "securities available-for-sale" and "other monetary claims."
CMBS	Commercial mortgage-backed securities. Recorded in "securities available-for-sale" and "other monetary claims."
CLO	Collateralized loan obligations (CLO) mainly backed by LBO debt, corporate loans and high-yield securities. Recorded in "trading securities," "securities being held to maturity with readily determinable fair value," and "securities available-for-sale."
ABS CDO (Re-securitized Products)	CDO backed by asset-backed securities (ABS) such as RMBS. Recorded in "securities available-for-sale" and "other monetary claims."
LBO	Loans for leveraged buyout for acquisition finance including refinancing of past acquisitions.
Monoline	Monolines are insurance companies that insure against the risk of a bond or other security defaulting.
SIV	A structured investment vehicle (SIV) is a fund which borrows money by issuing short-term securities at low interest rates, then lends that money by buying long-term securities (such as securitization products) at higher interest rates, making a profit for investors from the difference.
ABCP	An asset-backed commercial paper (ABCP) conduit is a limited-purpose entity that issues CP to finance the purchase of assets or to make loans. Some asset types include receivables generated from trade, credit card, auto loan, auto, and equipment leasing obligors, as well as collateralized loan obligations (CLOs) and collateralized bond obligations (CBOs).
CDS	Credit default swap is a type of derivative in which the buyer receives credit protection by making periodic payments to a counterparty and the seller provides credit protection by giving the promise of a payoff if a third-party defaults.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Shinsei Bank, Limited, and its Consolidated Subsidiaries
For the fiscal years ended March 31, 2013 and 2012

1. BASIS OF PRESENTATION OF CONSOLIDATED FINANCIAL STATEMENTS

CONSOLIDATED

The accompanying consolidated financial statements of Shinsei Bank, Limited (the "Bank") and its consolidated subsidiaries (collectively, the "Group"), stated in Japanese yen, have been prepared on the basis of generally accepted accounting principles in Japan ("Japanese GAAP") and in accordance with the Banking Act of Japan (the "Banking Act"), and compiled from the consolidated financial statements prepared under the provisions set forth in the Financial Instruments and Exchange Act of Japan, which are different in certain respects as to application and disclosure requirements of International Financial Reporting Standards.

Certain reclassifications and rearrangements have been made to the consolidated financial statements issued domestically in order to present them in a form which is more familiar to readers outside Japan. In addition, the accompanying notes include information that is not required under Japanese GAAP, but is presented herein for the convenience of readers.

The preparation of consolidated financial statements in conformity with Japanese GAAP requires management to make estimates and assumptions that affect the reported amounts of

assets and liabilities and disclosures of contingent liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

As permitted by the Financial Instruments and Exchange Act of Japan, yen amounts, except for per share amounts, are presented in millions of yen and are rounded down to the nearest million. As a result, the totals do not necessarily agree with the sum of the individual amounts.

The consolidated financial statements are stated in Japanese yen, the currency of the country in which the Bank is incorporated and operates. The translations of Japanese yen amounts into U.S. dollar amounts are included solely for the convenience of readers outside Japan and have been made at the rate of ¥94.03 to U.S.\$1.00, the rate of exchange prevailing on the Tokyo foreign exchange market on March 31, 2013. Such translations should not be construed as representations that the Japanese yen amounts could be converted into U.S. dollars at that or any other rate.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

CONSOLIDATED

(A) PRINCIPLES OF CONSOLIDATION

The Group applies its consolidation scope using the control and influence concept. Under the control and influence concept, those companies in which the Bank, directly or indirectly, is able to exercise control over operations are fully consolidated and those companies in which the Bank, directly or indirectly, is able to exercise significant influence over operations are accounted for by the equity method.

The numbers of subsidiaries and affiliates as of March 31, 2013 and 2012 were as follows:

	2013	2012
Consolidated subsidiaries	186	133
Unconsolidated subsidiaries	83	80
Affiliates accounted for by the equity method	15	15
Affiliates accounted for not applying the equity method	0	1

Unconsolidated subsidiaries are primarily operating companies that undertake leasing business based on the Tokumei Kumiai system (silent partnerships). Tokumei Kumiai's assets, profit and loss virtually belong to each silent partner but not to the operation companies, and the Group does not have any material transactions with these subsidiaries. Therefore, these subsidiaries are excluded from consolidation in order to avoid any material misunderstanding by the Bank's stakeholders.

Other unconsolidated subsidiaries are excluded from consolidation because they are immaterial to the financial condition

or results of operations of the Group.

Major consolidated subsidiaries as of March 31, 2013 were as listed below:

Name	Location	Percentage ownership
APLUS FINANCIAL Co., Ltd.	Japan	95.0%
Showa Leasing Co., Ltd.	Japan	97.8%
Shinsei Financial Co., Ltd.	Japan	100.0%
SHINKI Co., Ltd.	Japan	100.0%
Shinsei Trust & Banking Co., Ltd.	Japan	100.0%
Shinsei Securities Co., Ltd.	Japan	100.0%

All significant inter-company transactions, related account balances and unrealized gains have been eliminated in consolidation. As of March 31, 2013, the fiscal year ending dates are March 31 for 140 subsidiaries, July 31 for 3 subsidiaries, September 30 for 2 subsidiaries, November 30 for 1 subsidiary, December 31 for 36 subsidiaries, January 31 for 1 subsidiary and February 28 for 3 subsidiaries. Except for 9 subsidiaries which are consolidated as of March 31 rather than their fiscal year ends, those consolidated subsidiaries whose fiscal years end at dates other than March 31 are consolidated using their fiscal year end financial statements with appropriate adjustments made for significant transactions that occurred during the period from the ending dates of their fiscal years to the date of the Group's consolidated financial statements.

Major affiliates accounted for by the equity method as of March 31, 2013 were as listed below:

CONSOLIDATED

Name	Location	Percentage ownership
Comox Holdings Ltd.	Bermuda	49.9%
Jih Sun Financial Holding Co., Ltd.	Taiwan	35.5%

(B) BUSINESS COMBINATIONS

In October 2003, the Business Accounting Council (the "BAC") issued a Statement of Opinion, "Accounting for Business Combinations," and in December 2005, the Accounting Standards Board of Japan (the "ASBJ") issued ASBJ Statement No.7, "Accounting Standard for Business Divestitures" and ASBJ Guidance No.10, "Guidance for Accounting Standard for Business Combinations and Business Divestitures." The accounting standard for business combinations allowed companies to apply the pooling of interests method of accounting only when certain specific criteria are met such that the business combination is essentially regarded as a uniting-of-interests. For business combinations that do not meet the uniting-of-interests criteria, the business combination is considered to be an acquisition and the purchase method of accounting is required. This standard also prescribes the accounting for combinations of entities under common control and for joint ventures.

In December 2008, the ASBJ issued a revised accounting standard for business combinations, ASBJ Statement No. 21, "Accounting Standard for Business Combinations." Major accounting changes under the revised accounting standard are as follows: (i) The revised standard requires accounting for business combinations only by the purchase method. As a result, the pooling of interests method of accounting is no longer allowed. (ii) The previous accounting standard provided for a bargain purchase gain (negative goodwill) to be systematically amortized over a period not exceeding 20 years. Under the revised standard, the acquirer recognizes the bargain purchase gain in profit or loss immediately on the acquisition date after reassessing and confirming that all of the assets acquired and all of the liabilities assumed have been identified after a review of the procedures used in the purchase price allocation. The revised standard was applicable to business combinations undertaken on or after April 1, 2010.

Under the previous standard, the Group accounted for the acquisitions of APLUS FINANCIAL Co., Ltd. ("APLUS FINANCIAL"), Showa Leasing Co., Ltd. ("Showa Leasing"), SHINKI Co., Ltd. ("SHINKI"), Shinsei Financial Co., Ltd. ("Shinsei Financial") and their consolidated subsidiaries by the purchase method of accounting.

(C) GOODWILL AND INTANGIBLE ASSETS ACQUIRED IN BUSINESS COMBINATIONS

The Bank recognized certain identifiable intangible assets in connection with the acquisition of Showa Leasing, Shinsei Financial and their consolidated subsidiaries, because they were separable such as contractual or other legal rights.

The identified intangible assets with amortization method and period are as listed below:

Showa Leasing

Identified intangible assets	Amortization method	Amortization period
Trade name and trademark	Straight-line	10 years
Customer relationship	Sum-of-the-years digits	20 years
Sublease contracts	Straight-line	Subject to the remaining contract years

Shinsei Financial

Identified intangible assets	Amortization method	Amortization period
Trade names and trademarks	Straight-line	10 years
Customer relationship	Sum-of-the-years digits	10 years

The excess of the purchase price over the fair value of the net assets acquired, including identified intangible assets, was recorded as goodwill and is being amortized on a consistent basis primarily over 20 years. The amortization period of 20 years is the maximum period allowed under Japanese GAAP and was determined based upon the Bank's business strategy.

With regard to the acquisitions undertaken before April 1, 2010, accounted for under the previous accounting standard, when the purchase price was lower than the fair value of the net assets acquired, including identified intangible assets, the difference is recorded as negative goodwill and primarily amortized on a straight-line basis over 20 years, which is the maximum period allowed under the previous accounting standard.

(D) IMPAIRMENT OF GOODWILL AND INTANGIBLE ASSETS ACQUIRED IN BUSINESS COMBINATIONS

The Bank conducts impairment testing for goodwill and intangible assets acquired in business combinations as a result of certain triggering events including:

- An expectation of an operating loss or negative cash flow for two consecutive years;
- Impairment of underlying investment securities is recognized;
- A significant adverse change in the environment surrounding the business operations of the subsidiary, such as a change in law which significantly impacts the business in a negative way;

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

- Management decisions that could have an adverse effect on the value of goodwill and intangible assets acquired in business combinations.

As the first step of the impairment test, we estimate the undiscounted future cash flows of the business. If the value of the undiscounted future cash flows is less than the book value of the net assets, including goodwill and intangible assets acquired in business combinations, of the business, it is determined that impairment exists and the next step of the impairment test is performed to measure the amount of the impairment loss.

The next step of the impairment test compares the "value in use," which is calculated as the discounted value of future cash flows of the business, and the net asset book value which includes unamortized balances of goodwill and intangible assets acquired in business combinations. (i) Impairment loss for the total of goodwill and intangible assets acquired in business combinations, is recognized as an amount by which the net asset book value exceeds the "value in use." The fair value of intangible assets acquired in business combinations is determined in the same manner used to apply purchase accounting at the time of the initial acquisition, and (ii) the impairment loss on intangible assets acquired in business combinations, is determined as the difference between the fair value and book value. Finally, the impairment loss on goodwill is calculated as the residual calculated as (i) less (ii) above.

(E) TRANSLATION OF FOREIGN CURRENCY FINANCIAL STATEMENTS AND TRANSACTIONS

- The financial statements of consolidated foreign subsidiaries are translated into Japanese yen at exchange rates as of their respective balance sheet dates, except for equity, which is translated at historical exchange rates. Differences arising from such translation are shown as "Foreign currency translation adjustments" under accumulated other comprehensive income in a separate component of equity in the accompanying consolidated balance sheets.
- Foreign currency accounts held by consolidated foreign subsidiaries are translated into the currency of the subsidiary at exchange rates as of their respective balance sheet dates.
- Foreign currency-denominated assets and liabilities of the Bank and consolidated domestic subsidiaries are translated into Japanese yen at exchange rates as of their respective balance sheet dates, except for investments in unconsolidated subsidiaries and affiliates which are translated at the relevant historical exchange rates.

(F) CASH AND CASH EQUIVALENTS

Cash and cash equivalents consist of cash on hand and non-interest-bearing deposits.

(G) OTHER MONETARY CLAIMS PURCHASED

The components of other monetary claims purchased are principally loans held for trading purposes. Other monetary claims purchased held for trading purposes are recorded at fair value and unrealized gains and losses are recorded in other business income (loss), net.

(H) VALUATION OF TRADING ACCOUNT ACTIVITIES

Trading account positions entered into to generate gains arising from short-term changes in interest rates, currency exchange rates or market prices of financial instruments and other market-related indices, or from price differences among markets, are included in trading assets and trading liabilities on a trade-date basis.

Trading securities and monetary claims purchased for trading purposes are stated at market value and derivative financial instruments related to trading positions are stated at fair value based on estimated amounts that would be settled in cash if such positions were terminated at the end of the fiscal year, which reflects liquidity and credit risks.

Trading income and trading loss include interest received and paid during the fiscal year and unrealized gains and losses resulting from the change in the value of securities, monetary claims purchased, and derivatives between the beginning and end of the fiscal year.

(I) MONETARY ASSETS HELD IN TRUST

The components of trust assets are accounted for based on the accounting standards appropriate for each asset type. Instruments held in trust for trading purposes are recorded at fair value and unrealized gains and losses are recorded in other business income (loss), net. Instruments held in trust classified as available-for-sale are recorded at fair value with the corresponding unrealized gains and losses recorded directly in a separate component of equity.

Instruments held in trust classified as available-for-sale for which fair value cannot be reliably determined are carried at cost.

(J) SECURITIES

Securities other than investments in unconsolidated subsidiaries and affiliates are classified into three categories, based principally on the Group's intent, as follows:

Trading securities are securities held in anticipation of gains arising from short-term changes in market value and/or held for resale to customers. Trading securities are carried at fair value with corresponding unrealized gains and losses recorded in income (loss).

Securities being held to maturity are debt securities for which the Group has both the positive intent and ability to hold until maturity. Securities being held to maturity are carried at

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

CONSOLIDATED

amortized cost determined by the moving average method.

Securities available for sale are securities other than trading securities and securities being held to maturity. Securities available for sale are carried at fair value with the corresponding unrealized gains and losses, net of applicable taxes, recorded directly in a separate component of equity. The cost of these securities upon sale is determined by the moving average method. Securities available for sale for which fair value cannot be reliably determined are carried at cost determined by the moving average method.

In addition, investments in unconsolidated subsidiaries and affiliates that are not accounted for by the equity method are carried at cost determined by the moving average method.

Individual securities, other than trading securities, are written down when a decline in fair value below the cost of such securities is deemed to be other than temporary.

(K) PREMISES AND EQUIPMENT

Premises and equipment are stated at cost less accumulated depreciation.

Depreciation of the Group's buildings and the Bank's computer equipment (including ATMs) other than personal computers is computed principally using the straight-line method, and depreciation of other equipment is computed principally using the declining-balance method. Principal estimated useful lives of buildings and equipment as of March 31, 2013 were as follows:

Buildings 3 years to 50 years

Equipment 2 years to 20 years

Effective April 1, 2012, the Group applied the depreciation method based on the revised Corporation Tax Act to premises and equipment acquired on or after April 1, 2012 in accordance with the amendment of the Corporation Tax Act. The effect of this application on the consolidated statement of income for the fiscal year ended March 31, 2013 was immaterial.

(L) SOFTWARE

Capitalized software for internal use is depreciated using the straight-line method based on the Group's estimated useful lives (primarily 5 years).

(M) IMPAIRMENT OF LONG-LIVED ASSETS

Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset or asset group may not be recoverable. An impairment loss is recognized if the carrying amount of an asset or asset group exceeds the sum of the undiscounted future cash flows expected to result from the continued use and eventual disposition of an asset or asset group. The impairment loss is measured as the amount by which the carrying amount of the asset exceeds its recoverable amount, which is the higher of

the discounted cash flows from the continued use and eventual disposition of the asset or the net selling price at disposition.

(N) DEFERRED CHARGES

Deferred issuance expenses for debentures and corporate bonds are amortized using the straight-line method over the term of the debentures and corporate bonds.

(O) RESERVE FOR CREDIT LOSSES

The reserve for credit losses of the Bank and the consolidated domestic trust and banking subsidiary has been established as described below based on the Bank's internal rules for establishing the reserve.

For claims to obligors who are legally bankrupt due to bankruptcy, special liquidation proceedings or similar legal proceedings ("legally bankrupt obligors") or to obligors who are effectively in similar conditions ("virtually bankrupt obligors"), a specific reserve is provided based on the amount of claims, after the charge-off stated below, net of amounts expected to be collected through the disposal of collateral or execution of guarantees.

For claims to obligors who are not yet bankrupt but are in financial difficulties and are very likely to go bankrupt in the future ("possibly bankrupt obligors"), except for claims to obligors with larger claims than a predetermined amount, a specific reserve is provided for the amount considered to be necessary based on an overall solvency assessment performed for the amount of claims net of amounts expected to be collected through the disposal of collateral or execution of guarantees.

With regard to claims to possibly bankrupt obligors, restructured loans and certain claims for which the reserve has been provided based on the discounted cash flow method (as mentioned below) in previous fiscal years, provided that obligors' cash flows for debt service are reasonably estimable and the balance of claims to such obligors are at or larger than a predetermined amount, the reserve for credit losses is determined as the difference between (i) relevant estimated cash flows discounted by the original contractual interest rate and (ii) the book value of the claim (discounted cash flow method). In case where it is difficult to reasonably estimate future cash flows, the reserve is provided based on expected loss amount for the remaining term of respective claims.

For other claims, a general reserve is provided based on historical loan loss experience.

For specific foreign claims, there is a reserve for loans to restructuring countries which has been provided based on losses estimated by considering the political and economic conditions in those countries.

All claims are assessed by business divisions based on the predetermined internal rules for self-assessment of asset quality. The Credit Assessment Division, which is independent from

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

CONSOLIDATED

business divisions, conducts verifications of these assessments, and additional reserves may be provided based on the verification results.

The consolidated subsidiaries other than the domestic trust and banking subsidiary calculate the general reserve for general claims based on the actual historical loss ratio, and the specific reserve for claims to possibly bankrupt obligors, virtually bankrupt obligors and legally bankrupt obligors based on estimated losses, considering the recoverable value.

For collateralized or guaranteed claims of the Bank and certain consolidated subsidiaries to legally bankrupt obligors or virtually bankrupt obligors, the amount of claims exceeding the estimated value of collateral or guarantees, which is deemed uncollectible, has been charged off and totaled ¥155,879 million (U.S.\$1,657,762 thousand) and ¥165,992 million as of March 31, 2013 and 2012, respectively.

(P) ACCRUED BONUSES FOR EMPLOYEES AND DIRECTORS

Accrued bonuses for employees and directors are provided in the amount of the estimated bonuses which are attributable to each fiscal year.

(Q) RESERVE FOR EMPLOYEES' RETIREMENT BENEFITS

The Bank, APLUS FINANCIAL and Showa Leasing each have a noncontributory defined benefit pension plan, and Shinsei Financial and certain of the other consolidated domestic subsidiaries have unfunded severance indemnity plans, which cover substantially all of the Group's employees. The reserve for employees' retirement benefits is provided for the payment of employees' retirement benefits based on the estimated amounts of the projected benefit obligation and the estimated value of pension plan assets at the end of the fiscal year. Net actuarial gains and losses and prior service costs are amortized using the straight-line method over the average remaining service period primarily from the fiscal year of occurrence.

Effective April 1, 2000, the Bank adopted a new accounting standard for employees' retirement benefits and accounts for the liabilities for retirement benefits based on the projected benefit obligations and plan assets at the balance sheet date. The transitional unrecognized net retirement benefit obligation for the Bank of ¥9,081 million is being amortized using the straight-line method over 15 years.

(R) RESERVE FOR DIRECTORS' RETIREMENT BENEFITS

Retirement allowances for directors and statutory auditors are recorded to state the liability at the amount that would be required if all directors and statutory auditors retired at each balance sheet date.

(S) RESERVE FOR LOSSES ON INTEREST REPAYMENTS

The reserve for losses on interest repayments is provided for estimated losses on reimbursements of excess interest payments and loan losses related to consumer finance loans extended at interest rates in excess of the maximum interest rate prescribed in the Interest Rate Restriction Act of Japan. The reserve is established in the amount of the estimated future reimbursement requests based on past experience.

In addition, a reserve for losses on interest repayments of Shinsei Financial is calculated considering the terms stipulated in the share transfer agreement entered into by and between the Bank and the seller, GE Japan Holdings Co., Ltd. ("GE"), for the acquisition of Shinsei Financial, under which the sharing of interest repayment costs between the Bank and GE is determined.

(T) RESERVE UNDER SPECIAL LAW

The reserve under special law is provided for contingent liabilities from brokering of securities transactions in accordance with Paragraph 1 of Article 46-5 of the Financial Instruments and Exchange Act of Japan.

(U) ASSET RETIREMENT OBLIGATIONS

In March 2008, the ASBJ published the accounting standard for asset retirement obligations, ASBJ Statement No.18 "Accounting Standard for Asset Retirement Obligations" and ASBJ Guidance No. 21 "Guidance on Accounting Standard for Asset Retirement Obligations."

Under this accounting standard, an asset retirement obligation is defined as a legal obligation imposed either by law or contract that results from the acquisition, construction, development and the normal operation of a tangible fixed asset and is associated with the retirement of such tangible fixed asset.

The asset retirement obligation is recognized as the sum of the discounted cash flows required for the future asset retirement and is recorded in the period in which the obligation is incurred. Upon initial recognition of a liability for an asset retirement obligation, an asset retirement cost is capitalized by increasing the carrying amount of the related fixed asset by the amount of the liability.

The asset retirement cost is subsequently allocated to expense through depreciation over the remaining useful life of the asset. Over time, the liability is accreted to its present value each period. Any subsequent revisions to the timing or the amount of the original estimate of undiscounted cash flows are reflected as an adjustment to the carrying amount of the liability and the capitalized amount of the related asset retirement cost.

This standard was effective for fiscal years beginning on or after April 1, 2010. The Group applied this accounting standard effective April 1, 2010.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

CONSOLIDATED

(V) STOCK OPTIONS

In December 2005, the ASBJ issued ASBJ Statement No. 8, "Accounting Standard for Stock Options" and related guidance. The new standard and guidance are applicable to stock options newly granted on and after May 1, 2006. This standard requires companies to measure the cost of employee stock options based on the fair value at the date of grant and recognize compensation expense over the vesting period as consideration for receiving goods or services. In the consolidated balance sheet, the stock option is presented as a stock acquisition right as a separate component of equity until exercised.

(W) LEASE TRANSACTIONS

In March 2007, the ASBJ issued ASBJ Statement No.13, "Accounting Standard for Lease Transactions," which revised the previous accounting standard for lease transactions.

Effective April 1, 2008, the Bank and its consolidated subsidiaries applied the revised accounting standard for lease transactions.

(As lessee)

Under the previous accounting standard, finance leases that were deemed to transfer ownership of the leased property to the lessee were capitalized. However, other finance leases were permitted to be accounted for as operating lease transactions if certain "as if capitalized" information was disclosed in the note to the lessee's financial statements. The revised accounting standard requires that all finance lease transactions be capitalized by recognizing lease assets and lease obligations in the consolidated balance sheets.

Depreciation of lease assets from finance lease transactions that do not deem to transfer ownership of the lease property to the lessee is computed using the straight-line method over the leasing period. Residual values of lease assets are the guaranteed value determined in the lease contracts or zero for assets without such guaranteed value.

With regard to finance lease transactions entered into prior to April 1, 2008, that do not deem to transfer ownership of the leased property to the lessee, lease assets are recognized at the amount of lease obligations as of March 31, 2008.

(As lessor)

Under the previous accounting standard, finance leases that were deemed to transfer ownership of the leased property to the lessee were treated as sales. However, other finance leases were permitted to be accounted for as operating lease transactions if certain "as if sold" information was disclosed in the note to the lessor's financial statements. The revised accounting standard requires that all finance leases that are deemed to transfer ownership of the leased property to the lessee be recognized as lease receivables, and that all finance

leases that are not deemed to transfer ownership of the leased property to the lessee be recognized as leased investment assets.

In addition, depreciation of tangible leased assets as lessor for operating lease transactions is computed using the straight-line method over the leasing period assuming that residual values are the disposal price estimable at the end of the estimated leasing period.

Net income on each finance lease transaction is calculated on the basis of the internal rate of return of each transaction.

With regard to finance lease transactions entered into prior to April 1, 2008, that do not deem to transfer ownership of the leased property to the lessee, leased investment assets are recognized at the amount of book values of those leased properties as of March 31, 2008.

As a result of this transitional treatment, income before income taxes and minority interests increased by ¥1,009 million (U.S.\$10,731 thousand) and ¥1,974 million for the fiscal years ended March 31, 2013 and 2012, respectively, as compared to what would have been reported if the revised accounting standard was applied retroactively to all finance lease transactions as lessor.

(X) INSTALLMENT SALES FINANCE AND CREDIT GUARANTEES

Fees from installment sales finance have principally been prorated over the respective installment periods by using the sum-of-the-months digits method, or by using the credit-balance method.

Fees from credit guarantees have been recognized either by the sum-of-the-months digits method, the straight-line method or the credit-balance method over the contract terms.

(Y) REVENUE RECOGNITION FOR INTEREST ON CONSUMER LENDING BUSINESS

Consolidated subsidiaries specialized in the consumer lending business accrued interest income at the balance sheet date at the lower of the amount determined by using a rate permissible under the Interest Rate Restriction Act of Japan or the amount determined by using rates on contracts with customers.

(Z) INCOME TAXES

Deferred income taxes relating to temporary differences between financial reporting and tax bases of assets and liabilities and tax loss carryforwards have been recognized. The asset and liability approach is used to recognize deferred income taxes.

The Bank files its corporate income tax return under the consolidated corporate tax system, which allows companies to base tax payments on the combined profits and losses of the Bank and its wholly-owned domestic subsidiaries.

A valuation allowance is recognized for any portion of the deferred tax assets where it is considered more likely than not that it will not be realized.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

CONSOLIDATED

(AA) DERIVATIVES AND HEDGE ACCOUNTING

Derivatives are stated at fair value. Derivative transactions that meet the hedge accounting criteria are primarily accounted for using the deferral method whereby unrealized gains and losses are deferred in a separate component of equity until the gains and losses on the hedged items are realized.

(a) Hedge of interest rate risks

Derivative transactions that meet the hedge accounting criteria for mitigating interest rate risks of the Bank's financial assets and liabilities are accounted for using the deferral method. The Bank adopted portfolio hedging to determine the effectiveness of its hedging instruments in accordance with Industry Audit Committee Report No. 24 of the Japanese Institute of Certified Public Accountants (JICPA). Under portfolio hedging activities to mitigate the change in fair value, a portfolio of hedged items with common maturities such as deposits or loans is designated and matched with a group of hedging instruments such as interest rate swaps, which offset the effect of fair value fluctuations of the hedged items by identified maturities. The effectiveness of the portfolio hedging is assessed by each group.

As for portfolio hedging activities to fix cash flows, the effectiveness is assessed based on the correlation between the base interest rate index of the hedged cash flow and that of the hedging instrument.

The interest rate swaps of certain consolidated subsidiaries which qualify for hedge accounting and meet specific matching criteria are not measured at fair value, but the net payments or receipts under the swap agreements are recognized and included in interest expenses or income.

(b) Hedge of foreign exchange fluctuation risks

The Bank applies either deferral hedge accounting or fair value hedge accounting in accordance with Industry Audit Committee Report No. 25 of the JICPA to the derivative transactions that meet the hedge accounting criteria for mitigating foreign currency fluctuation risks of the Bank's financial assets and liabilities.

Fund swap transactions are foreign exchange swaps, and consist of spot foreign exchange contracts bought or sold and forward foreign exchange contracts sold or bought. Such transactions are contracted for the purpose of lending or borrowing in a different currency and converting the corresponding principal equivalents and foreign currency equivalents to pay and receive, whose amounts and due dates are predetermined at the time of the transactions, into forward foreign exchange contracts sold or bought.

Under deferral hedge accounting, hedged items are identified by grouping the foreign currency-denominated financial assets and liabilities by currencies and designating

derivative transactions such as currency swap transactions, fund swap transactions and forward exchange contracts as hedging instruments. Hedge effectiveness is reviewed by comparing the total foreign currency position of the hedged items and hedging instruments by currency.

The Bank also applies deferral hedge accounting and fair value hedge accounting to translation gains or losses from foreign currency assets of net investments in foreign unconsolidated subsidiaries, affiliates and securities available for sale (other than bonds denominated in foreign currencies) when such foreign currency exposures recorded as assets are hedged with offsetting foreign currency liabilities and the liabilities equal or exceed the acquisition cost of such foreign currency assets.

(c) Inter-company and intra-company derivative transactions

Gains and losses on inter-company and intra-company derivative hedging transactions between the trading book and the banking book are not eliminated since offsetting transactions with third parties are appropriately entered into in conformity with the nonarbitrary and strict hedging policy in accordance with Industry Audit Committee Reports No. 24 and No. 25 of the JICPA. As a result, in the banking book, realized gains and losses on such inter-company and intra-company transactions are reported in current earnings and valuation gains and losses which meet the hedge accounting criteria are deferred. On the other hand, in the trading book, realized gains and losses and valuation gains and losses on such inter-company and intra-company transactions are substantially offset with covering contracts entered into with third parties.

(AB) PER SHARE INFORMATION

Basic net income (loss) per common share calculations represent net income (loss) available to common shareholders, divided by the weighted average number of outstanding shares of common stock during the respective fiscal year, retroactively adjusted for stock splits and reverse stock splits.

Diluted net income per common share calculations consider the dilutive effect of common stock equivalents, which include stock acquisition rights, assuming that stock acquisition rights were fully exercised at the time of issuance for those issued during the fiscal year and at the beginning of the fiscal year for those previously issued and outstanding at the beginning of the fiscal year.

(AC) ACCOUNTING CHANGES AND ERROR CORRECTIONS

In December 2009, the ASBJ issued ASBJ Statement No.24 "Accounting Standard for Accounting Changes and Error Corrections" and ASBJ Guidance No.24 "Guidance on Accounting Standard for Accounting Changes and Error Corrections." Accounting treatments under this standard and guidance are as follows:

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

CONSOLIDATED

(a) Changes in Accounting Policies

When a new accounting policy is applied following revision of an accounting standard, the new policy is applied retrospectively unless the revised accounting standard includes specific transitional provisions, in which case the entity shall comply with the specific transitional provisions.

(b) Changes in Presentation

When the presentation of financial statements is changed, prior-period financial statements are reclassified in accordance with the new presentation.

(c) Changes in Accounting Estimates

A change in an accounting estimate is accounted for in the period of the change if the change affects that period only, and is accounted for prospectively if the change affects both the period of the change and future periods.

(d) Corrections of Prior-Period Errors

When an error in prior-period financial statements is discovered, those statements are restated.

(AD) NEW ACCOUNTING PRONOUNCEMENTS*Accounting Standard for Retirement Benefits*

In May 2012, the ASBJ issued ASBJ Statement No. 26 "Accounting Standard for Retirement Benefits" and ASBJ Guidance No. 25 "Guidance on Accounting Standard for Retirement Benefits," which replaced the Accounting Standard for Retirement Benefits that had been issued by BAC in 1998 with an effective date of April 1, 2000 and the other related practical guidance and followed by partial amendments from time to time through 2009. Major changes are as follows:

(a) Treatment in the balance sheet

Under the current requirements, actuarial gains and losses and past service costs that are yet to be recognized in profit or loss are not recognized in the balance sheet, and the difference between retirement benefit obligations and plan assets (hereinafter, "deficit or surplus"), adjusted by such unrecognized amounts, is recognized as a liability or asset.

Under the revised accounting standard, actuarial gains and losses and past service costs that are yet to be recognized in profit or loss shall be recognized under accumulated other comprehensive income in a separate component of

equity, after adjusting for tax effects, and any resulting deficit or surplus shall be recognized as a liability (liability for retirement benefits) or asset (asset for retirement benefits).

(b) Treatment in the statement of income and the statement of comprehensive income

The revised accounting standard does not change how to recognize actuarial gains and losses and past service costs in profit or loss. Those amounts would be recognized in profit or loss over a certain period no longer than the expected average remaining working lives of the employees. However, actuarial gains and losses and past service costs that arose in the current period and have not yet been recognized in profit or loss shall be included in other comprehensive income and actuarial gains and losses and past service costs that were recognized in other comprehensive income in prior periods and then recognized in profit or loss in the current period shall be treated as reclassification adjustments.

(c) Amendments relating to the method of attributing expected benefit to periods and relating to the discount rate and expected future salary increases

The revised accounting standard also made certain amendments relating to the method of attributing expected benefit to periods and relating to the discount rate and expected future salary increases.

This accounting standard and the guidance for (a) and (b) above are effective for the end of the fiscal year beginning on or after April 1, 2013, and for (c) above are effective for the beginning of the fiscal year beginning on or after April 1, 2014, or for the beginning of the fiscal year beginning on or after April 1, 2015, subject to certain disclosure in March 2015, both with earlier application being permitted from the beginning of the fiscal year beginning on or after April 1, 2013. However, no retrospective application of this accounting standard to consolidated financial statements in prior periods is required.

The Bank expects to apply the revised accounting standard for (a) and (b) above from the end of the fiscal year beginning on April 1, 2013, and for (c) above from the beginning of the fiscal year beginning on April 1, 2014, and is in the process of measuring the effects of applying the revised accounting standard in future applicable periods.

3. BUSINESS COMBINATIONS

CONSOLIDATED

On October 1, 2011, the Bank acquired a portion of the business operated by Shinsei Financial, a consolidated subsidiary of the Bank, in accordance with the business transfer agreement dated September 30, 2011.

(A) OUTLINE OF THE TRANSACTION**(a) Business to be transferred**

A portion of the unsecured personal loan business operated by Shinsei Financial

(b) Date of business transfer

October 1, 2011

3. BUSINESS COMBINATIONS (CONTINUED)

CONSOLIDATED

(c) Overview and purpose of the transaction

Through the business transfer, the Bank acquired the Lake brand, the entire network of unmanned branches, ATMs, ACMs (automated contract machines), and a portion of other infrastructural assets relating to the unsecured personal loan business.

The Bank aims to improve its earnings power as well as to contribute to the development of a sound and healthy unsecured personal loan market, as one of the leading companies in the sector, by providing the service at the Bank, leveraging the Lake brand which has already achieved a certain level of recognition in the market.

(B) ACCOUNTING TREATMENT

In accordance with ASBJ Statement No. 21 "Accounting Standard for Business Combinations" and ASBJ Guidance No.10 "Guidance on Accounting Standard for Business Combinations and Business Divestitures," the Bank accounted for the transaction as business combinations involving entities or operations of entities under common control, which has been eliminated in the consolidated financial statements.

4. CASH AND CASH EQUIVALENTS

CONSOLIDATED

The reconciliation of cash and cash equivalents and cash and due from banks in the consolidated balance sheets as of March 31, 2013 and 2012 was as follows:

	Millions of yen		Thousands of U.S. dollars
	2013	2012	2013
Cash and due from banks	¥ 648,897	¥ 413,721	\$ 6,900,962
Interest-bearing deposits included in due from banks	(74,426)	(80,923)	(791,522)
Cash and cash equivalents	¥ 574,470	¥ 332,798	\$ 6,109,440

5. OTHER MONETARY CLAIMS PURCHASED

CONSOLIDATED

(a) Other monetary claims purchased as of March 31, 2013 and 2012 consisted of the following:

	Millions of yen		Thousands of U.S. dollars
	2013	2012	2013
Trading purposes	¥ 66,965	¥ 67,226	\$ 712,176
Other	45,352	63,717	482,319
Total	¥ 112,318	¥ 130,943	\$ 1,194,495

(b) The fair value and the unrealized loss which is included in net gain (loss) on other monetary claims purchased for trading purposes as of March 31, 2013 and 2012 were as follows:

	Millions of yen				Thousands of U.S. dollars	
	2013		2012		2013	
	Fair value	Unrealized loss	Fair value	Unrealized loss	Fair value	Unrealized loss
Trading purposes	¥ 66,965	¥ 27,514	¥ 67,226	¥ 20,052	\$ 712,176	\$ 292,612

6. TRADING ASSETS

CONSOLIDATED

Trading assets as of March 31, 2013 and 2012 consisted of the following:

	Millions of yen		Thousands of U.S. dollars
	2013	2012	2013
Trading securities	¥ 25,786	¥ 45,542	\$ 274,238
Derivatives for trading securities	2,060	2,247	21,918
Securities held to hedge trading transactions	1,901	12,901	20,220
Derivatives for securities held to hedge trading transactions	46,940	33,845	499,210
Trading-related financial derivatives	207,014	108,138	2,201,579
Other	4,202	—	44,698
Total	¥ 287,907	¥ 202,675	\$ 3,061,863

7. MONETARY ASSETS HELD IN TRUST

CONSOLIDATED

(a) Monetary assets held in trust as of March 31, 2013 and 2012 consisted of the following:

	Millions of yen		Thousands of U.S. dollars
	2013	2012	2013
Trading purposes	¥ 98,282	¥ 132,025	\$ 1,045,222
Other	135,565	135,602	1,441,723
Total	¥ 233,847	¥ 267,628	\$ 2,486,945

(b) The fair value and the unrealized loss which is included in net gain (loss) on monetary assets held in trust for trading purposes as of March 31, 2013 and 2012 were as follows:

	Millions of yen				Thousands of U.S. dollars	
	2013		2012		2013	
	Fair value	Unrealized loss	Fair value	Unrealized loss	Fair value	Unrealized loss
Trading purposes	¥ 98,282	¥ 4,258	¥ 132,025	¥ 6,637	\$ 1,045,222	\$ 45,291

(c) The carrying amount of monetary assets held in trust for other than trading purposes is the same as the acquisition cost as of March 31, 2013 and 2012.

8. SECURITIES

CONSOLIDATED

(a) Securities as of March 31, 2013 and 2012 consisted of the following:

	Millions of yen		Thousands of U.S. dollars
	2013	2012	2013
Trading securities	¥ 662	¥ 613	\$ 7,043
Securities being held to maturity	639,809	658,558	6,804,308
Securities available for sale:			
Securities carried at fair value	1,094,814	1,092,393	11,643,245
Securities carried at cost whose fair value cannot be reliably determined	65,959	80,207	701,478
Investments in unconsolidated subsidiaries and affiliates	41,099	41,720	437,087
Total	¥ 1,842,344	¥ 1,873,493	\$ 19,593,161

The above balances do not include securities held in connection with securities borrowing transactions with or without cash collateral, securities purchased under resale agreements or securities accepted as collateral for derivative transactions, where the Group has the right to sell or pledge such securities without restrictions. The balances of those securities as of March 31, 2013 and 2012 were ¥51,172 million (U.S.\$544,209 thousand) and ¥87,441 million, respectively. In addition, ¥47,380 million (U.S.\$503,887 thousand) and ¥11,066 million of those securities were further pledged as of March 31, 2013 and 2012, respectively.

The amount of guarantee obligations for privately-placed bonds (Paragraph 3 of Article 2 of the Financial Instruments and Exchange Act) included in securities as of March 31, 2013 and 2012 were ¥ 31,675 million (U.S.\$336,866 thousand) and ¥45,008 million, respectively.

8. SECURITIES (CONTINUED)

CONSOLIDATED

(b) The amortized/acquisition cost and the fair values of securities (other than trading securities) as of March 31, 2013 and 2012 were as follows:

	Millions of yen							
	2013				2012

Total	¥ 1,087,909	¥ 13,173	¥ 4,288	¥ 1,096,795	¥ 1,103,707	¥ 12,358	¥ 7,744	¥ 1,108,321

Thousands of U.S. dollars

	2013			
	Amortized/ Acquisition cost	Gross unrealized gain	Gross unrealized loss	Fair value
Securities being held to maturity:				
Japanese national government bonds	\$ 6,219,966	\$ 48,311	\$ —	\$ 6,268,277
Japanese corporate bonds	—	—	—	—
Other	584,342	51,290	2	635,630
Total	\$ 6,804,308	\$ 99,601	\$ 2	\$ 6,903,907
Securities available for sale:				
Equity securities	\$ 145,839	\$ 68,562	\$ 7,422	\$ 206,979
Japanese national government bonds	7,997,578	15,763	10,588	8,002,753
Japanese local government bonds	5,354	310	—	5,664
Japanese corporate bonds	1,967,114	8,278	22,041	1,953,351
Other, primarily foreign debt securities	1,453,932	47,190	5,557	1,495,565
Total	\$ 11,569,817	\$ 140,103	\$ 45,608	\$ 11,664,312

Note: "Other, primarily foreign debt securities" includes other monetary claims purchased whose fair value can be reliably determined.

Individual securities (except for those whose fair value cannot be reliably determined), other than trading securities, are written down when a decline in fair value below the cost of such securities is deemed to be other than temporary. The amount written down is accounted for as an impairment loss. Impairment loss on such securities for the fiscal year ended March 31, 2013 was ¥2,748 million (U.S.\$29,229 thousand), which consisted of ¥211 million (U.S.\$2,246 thousand) for equity securities, ¥2,506 million (U.S.\$26,658 thousand) for Japanese corporate bonds and ¥30 million (U.S.\$325 thousand) for other securities.

Impairment loss on such securities for the fiscal year ended March 31, 2012 was ¥8,761 million, which consisted of ¥4,094 million for equity securities, ¥3,351 million for Japanese corporate bonds and ¥1,315 million for other securities.

To determine whether an other-than-temporary impairment has occurred, the Group applies the following rule, by the obligor classification of the security issuer based on the Group's self-assessment guidelines:

Securities issued by "legally bankrupt," "virtually bankrupt" and "possibly bankrupt" obligors	The fair value of securities is lower than the amortized/acquisition cost
Securities issued by "need caution" obligors	The fair value of securities is 30% or more lower than the amortized/acquisition cost
Securities issued by "normal" obligors	The fair value of securities is 50% or more lower than the amortized/acquisition cost

8. SECURITIES (CONTINUED)

CONSOLIDATED

“Legally bankrupt” obligors are those who have already gone bankrupt from a legal and /or formal perspective.

“Virtually bankrupt” obligors are those who have not yet gone legally or formally bankrupt but who are substantially bankrupt because they are in serious financial difficulties and are not deemed to be capable of restructuring.

“Possibly bankrupt” obligors are those who are not yet bankrupt but are in financial difficulties and are very likely to go bankrupt in the future.

“Need caution” obligors are those who require close attention because there are problems with their borrowings.

“Normal” obligors are those whose business conditions are favorable and who are deemed not to have any particular problems in terms of their financial position.

(c) Unrealized gain (loss) on available-for-sale securities as of March 31, 2013 and 2012 consisted of the following:

	Millions of yen		Thousands of U.S. dollars
	2013	2012	2013
Unrealized gain (loss) before deferred tax on:			
Available-for-sale securities	¥ 8,885	¥ 4,614	\$ 94,495

Total	\$ 87,699,352	\$ 112,693	\$ 14,236

9. LOANS AND BILLS DISCOUNTED

CONSOLIDATED

Loans and bills discounted as of March 31, 2013 and 2012 consisted of the following:

	Millions of yen		Thousands of U.S. dollars
	2013	2012	2013
Loans on deeds	¥ 3,650,171	¥ 3,481,830	\$ 38,819,220
Loans on bills	26,301	26,192	279,717
Bills discounted	8,942	11,054	95,102
Overdrafts	607,049	617,750	6,455,912
Total	¥ 4,292,464	¥ 4,136,827	\$ 45,649,951

(a) Risk-monitored loans

Loans and bills discounted include loans to bankrupt obligors of ¥20,577 million (U.S.\$218,840 thousand) and ¥8,145 million as of March 31, 2013 and 2012, respectively, as well as non-accrual delinquent loans of ¥252,916 million (U.S.\$2,689,747 thousand) and ¥316,727 million as of March 31, 2013 and 2012, respectively.

Nonaccrual delinquent loans include loans classified as “possibly bankrupt” and “virtually bankrupt” under the Group’s self-assessment guidelines.

In addition to nonaccrual delinquent loans as defined, certain other loans classified as “substandard” under the Group’s self-assessment guidelines include loans past due for three months or more.

Loans past due for three months or more consist of loans for which the principal and/or interest is three months or more past due but exclude loans to bankrupt obligors and nonaccrual delinquent loans. The balances of loans past due for three months or more as of March 31, 2013 and 2012 were ¥1,258 million (U.S.\$13,382 thousand) and ¥1,754 million, respectively.

Restructured loans are loans where the Group relaxes lending conditions, such as by reducing the original interest rate, or by forbearing interest payments or principal repayments to support the borrower’s reorganization, but exclude loans to bankrupt obligors, nonaccrual delinquent loans or loans past due for three months or more. The outstanding balances of restructured loans as of March 31, 2013 and 2012 were ¥38,117 million (U.S.\$405,373 thousand) and ¥45,321 million, respectively.

(b) Loan participations

The total outstanding amounts deducted from the loan account for loan participations as of March 31, 2013 and 2012 were ¥16,219 million (U.S.\$172,488 thousand) and ¥18,441 million, respectively. This “off-balance sheet” treatment is in accor-

dance with guidelines issued by the JICPA. The total amounts of such loans in which the Bank participated were ¥8,125 million (U.S.\$86,412 thousand) and ¥7,891 million as of March 31, 2013 and 2012, respectively.

(c) Bills discounted

Bills discounted, such as bank acceptances bought, commercial bills discounted, documentary bills and foreign exchange contracts bought, are accounted for as financing transactions in accordance with Industry Audit Committee Report No. 24 issued by the JICPA, although the Group has the right to sell or pledge them without restrictions. The face amounts of such bills discounted held as of March 31, 2013 and 2012 were ¥9,092 million (U.S.\$96,701 thousand) and ¥11,169 million, respectively.

(d) Loan commitments

The Bank and certain of its consolidated subsidiaries issue commitments to extend credit and establish credit lines for overdrafts to meet the financing needs of customers. The unfunded amounts of these commitments were ¥3,802,064 million (U.S.\$40,434,594 thousand) and ¥4,026,211 million as of March 31, 2013 and 2012, out of which the amounts with original agreement terms of less than one year or which were cancelable were ¥3,636,321 million (U.S.\$38,671,931 thousand) and ¥3,806,561 million as of March 31, 2013 and 2012, respectively. Since a large majority of these commitments expire without being drawn upon, the unfunded amounts do not necessarily represent future cash requirements. Many such agreements include conditions granting the Bank and its consolidated subsidiaries the right to reject the drawdown or to reduce the amount on the basis of changes in the financial circumstances of the borrower or other reasonable grounds.

In addition, the Bank obtains collateral when necessary to reduce credit risk related to these commitments.

10. FOREIGN EXCHANGES

CONSOLIDATED

Foreign exchange assets and liabilities as of March 31, 2013 and 2012 consisted of the following:

	Millions of yen		Thousands of U.S. dollars
	2013	2012	2013
Foreign exchange assets:			
Foreign bills bought	¥ 150	¥ 114	\$ 1,599

Other (primarily consists of extraordinary severance benefit)	225	754	2,395
Net periodic retirement benefit cost	¥ 5,966	¥ 6,705	\$ 63,450

21. RESERVE FOR EMPLOYEES' RETIREMENT BENEFITS (CONTINUED)

CONSOLIDATED

(c) Assumptions used in calculation of the above information were as follows:

	2013	2012
Discount rate	0.98-1.75%	1.40-2.20%
Expected rate of return on plan assets	2.00-3.50%	2.00-3.50%
Method of attributing the projected benefits to periods of service	Straight-line basis	Straight-line basis
Period of amortization of prior service cost	5.00-14.74 years	5.00-14.74 years
Period of amortization of net actuarial losses	5.00-14.74 years	5.00-14.74 years
Period of amortization of unrecognized obligation at transition	15 years	15 years

22. ACCEPTANCES AND GUARANTEES

CONSOLIDATED

Acceptances and guarantees as of March 31, 2013 and 2012 consisted of the following:

	Millions of yen		Thousands of U.S. dollars
	2013	2012	2013
Guarantees	¥ 511,032	¥ 562,624	\$ 5,434,786

23. ASSETS PLEDGED AS COLLATERAL

CONSOLIDATED

Assets pledged as collateral and liabilities collateralized as of March 31, 2013 and 2012 consisted of the following:

	Millions of yen		Thousands of U.S. dollars
	2013	2012	2013
Assets pledged as collateral:			
Cash and due from banks	¥ 165	¥ 203	\$ 1,761
Trading assets	15,484	33,915	164,676
Monetary assets held in trust	4,171	1,767	44,363
Securities	872,770	625,163	9,281,831
Loans and bills discounted	121,584	191,990	1,293,041
Lease receivables and leased investment assets	84,140	85,050	894,830
Other assets	42,298	32,278	449,837
Premises and equipment	2,558	—	27,215
Liabilities collateralized:			
Deposits, including negotiable certificates of deposit	¥ 418	¥ 568	\$ 4,445
Call money	170,000	210,000	1,807,934
Payables under securities lending transactions	43,945	136,006	467,356
Borrowed money	447,809	172,673	4,762,416
Corporate bonds	10,159	14,069	108,044
Other liabilities	2,483	33	26,407
Acceptances and guarantees	914	920	9,730

In addition, ¥173,655 million (U.S.\$1,846,806 thousand) and ¥364,798 million of securities as of March 31, 2013 and 2012, were pledged as collateral for transactions, including exchange settlements, swap transactions and replacement of margin for future trading.

Also, ¥5,103 million (U.S.\$54,273 thousand) and ¥5,383 million of margin deposits for futures transactions outstanding, ¥13,478 million (U.S.\$143,345 thousand) and ¥13,269 million

of security deposits, ¥16,718 million (U.S.\$177,795 thousand) and ¥23,935 million of cash collateral paid for financial instruments were included in other assets as of March 31, 2013 and 2012, respectively. And ¥4,473 million (U.S.\$47,575 thousand) of guarantee deposits under resale agreements and repurchase agreements was included in other assets as of March 31, 2013.

24. PREFERRED SECURITIES ISSUED BY SUBSIDIARIES OUTSIDE JAPAN

CONSOLIDATED

The noncumulative perpetual preferred securities issued by the Bank's wholly owned subsidiaries outside Japan as of March 31, 2013 and 2012 were as follows:

Issuer	Issued date	Issue amount (in millions)	Dividend rate ⁽¹⁾	Floating dividend start date	Type	Redemption date at the issuer's option	Millions of yen		Thousands of U.S. dollars
							2013	2012	2013

Shinsei Finance V (Cayman) Limited	Oct. 2009	¥4,000	5.5%	Jul. 2015	non step-up	Jul. 2015 ⁽²⁾	4,000	4,000	42,540
	Oct. 2009	¥5,000	floating	—	non step-up	Jul. 2015 ⁽²⁾	5,000	5,000	53,175
Total							¥ 56,160	¥55,586	\$ 597,262

Notes: (1) Fixed dividend rates shown in this column are to be changed to floating dividend rates on the dividend payment date shown in "Floating dividend start date" column.

(2) These preferred securities are redeemable on any dividend payment date shown in this column or thereafter, at a price equal to the liquidation preference together with any dividends otherwise payable, subject to the prior approval of the Financial Services Agency of Japan ("FSA").

(3) The preferred securities issued by Shinsei Finance II (Cayman) Limited are redeemable on dividend payment date shown in this column or on each dividend payment date falling at ten year intervals thereafter, at a price equal to the liquidation preference together with any dividends otherwise payable, subject to the prior approval of the FSA.

These preferred securities are accounted for as minority interests in the consolidated balance sheets.

25. EQUITY

CONSOLIDATED

The authorized number of shares of common stock as of March 31, 2013 was 4,000,000 thousand shares.

The following table shows changes in the number of shares of common stock.

	Thousands	
	Issued number of shares	Number of treasury stock
Fiscal year ended March 31, 2012:		
Beginning of year	2,750,346	96,427
Increase	—	—
Decrease	—	—
End of year	2,750,346	96,427
Fiscal year ended March 31, 2013:		
Beginning of year	2,750,346	96,427
Increase	—	—
Decrease	—	—
End of year	2,750,346	96,427

25. EQUITY (CONTINUED)

CONSOLIDATED

Japanese banks are subject to the Companies Act of Japan (the "Companies Act") and the Banking Act. The significant provisions in the Companies Act and the Banking Act that affect financial and accounting matters are summarized below:

(a) Dividends

Under the Companies Act, companies can pay dividends at any time during the fiscal year in addition to the year-end dividend upon resolution at the shareholders' meeting. For companies that meet certain criteria such as: (1) having a Board of Directors, (2) having independent auditors, (3) having a Board of Corporate Auditors, and (4) the term of service of the directors is prescribed as one year rather than two years of normal term by its articles of incorporation, the Board of Directors may declare dividends (except for dividends in kind) at any time during the fiscal year if the company has prescribed so in its articles of incorporation.

The Bank meets all of the above criteria and its articles of incorporation prescribe the authority for dividend declaration by the Board of Directors.

The Companies Act permits companies to distribute dividends-in-kind (noncash assets) to shareholders subject to a certain limitations and additional requirements.

Semiannual interim dividends may also be paid once a year upon resolution by the Board of Directors if the articles of incorporation of the company so stipulate. The Companies Act and the Banking Act provides certain limitations on the amounts available for dividends or the purchase of treasury stock.

(b) Increases/decreases and transfer of common stock, reserve and surplus

The Banking Act requires that an amount equal to 20% of dividends must be appropriated as a legal reserve (a component of retained earnings) or as additional paid-in capital (a component of capital surplus) depending on the equity account charged upon the payment of such dividends until the aggregate amount of legal reserve and additional paid-in capital equals 100% of the common stock.

The Companies Act provides that common stock, legal reserve, additional paid-in capital, other capital surplus and retained earnings can be transferred among the accounts under certain conditions upon resolution of the shareholders.

(c) Treasury stock and treasury stock acquisition rights

The Companies Act also provides for companies to purchase treasury stock and dispose of such treasury stock by resolution of the Board of Directors. The amount of treasury stock purchased cannot exceed the amount available for distribution to the shareholders which is determined by a specific formula. Under the Companies Act, stock acquisition rights are presented as a separate component of equity. The Companies Act also provides that companies can purchase both treasury stock acquisition rights and treasury stock. Such treasury stock acquisition rights are presented as a separate component of equity or deducted directly from stock acquisition rights.

26. STOCK ACQUISITION RIGHTS

CONSOLIDATED

The Bank issues stock acquisition rights as a stock option plan to directors, executive officers and employees of the Bank and its subsidiaries.

Stock acquisition rights provide eligible individuals (the "holders") with the right to purchase common stock of the Bank without any cash consideration at an exchange rate of one thousand common shares to one stock acquisition right. The amount of money to be paid upon exercising stock acquisition rights is the amount calculated by multiplying the payment amount per share (the "exercise price") by the number of common shares that can be purchased through the exercise of one stock acquisition right. Conditions are stipulated in the "Agreement on the Grant of Stock Acquisition Rights" entered into between the Bank and the holders to whom stock acquisition rights were allotted based on the resolution of the annual general meeting of shareholders and the meetings of the Board of Directors which resolves the issuance of stock acquisition rights subsequent to the shareholders' meeting.

(a) Details of stock options

Stock options outstanding as of March 31, 2013 were as follows:

	Date of issuance	Total number of stock options (shares) at the issuance	Total number of holders at the issuance	Exercise period	Exercise price (Yen)	Fair value at the grant date (Yen)
1st	July 1, 2004	9,455,000	2,196	July 1, 2006-June 23, 2014	684	—

In December 2005, the ASBJ issued "Accounting Standard for Stock Options" and related guidance, which requires companies to recognize compensation expense for stock acquisition rights based on the fair value at the date of grant and over the vesting periods for stock acquisition rights newly granted on and after May 1, 2006.

Income of ¥10 million (U.S.\$107 thousand) was recognized for the fiscal year ended March 31, 2013, due to reversal of expenses associated with rights that were cancelled before vesting dates which exceeded compensation expense during the period. Net stock-based compensation expense was ¥11 million for the fiscal year ended March 31, 2012. Gains on unexercised and forfeited stock acquisition rights included in other gains (losses), net were ¥105 million (U.S.\$1,127 thousand) and ¥69 million for the fiscal year ended March 31, 2013 and 2012, respectively. There were no stock acquisition rights issued during the fiscal year ended March 31, 2013 and 2012.

(c) Measurement of the fair value of stock options

There were no stock options granted or whose fair value was changed due to the modification to the terms and conditions during the fiscal years ended March 31, 2013 and 2012.

(d) Method of determining the vested number of stock options

Incorporated only the actual forfeited options, as the reasonable estimate of future forfeitures is not determinable.

27. NET TRADING INCOME (LOSS)

CONSOLIDATED

Net trading income (loss) for the fiscal years ended March 31, 2013 and 2012 consisted of the following:

	Millions of yen		Thousands of U.S. dollars
	2013	2012	2013
Income (loss) from trading securities	¥ 4,007	¥ 204	\$ 42,619

Gain on sale of subsidiary's stock	452	2,488	4,813
Loss on retirement of software at APLUS FINANCIAL	—	(1,901)	—
Other, net	699	86	7,443
Total	¥ 2,187	¥ (32,994)	\$ 23,266

30. OTHER GAINS (LOSSES), NET (CONTINUED)

CONSOLIDATED

Impairment losses on long-lived assets
For the fiscal year ended March 31, 2013, impairment losses on long-lived assets of ¥714 million (U.S.\$ 7,595 thousand) were recognized by the Bank on the properties of the branches which were decided to be closed and the unused IT related properties, assuming their recoverable amount to be zero.

For the fiscal year ended March 31, 2012, impairment losses on long-lived assets of ¥898 million were recognized by the Bank on the annex of the branches which were decided to be closed and the unused IT related properties, assuming their recoverable amount to be zero.

31. INCOME TAXES

CONSOLIDATED

The Group is subject to a number of taxes based on income, such as corporate tax, inhabitant tax and enterprise tax, which, in the aggregate, resulted in normal effective statutory tax rates of approximately 38.0% and 40.7% for the fiscal years ended March 31, 2013 and 2012, respectively.

(a) A reconciliation of the normal effective statutory tax rate with the actual effective tax rate for the fiscal years ended March 31, 2013 and 2012 was as follows:

	2013	2012
Normal effective statutory tax rate	38.0%	40.7%
Increase (decrease) in taxes resulting from:		
Permanently tax-exempt income	(0.3)	(0.0)
Amortization and impairment of goodwill	5.0	20.4
Equity in net income/loss of affiliates	0.9	(9.1)
Other nondeductible expenses	0.7	0.5
Foreign tax	0.1	4.6
Change in valuation allowance	(51.5)	(340.2)
Effect of tax rate reduction	—	5.6
Expiration of tax loss carryforwards	8.8	316.7
Other	(3.1)	(4.3)
Actual effective tax rate	(1.4%)	34.9%

“Act for Partial Revision to the Income Tax Act, etc. in order to Build a Tax Framework in Response to Changes in the Structure of the Economic Society” (Law No. 114 for 2011) and “Act on Special Measures for Securing Financial Resources Required to Implement Actions for Recovery from the Great East Japan Earthquake” (Law No. 117 for 2011) were promulgated in December 2, 2011. Since the fiscal year beginning on or after April 1, 2012, the corporate tax rate has been reduced and the reconstruction special corporate tax has been imposed. In connection with this change, the effective statutory tax rate for calculating deferred tax assets and deferred tax liabilities has been changed from 40.7% to 38.0% for temporary differences and tax loss carryforwards that are expected to be realized between the fiscal year beginning on April 1, 2012 and the fiscal year beginning on April 1, 2014; and to 35.6% for temporary differences and tax loss carryforwards

that are expected to be realized in and after the fiscal year beginning on April 1, 2015. With these tax rate changes, deferred tax assets decreased by ¥824 million and deferred tax liabilities have decreased by ¥162 million while unrealized gain (loss) on available-for-sale securities has increased by ¥30 million and income taxes-deferred have increased by ¥851 million for the fiscal year ended March 31, 2012.

Since the fiscal year beginning on or after April 1, 2012, the use of tax loss carryforwards has been limited to the equivalent of 80% of taxable income before deducting tax loss carryforwards. Due to this limitation, in the fiscal year ended on March 31, 2012, deferred tax assets decreased by ¥202 million and deferred tax liabilities increased by ¥291 million while income taxes-deferred increased by ¥494 million.

31. INCOME TAXES (CONTINUED)

CONSOLIDATED

(b) The tax effects of significant temporary differences and tax loss carryforwards, which resulted in deferred tax assets and liabilities, as of March 31, 2013 and 2012 were as follows:

	Millions of yen		Thousands of U.S. dollars
	2013	2012	2013
Deferred tax assets:			
Tax loss carryforwards	¥ 215,070	¥ 197,705	\$ 2,287,258
Reserve for credit losses	135,343	156,784	1,439,367
Securities	32,339	38,362	343,925
Monetary assets held in trust	15,545	16,539	165,329
Reserve for losses on interest repayments	12,467	18,145	132,596
Deferred loss on derivatives under hedge accounting	5,285	5,299	56,211
Other	43,656	39,578	464,285
Subtotal	459,709	472,415	4,888,971
Valuation allowance	(433,848)	(446,257)	(4,613,934)
Total deferred tax assets	25,861	26,157	275,037
Offset with deferred tax liabilities	(9,522)	(10,322)	(101,268)
Net deferred tax assets	¥ 16,339	¥ 15,834	\$ 173,769
Deferred tax liabilities:			
Temporary differences due to business combination (primarily related to identified intangible assets)	¥ 4,861	¥ 6,591	\$ 51,699
Deferred gain on derivatives under hedge accounting	1,759	1,700	18,714
Asset retirement costs included in premises and equipment	1,285	1,333	13,669
Unrealized gain on available-for-sale securities	485	212	5,164
Other	1,137	1,112	12,100
Total deferred tax liabilities	9,529	10,949	101,346
Offset with deferred tax assets	(9,522)	(10,322)	(101,268)
Net deferred tax liabilities	¥ 7	¥ 626	\$ 78

(c) The Bank has ¥168,044 million (U.S.\$1,787,139 thousand) of tax loss carryforward related to corporate tax as of March 31, 2013. The schedule of tax loss carryforward and its expiration date are as follows:

Fiscal year ended March 31	Amount		Date of expiry
	Millions of yen	Thousands of U.S. dollars	
2009	¥ 107,458	\$ 1,142,811	March 31, 2018
2011	20,019	212,910	March 31, 2020
2012	16,732	177,945	March 31, 2021
2013	23,834	253,473	March 31, 2022
Total	¥ 168,044	\$ 1,787,139	

31. INCOME TAXES (CONTINUED)

CONSOLIDATED

In addition, other significant tax loss carryforwards of major subsidiaries as of March 31, 2013 are as follows:

Subsidiary	Fiscal period ended	Millions of yen	Thousands of U.S. Dollars	Date of expiry
APLUS FINANCIAL	March 31, 2007	¥ 29,537	\$ 314,132	March 31, 2014
	March 31, 2008	11,826	125,778	March 31, 2015
	March 31, 2009	2	31	March 31, 2018

Income tax effect	(47)	111	(504)
Total	148	(1,556)	1,577
Foreign currency translation adjustments:			
Gains (losses) arising during the fiscal year	3,344	520	35,566
Reclassification adjustment to profit or loss	(454)	506	(4,836)
Amount before income tax effect	2,889	1,027	30,730
Income tax effect	—	—	—
Total	2,889	1,027	30,730
Share of other comprehensive income in affiliates:			
Gains (losses) arising during the fiscal year	737	32	7,839
Reclassification adjustment to profit or loss	57	—	615
Amount before income tax effect	794	32	8,454
Income tax effect	—	—	—
Total	794	32	8,454
Total other comprehensive income	¥ 8,098	¥ 14,019	\$ 86,131

34. LEASE TRANSACTIONS

CONSOLIDATED

(A) FINANCE LEASE TRANSACTIONS**AS LESSEE**

For finance lease transactions, where the ownership of the property is not deemed to transfer to the lessee.

- (a) Lease assets are primarily buildings, tools, equipment and fixtures included in "Premises and equipment," and software included in "Intangible assets."
- (b) Depreciation method is described in "(W) LEASE TRANSACTIONS" in Note 2 "SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES."

AS LESSOR

- (a) Breakdown of "Lease receivables and leased investment assets" as of March 31, 2013 and 2012 were as follows:

	Millions of yen		Thousands of U.S. dollars
	2013	2012	2013
Lease receivables	¥ 44,705	¥ 31,759	\$ 475,441
Leased investment assets:			
Lease payment receivables	172,465	179,777	1,834,151
Estimated residual value	6,976	7,676	74,197
Interest equivalent	(20,817)	(21,988)	(221,389)
Other	259	206	2,764
Subtotal	158,884	165,672	1,689,723
Total	¥ 203,590	¥ 197,432	\$ 2,165,164

34. LEASE TRANSACTIONS (CONTINUED)

CONSOLIDATED

(b) Lease payment receivables for "Lease receivables and leased investment assets as" of March 31, 2013 were as follows:

	Lease receivables		Leased investment assets	
	Millions of yen	Thousands of U.S. dollars	Millions of yen	Thousands of U.S. dollars
Due within one year	¥ 13,165	\$ 140,011	¥ 55,972	\$ 595,263
Due after one year within two years	11,156	118,649	42,518	452,180
Due after two years within three years	8,889	94,542	29,882	317,795
Due after three years within four years	6,567	69,848	19,394	206,260
Due after four years within five years	4,285	45,571	9,963	105,960
Due after five years	3,557	37,833	14,733	156,693
Total	¥ 47,621	\$ 506,454	¥ 172,465	\$ 1,834,151

(B) OPERATING LEASE TRANSACTIONS

Noncancelable operating lease obligations as lessee and lease payment receivables as lessor as of March 31, 2013 and 2012 were as follows:

AS LESSEE

	Millions of yen		Thousands of U.S. dollars
	2013	2012	2013
Lease obligations:			
Due within one year	¥ 4,011	¥ 4,046	\$ 42,658
Due after one year	17,684	21,021	188,073
Total	¥ 21,695	¥ 25,068	\$ 230,731

AS LESSOR

	Millions of yen		Thousands of U.S. dollars
	2013	2012	2013
Lease payment receivables:			
Due within one year	¥ 4,497	¥ 3,832	\$ 47,834
Due after one year	19,099	17,101	203,126
Total	¥ 23,597	¥ 20,934	\$ 250,960

35. SEGMENT INFORMATION

CONSOLIDATED

(A) SEGMENT INFORMATION**(a) DESCRIPTION OF REPORTABLE SEGMENTS**

Our reportable segments are components of the Group about which separate financial information is available and such information is evaluated regularly by the Executive Committee in deciding how to allocate resources and in assessing performance.

The Group provides a wide variety of financial products and services to institutional and individual customers through our Institutional Group, Global Markets Group and Individual Group, respectively. These groups consist of operating segments which provide their respective financial products and services. The Institutional Group consists of the "Institutional Business Sub-Group," "Structured Finance Sub-Group," "Principal Transactions Sub-Group," "Showa Leasing" and "Other Institutional Group," and

the Global Markets Group consists of the "Financial Institutions Sub-Group," "Markets Sub-Group," and "Other Global Markets Group" as reportable segments. The Individual Group consists of "Retail Banking Sub-Group," "Shinsei Financial" and "APLUS FINANCIAL." Also, the business and operations excluding any of the Institutional Group, the Global Markets Group, and the Individual Group are classified as the Corporate / Other. The "Treasury Sub-Group" in the Corporate / Other is a reportable segment.

In the Institutional Group, the "Institutional Business Sub-Group" provides financial products, financial services and advisory services for corporate banking business and public sector finance. The "Structured Finance Sub-Group" provides real estate finance,

35. SEGMENT INFORMATION (CONTINUED)

CONSOLIDATED

such as nonrecourse loans, financial products and services for the real estate and construction industries, specialty finance such as M&A finance, and trust business. The "Principal Transactions Sub-Group" provides financial products and services related to credit trading. The "Showa Leasing" primarily provides leasing related financial products and services. The "Other Institutional Group" consists of asset-backed investment and other products and services in the Institutional Group.

In the Global Markets Group, the "Financial Institutions Sub-Group" provides financial products and services for financial institutions business. The "Markets Sub-Group" is engaged in foreign exchanges, derivatives, equity-related transactions and other capital markets transactions. The "Other Global Markets Group" consists of Shinsei Securities' businesses, asset management, wealth management, and other products and services in the Global Markets Group.

In the Individual Group, the "Retail Banking Sub-Group" provides financial products and services for retail customers, the "Shinsei Financial" which consists of the business of Shinsei Financial Co., Ltd., SHINKI Co., Ltd. and "Shinsei Bank Card Loan - Lake" transferred from Shinsei Financial from October 1, 2011, provides consumer finance, and the "APLUS FINANCIAL" provides installment sales credit, credit cards, guarantees and settlement services. The "Other" consists of profit and loss attributable to the Consumer Finance Sub-Group and other subsidiaries. The profit and loss related to "Go Remit Overseas Remittance Service" that transferred from Lloyds TSB Bank plc, and that transfer process was finalized on March 1, 2013, is included in the

"Retail Banking Sub-Group."

In the Corporate / Other, the "Treasury Sub-Group" is engaged in operations ALM and capital fund raising.

On April 27, 2012, we implemented organizational changes. In the institutional Group, the Advisory Sub-Group was abolished and the three divisions within it - the Corporate Advisory Division, Solution Advisory Division and Asset Solution Division - were integrated into a Corporate Advisory Division, newly established in the Institutional Business Sub-Group. Also, the organizational changes on July 1, 2012, the "Treasury Sub-Group" in the Global Markets Group was transferred to the Corporate / Other. As a result of these organizational changes, classification of reportable segments was changed, and "REVENUE, PROFIT (LOSS), ASSETS, LIABILITIES AND OTHER ITEMS BY REPORTABLE SEGMENTS" for the fiscal year ended March 31, 2012 is presented based on the new classification of reportable segments.

(b)METHODS OF MEASUREMENT FOR THE AMOUNTS OF REVENUE, PROFIT (LOSS), ASSETS, LIABILITIES AND OTHER ITEMS BY REPORTABLE SEGMENTS

The accounting policies of each reportable segment are consistent to those disclosed in Note 2, "SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES," except for interest on inter-segment transactions and indirect expense.

Interest on inter-segment transactions is calculated using an inter-office rate. Indirect expense is allocated, based on the pre-determined internal rule, to each reportable segment according to the budget which is set at the beginning of the fiscal year.

Notes: (1) "Revenue," which represents gross operating profit under our management reporting, is presented as a substitute for sales in other industries. "Revenue" is defined as the total of net interest income, net fees and commissions, net trading income and net other business income on the management reporting basis. "Revenue" represents income and related cost attributable to our core business.

(2) "Expenses" are general and administrative expenses deducting amortization of goodwill and intangible assets acquired in business combinations, amortization of net actuarial gains or losses of retirement benefit cost and lump-sum payments.

(3) "Net Credit Costs (Recoveries)" consists of provision/reversal of reserve for credit losses, losses on write-off/sales of loans and recoveries of written-off claims.

(4) "Segment Assets" consists of other monetary claims purchased, trading assets, monetary assets held in trust, securities, loans and bills discounted, lease receivables and leased investment assets, installment receivables, tangible leased assets, intangible leased assets and customer's liabilities for acceptances and guarantees.

(5) "Segment Liabilities" consists of deposits, including negotiable certificates of deposit, debentures, trading liabilities and acceptances and guarantees.

(6) Regarding assets and liabilities not allocated to each business segment, there are related revenue and expense items which are allocated to each business segment based on rational allocation method. For example, interest on other borrowings is considered a part of "Revenue" and included in segment income, although borrowed money is not allocated to each segment liabilities. In addition, depreciation is considered a part of "Expenses" and included in segment income, although premises and equipment excluding tangible leased assets and intangible assets excluding intangible leased assets are not allocated to each segment assets.

(7) Regarding our investment assets portfolio management view, we have transferred a part of affiliates accounted by the equity method in the fiscal year ended March 31, 2013. Jih Sun Financial Holding Co., Ltd. under the "Other Institutional Group" segment was transferred to the "Principal Transactions Sub-Group" segment in the Institutional Business Group, and also Comox Holdings Ltd. under the "Other Global Markets Group" segment was transferred to the "Markets Sub-Group" segment in the Global Markets Group.

(8) "Other" under the Corporate/Other includes company-wide accounts which are not included in our reportable segments, allocation variance of indirect expense and elimination amount of inter-segment transactions.

CONSOLIDATED

(B) RELATED INFORMATION

(a) INFORMATION BY SERVICES

Income regarding major services for the fiscal year ended March 31, 2013 and 2012 were as follows:

Fiscal Year ended March 31	Millions of yen		Thousands of U.S. dollars
	2013	2012	2013
Loan Businesses	¥ 144,869	¥ 151,256	\$ 1,540,676
Lease Businesses	10,209	13,112	108,572
Securities Investment Businesses	21,345	14,489	227,007

(b) GEOGRAPHICAL INFORMATION

(i) REVENUE

Revenue from external domestic customers exceeded 90% of total revenue on the consolidated statements of income for the fiscal year ended March 31, 2013 and 2012, therefore geographical revenue information is not presented.

(ii) PREMISES AND EQUIPMENT

The balance of domestic premises and equipment exceeded 90% of total balance of premises and equipment on the consolidated balance sheets as of March 31, 2013 and 2012, therefore geographical premises and equipment information is not presented.

(c) MAJOR CUSTOMER INFORMATION

Revenue to a specific customer did not reach 10% of total revenue on the consolidated statements of income for the fiscal year ended March 31, 2013 and 2012, therefore major customer information is not presented.

36. RELATED PARTY TRANSACTIONS

CONSOLIDATED

Related party transactions for the fiscal years ended March 31, 2013 and 2012 were as follows:

Related party	Description of the transaction	Amount of the transaction			Account name	Balance at the end of fiscal year		
		Millions of yen		Thousands of U.S. dollars		Millions of yen		Thousands of U.S. dollars
		2013	2012	2013		2013	2012	2013
Companies in which a majority of the voting rights is owned by directors (including their subsidiaries)								
J.C. Flowers II L.P. ⁽¹⁾	Receipt of management fee ⁽²⁾	¥ 89	¥ 76	\$ 951	Unearned income	¥ —	¥ 12	\$ —
	Investment ⁽³⁾	161	84	1,717	—	—	—	—
	Dividend	878	407	9,345	—	—	—	—

	Dividend	362	66	3,854	—	—	—	—

Notes: (1) The fund is operated by J.C. Flowers & Co. LLC, of which J. Christopher Flowers, a director of the Bank, serves as chairman.

(2) The management fee for assisting J.C. Flowers & Co. LLC in its sponsoring and serving as an investment advisor is determined based on proportion of the investment amounts by limited partners.

(3) The committed investment amounts are U.S.\$200 million based on the limited partnership agreement.

(4) The committed investment amounts are U.S.\$34,975 thousand based on the limited partnership agreement.

37. FINANCIAL INSTRUMENTS AND RELATED DISCLOSURES

CONSOLIDATED

(A) GROUP POLICY FOR FINANCIAL INSTRUMENTS

The group conducts total financial service, primarily basic banking business and other financial services such as securities business, trust business, consumer finance business, and commercial finance business.

For conducting these businesses, the Bank obtains retail customer deposits as a long-term and stable source of funding. In addition, the Bank diversifies sources of funding by securitization of loans or other assets. Subsidiaries and affiliates also use borrowings from other financial institutions as one source of funding.

(B) NATURE AND EXTENT OF RISKS ARISING FROM FINANCIAL INSTRUMENTS**(a) Financial assets**

The financial assets held by the Group are exposed to the following risks:

Loans and bills discounted

Loans and bills discounted, which are primarily provided to domestic institutional and individual customers, are exposed to customer's credit risk and risk of fluctuation in interest rates.

Securities

Securities primarily consist of bonds and stocks and other investments such as foreign securities and investment in partnerships. They are exposed to the risk of fluctuation in interest rates, foreign exchange rates, and prices in the bond/stock markets and in addition, credit risk arising from downgrading of issuer's credit rating, default, etc.

Other monetary claims purchased, Monetary assets held in trust

Other monetary claims purchased and Monetary assets held in trust consist of investments in various assets such as housing loans, non performing loans, and receivables in credit trading and securitization businesses, with a purpose of collection, sale, or securitization. There is a possibility that the Group's profits and losses and financial conditions will be badly affected if earnings from these assets are less than expected. These investments are exposed to risk of fluctuation in market size and price of these assets.

Lease receivables and leased investment assets, Installment receivables

Lease receivables, leased investment assets, and installment receivables held by consolidated subsidiaries are exposed to customer's credit risk and risk of fluctuation in interest rates.

(b) Financial liabilities

Financial liabilities of the Group are mainly deposits. In case of

deterioration in the Group's financial position, sufficient funding would become difficult or more expensive ("liquidity risk").

By utilizing time deposits as an important Asset Liability Management (ALM) measure, the Bank is striving to diversify funding maturities and to disperse re-funding dates. Without solely relying on inter-bank funding, the Bank is aiming to cover its funding needs through core retail deposits and corporate deposits as well as capital.

(c) Derivative transactions

The Group enters into the following derivative transactions to provide products for customer needs, to maximize the profit of the Bank's own trading account and for asset and liability management, hedging transactions and other purposes.

(1) Interest rate related	Interest rate swap, Future contract, Interest rate option, and Interest rate swaption
(2) Currency related	Currency swap, Forward foreign exchange contract, Currency option
(3) Equity related	Equity index future, Equity index option, Equity option, and other
(4) Bond related	Bond futures, Bond future option
(5) Credit derivative	Credit default option, and other

Among the risks associated with derivative transactions, market risk, credit risk and liquidity risk are to be specially noted for risk management.

(1) Market Risk	Risk that losses are incurred associated with changes in the value of financial instruments from fluctuation in market price, as well as volatilities inherent in derivative instruments
(2) Credit Risk	Risk that losses are incurred associated with the counterparty defaulting on contractual terms
(3) Liquidity Risk	Risk that additional costs are incurred associated with closing out the position of the financial instrument held

To appropriately reflect the risk mitigation effect of derivative transactions to the consolidated financial statements, the Group adopts hedge accounting where risks in assets and liabilities of the Group are hedged by interest rate swap, currency swap, etc.

In hedge accounting, effectiveness of hedging is assessed based on the conditions determined in the accounting standards such as "Accounting Standard for Financial Instruments."

37. FINANCIAL INSTRUMENTS AND RELATED DISCLOSURES (CONTINUED)

CONSOLIDATED

(C) RISK MANAGEMENT FOR FINANCIAL INSTRUMENTS**(a) Credit risk management**

The Group's model for credit risk management focuses on securing adequate return on risk, avoiding excessive concentration in particular sectors or to particular customer groups, and managing the credit portfolio with an analysis of potential losses under a worst-case scenario.

Concrete policies and guidelines related to credit risk management of corporate business are clarified in the Group's detailed procedures, and credit risk management processes are roughly classified into credit risk management for individual transactions and portfolio-based credit risk management.

As for credit risk management for individual transactions, approval authority level is determined in accordance with transaction amount, aggregate credit exposure to obligor's group companies, credit rating and so on. The Group has an approval system in which the decisions are made jointly by the risk delegation holders of the business promotion division and the risk management divisions, and the final authority and decision rests with the risk management division.

On portfolio-based credit risk management, to diversify risks in terms of industries, ratings and customer groups, the Portfolio and Risk Management Division monitors the segment-specific risk diversification status and also rating fluctuations related to customers within the portfolios. The division uses this information to provide comprehensive reports to the Risk Policy Committee on a quarterly basis.

Credit risks in credit transactions are quantified based on the probability of default by obligor rating, loss given default, and unexpected loss ratio. In order to decrease credit risk of obligors, the Group secures collateral and guarantees for the protection of its claims, the values of which are checked more than once a year. Quasi credit risks involved in market transactions, such as derivative transactions, are controlled based on fair value and estimations of future value fluctuations.

As for credit risk management of the consumer finance business, risk management divisions of each subsidiary monitor leading indicators for quality of screening, quality of portfolio and performance of collection of claims monthly to recognize and tackle the aggravation of credit cost promptly. In case of any aggravation, the Group takes action to tackle it.

To take the risk strategy above, Individual Pillar Risk Management Division in the Bank holds monthly performance review, analyzes and monitors these leading indicators and advises the persons in charge of risk management of each subsidiary on their policies and strategies. The division does not merely avoid losses but also produces a balanced strategy with appropriate risk and return attributes and reports this business performance to the Risk Policy Committee quarterly.

(b) Market risk management

Market risks which are associated with changes in the value of financial assets and liabilities, including off-balance sheet transactions, from fluctuations in interest rates, foreign exchange rates, stock prices and other market-related indices, have an effect on our financial performance.

The Group manages market risk by segregating the overall balance sheet, including off-balance sheet transactions, into a trading book and a banking book. At the ALM Committee, the senior review and decision-making for the management mainly related to asset/liability management of the banking account are performed. At the Market Business Management Committee, the senior review and decision-making for the management of the trading account are performed.

The interest rate risk of the net asset and/or liability in the banking account which has interest rate sensitivity is managed by the ALM Committee based on "Asset Liability Management Policy for Banking Account."

The actual risk limits for asset/liability management of the trading account, such as the value-at-risk (VaR) method, are approved by the Executive Committee based on "Trading Business Risk Management Policy and Procedure." The Market Business Management Committee meets semi-monthly to review reports from the Market Risk Management Division and front office. The Market Risk Management Division is responsible for timely recognition, monitoring and reporting of market risk in both the Group's trading and banking accounts. In addition to reporting risk information to management, administrative divisions and front office units, the Market Risk Management Division carries out regular risk analyses and makes recommendations. Market risk of the balance sheet involved in the ordinary banking business operation is managed by the Treasury Sub-Group, and market risk involved in the trading transactions is managed by the Markets Sub-Group.

Market risk is managed by quantifying on a daily basis and making risk adjustment in response to market conditions.

Quantitative information on market risk is as follows:

(i) Financial instruments for trading purposes

The Group uses VaR for quantitative analysis on market risk of the "Trading assets," "Trading liabilities," trading securities in "Securities," and the trading purpose instruments in "Derivative instruments." For calculating VaR, the historical simulation method (holding period of 10 days, confidence interval of 99 %, and observation period of 250 business days) has been adopted.

The VaR in the Group's trading business as of March 31, 2013 and 2012 was ¥1,642 million (U.S.\$17,465 thousand) and

37. FINANCIAL INSTRUMENTS AND RELATED DISCLOSURES (CONTINUED)

CONSOLIDATED

¥1,229 million in the aggregate, respectively.

The Group conducts back testing to compare VaR calculated using the model with actual loss amounts. According to the result of back testing conducted, it is believed that the measurement model the Group uses is adequate enough accurately to capture market risk. It should be noted that VaR measures and calculates the amount of market risk at certain probability levels statistically based on historical market fluctuation, and therefore there may be cases where risk cannot be captured in such situations when market conditions are changing dramatically beyond what was experienced historically.

(ii) Financial instruments for other than trading purposes

The Group's main financial instruments which are impacted by interest rate risk, one of the major risk variables, includes "Call loans," "Receivables under resale agreements," "Receivables under securities borrowing transactions," "Other monetary claims purchased," "Monetary assets held in trust," bonds classified as securities being held to maturity or securities available for sale in "Securities," "Loans and bills discounted," "Lease receivables and leased investment assets," "Installment receivables," "Deposits, including negotiable certificates of deposit," "Debentures," "Call money," "Payables under securities lending transactions," "Borrowed money," "Short-term corporate bonds," "Corporate bonds" and interest rate swaps other than trading purposes in "Derivative instruments." As for these financial assets and liabilities, the Group uses the amount of impact on fair values which is calculated using a rationally expected fluctuation range of interest rates for one year from the fiscal year end for quantitative analysis to manage fluctuation risk of interest rates. The amount of such impact on fair values is calculated by categorizing the balance of these financial assets and liabilities according to the term of interest payments and using a certain fluctuation range of interest rates. Assuming all risk variables except for interest rate are constant, the Group estimated that fair value would decrease by ¥3,456 million (U.S.\$36,759 thousand) and ¥247 million in case of an increase of the index interest rates by 10 basis points (0.10%) and would increase by ¥767 million (U.S.\$8,164 thousand) and

¥478 million in case of a decrease by 10 basis points (0.10%), as of March 31, 2013 and 2012, respectively. Such amount of impact on fair value is calculated based on the assumption that all risk variables except for interest rate are constant, and correlation between interest rate and other risk variables is not taken into consideration. There is a possibility that interest rate changes beyond the rationally expected fluctuation range may cause an impact greater than the calculated amount.

(c) Liquidity risk management

The ALM Committee, which is the senior review and decision-making body for the management of liquidity risk, manages liquidity risk by establishing short-term liquidity gap limits and minimum liquidity reserve levels.

In accordance with the "Cash Liquidity Risk Management Policy," the Bank has a structure to conduct two or more liquidity measurements and to secure available reserves over the net cumulative outflow forecasted in an emergency situation.

(D) CONCENTRATION OF CREDIT RISK

As of March 31, 2013, loans to the financial and insurance industry were approximately 17% of the total loans and bills discounted, and those to the real estate industry were approximately 14%, slightly less than 60% of which are nonrecourse loans for real estate.

As of March 31, 2012, loans to the financial and insurance industry were approximately 17% of the total loans and bills discounted, and those to the real estate industry were approximately 15%, more than 60% of which are nonrecourse loans for real estate.

(E) FAIR VALUES OF FINANCIAL INSTRUMENTS

Fair values of financial instruments include the values calculated rationally in cases where no market price is available besides the value based on market price. Certain assumptions have been adopted for the calculation, so that the value calculated may not be the same when assumptions that differ from the Group's calculation are adopted.

37. FINANCIAL INSTRUMENTS AND RELATED DISCLOSURES (CONTINUED)

CONSOLIDATED

Fair values of financial instruments as of March 31, 2013 and 2012 were as follows:

Notes: (1) Carrying amounts of Other monetary claims purchased, Monetary assets held in trust, and Lease receivables and leased investment assets are presented as the amount net of reserve for credit losses because they are immaterial.

(2) For consumer loans of ¥389,310 million (U.S.\$4,140,277 thousand) and ¥463,248 million held by consolidated subsidiaries included in Loans and bills discounted, reserve for losses on interest repayments of ¥34,983 million (U.S.\$372,042 thousand) and ¥50,913 million was recognized for estimated losses on reimbursements of excess interest payments as of March 31, 2013 and 2012, respectively.

(3) Derivative instruments include derivative transactions both in trading assets and liabilities, and in other assets and liabilities. Derivative instruments are presented as net of assets and liabilities and presented with () when a liability stands on net basis.

(4) Contract amount for guarantee contracts presents the amount of "Acceptances and guarantees" on the consolidated balance sheets.

37. FINANCIAL INSTRUMENTS AND RELATED DISCLOSURES (CONTINUED)

CONSOLIDATED

(Note 1) Valuation methodologies for financial instruments

Assets:

(1) Cash and due from banks

The fair values of due from banks with no maturities approximate carrying amounts. For due from banks with maturities, the fair values approximate carrying amounts because most of them are with short maturities of six months or less.

(2) Call loans and (4) Receivables under securities borrowing transactions

The fair values approximate carrying amounts because most of them are with short maturities of three months or less.

(3) Receivables under resale agreements

The fair values of the receivables under resale agreements with maturity of three months or less approximate carrying amounts because of their short term maturity. The fair values of the receivables under resale agreements with maturity of more than three months are determined by discounting contractual cash flows in case of the transactions with fixed interest rate, or expected cash flows based on the forward rate in case of the transactions with floating interest rate, using the risk free rate adjusted to account for credit risk (after consideration of collateral) with credit default swap (CDS) spreads etc. corresponding to internal credit rating of each borrower.

(5) Other monetary claims purchased

The fair values are measured at quoted prices from third parties, or determined using the discounted cash flow method.

(6) Trading assets

The fair values are measured at market prices or quoted prices from third parties, or determined using the discounted cash flow method.

(7) Monetary assets held in trust

The fair values are primarily determined using the discounted cash flow method based on the characteristics of the components of the entrusted assets.

(8) Securities

The fair values of marketable equity securities are measured at closing prices on exchanges. The fair values of bonds are measured at market prices or quoted prices from third parties, or determined using the discounted cash flow method.

(9) Loans and bills discounted

The fair values of loans and bills discounted with fixed interest rate are determined by discounting contractual cash flows, and

the fair values of loans and bills discounted with floating interest rate are determined by discounting expected cash flows based on the forward rates, using the risk free rate adjusted to account for credit risk (after consideration of collateral) with CDS spreads etc. corresponding to internal credit rating of each borrower. The fair values of housing loans are determined by discounting expected cash flows at the rates that would be applied for the new housing loans with the same terms at the consolidated balance sheet date. The fair values of consumer loans are determined by discounting expected cash flows that reflect expected loss at the rates that consist of the risk free rate and certain costs, by a group of similar product types and customer segments.

For loans to obligors "legally bankrupt," "virtually bankrupt" and "possibly bankrupt," a reserve is provided based on the discounted cash flow method, or based on amounts expected to be collected through the disposal of collateral or execution of guarantees, so that the carrying amount net of the reserve is a reasonable estimate of the fair values of those loans.

(10) Lease receivables and leased investment assets

The fair values are primarily determined by discounting contractual cash flows at the rates that consist of the risk free rate, credit risk and certain costs, by a group of major product categories.

(11) Installment receivables

The fair values are primarily determined by discounting expected cash flows that reflect the probability of prepayment at the rates that consist of the risk free rate, credit risk and certain costs, by a group of major product categories.

Liabilities:

(1) Deposits, including negotiable certificates of deposit

The fair values of demand deposits, such as current deposits and ordinary deposits are recognized as the payment amount at the consolidated balance sheet date. The fair values of the deposits with maturity of six months or less approximate carrying amounts because of their short term maturity. The fair values of time deposits are determined by discounting the contractual cash flows at the rates that would be applied for the new contracts with the same terms at the consolidated balance sheet date.

(2) Debentures and (8) Corporate bonds

The fair values of marketable debentures and corporate bonds are measured at market prices. The fair values of nonmarketable corporate debentures and corporate bonds under the Medium Term Note program are determined by discounting expected cash flows at the actual average funding rates of corporate time deposits and debentures funded in the past three months of the consolidated balance sheet date.

37. FINANCIAL INSTRUMENTS AND RELATED DISCLOSURES (CONTINUED)

CONSOLIDATED

The fair values of retail debentures are determined by discounting contractual cash flows at the actual funding rate of the latest issuance.

The fair values of step-up callable subordinated bonds are determined by discounting expected cash flows which reflect the probability of early redemption at the rates that consist of the risk free rate and the CDS spread of the Bank.

(3) Call money and (4) Payables under securities lending transactions

The fair values approximate carrying amounts because most of them are with short maturities of three months or less.

(5) Trading liabilities

The fair values are measured at market prices.

(6) Borrowed money

The fair values of borrowed money with fixed interest rates are primarily determined by discounting contractual cash flows (for borrowed money hedged by interest rate swaps which meets specific matching criteria, the contractual cash flows include the cash flows of the interest rate swaps), and the fair values of borrowed money with floating interest rates are determined

by discounting expected cash flows on forward rates, at the funding rates that reflect the credit risk of the borrower.

The fair values of step-up callable subordinated borrowings are determined by discounting expected cash flows that reflect the probability of early redemption at the rates that consist of the risk free rate and the CDS spread of the Bank.

(7) Short-term corporate bonds

The fair values approximate carrying amounts because most of them are with short maturities of six months or less.

Derivative instruments:

The fair values are primarily measured at closing prices on exchanges or determined using the discounted cash flow method or option pricing models.

Other:

Guarantee contracts

The fair values are determined by discounting the amount of difference between the original contractual cash flows and the expected cash flows that would be applied for the new contracts with the same terms at the risk free rate.

(Note 2) Carrying amount of the financial instruments whose fair value cannot be reliably determined

As of March 31,	Millions of yen		Thousands of U.S. dollars
	2013	2012	2013
Equity securities without readily available market price ⁽¹⁾⁽²⁾	¥ 12,819	¥ 27,762	\$ 136,338
Investment in partnerships and others ⁽¹⁾⁽²⁾	57,681	72,420	613,439
Total	¥ 70,501	¥ 100,182	\$ 749,777

Notes: (1) Equity securities without readily available market price are out of the scope of fair value disclosure because their fair values cannot be reliably determined. Investments in partnerships and others, the assets of which comprise equity securities without readily available market price, are out of the scope of fair values disclosure because fair values of those investments cannot be reliably determined.

(2) For the fiscal years ended March 31, 2013 and 2012, impairment losses on equity securities without readily available market price of ¥1,271 million (U.S.\$13,526 thousand) and ¥3,172 million, and on investment in partnerships and others of ¥606 million (U.S.\$6,453 thousand) and ¥1,524 million were recognized, respectively.

38. DERIVATIVE FINANCIAL INSTRUMENTS

CONSOLIDATED

(A) DERIVATIVE TRANSACTIONS TO WHICH HEDGE ACCOUNTING WAS NOT APPLIED

The fair values of derivatives on the consolidated balance sheets as of March 31, 2013 and 2012 are adjusted for credit risk by a reduction of ¥611 million (U.S.\$6,506 thousand) and ¥784 million, respectively, and also adjusted for liquidity risk by a reduction of ¥2,025 million (U.S.\$21,543 thousand) and ¥2,655 million, respectively.

Regardless of this accounting treatment, the reduction of those risks is not reflected in the fair values shown in the following tables.

(a) INTEREST RATE-RELATED TRANSACTIONS

Interest rate-related transactions as of March 31, 2013 and 2012 were as follows:

	Millions of yen

INDEPENDENT AUDITORS' REPORT

To the Board of Directors and Shareholders of Shinsei Bank, Limited:

We have audited the accompanying consolidated financial statements of Shinsei Bank, Limited (the "Bank") and its consolidated subsidiaries (collectively, the "Group"), which comprise the consolidated balance sheets as of March 31, 2013 and 2012, and the related consolidated statements of income, comprehensive income, changes in equity, and cash flows for the years then ended, and the related notes to the consolidated financial statements, all expressed in Japanese yen.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting principles generally accepted in Japan; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Group's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Bank and its consolidated subsidiaries as of March 31, 2013 and 2012, and the results of their operations and their cash flows for the years then ended in accordance with accounting principles generally accepted in Japan.

Other Matter

Our audits also comprehended the translation of Japanese yen amounts into U.S. dollar amounts and, in our opinion, such translation has been made in accordance with the basis stated in Note 1 to the consolidated financial statements. Such U.S. dollar amounts are presented solely for the convenience of readers outside Japan.

Note: U.S. dollar amounts, presented solely for the readers' convenience, are translated at ¥94.03=U.S.\$1.00, the rate of exchange prevailing on the Tokyo foreign exchange market on March 31, 2013.

BASEL ACCORD PILLAR III (MARKET DISCIPLINE) DISCLOSURE

This section describes the information consistent with the Japanese FSA Notification Number 15, based on Article 19.2.1.5.d of the Bank Law Enforcement Rule (Refer to Ministry of Finance Ordinance Number 10), herein referred to as the Basel Accord Pillar III, issued on March 23, 2007. The Accord in this section refers to the Japanese FSA Notification Number 19, herein referred to as the Basel Accord Pillar I, issued on March 27, 2006.

QUALITATIVE DISCLOSURE

1. RANGE OF CONSOLIDATION

(1) DIFFERENCES BETWEEN COMPANIES WHICH BELONG TO A GROUP OF COMPANIES (CONSOLIDATED GROUP) SUBJECTED TO CALCULATION OF CAPITAL RATIOS BASED ON THE ACCORD'S ARTICLE 26 OR 38 AND COMPANIES INCLUDING RANGE OF CONSOLIDATION BASED ON RULE WITH REGARD TO WORD, FORMAT AND PLAN OF CONSOLIDATED FINANCIAL STATEMENT RULE (REFER TO MINISTRY OF FINANCE ORDINANCE NUMBER 28)

- There are no subsidiaries excluding from consolidated group as "Insurance subsidiaries" of the Accord's Article 26.2 in companies including range of consolidation based on Consolidated Financial Statement Rule.
- Non-consolidated subsidiaries based on Article 5 of Consolidated Financial Statement Rule are financial related corporations. Their holdings of capital are parts of deductions from capital in the calculation of the consolidated capital ratios.
- In accordance with the Accord's Article 38, the Bank Group's five foreign special purpose companies, which issued preferred securities, are included in the calculation of the non-consolidated capital ratio.

(2) NUMBER OF CONSOLIDATED SUBSIDIARIES AND NAME AND BUSINESS OF MAJOR CONSOLIDATED SUBSIDIARIES

i) Number of consolidated subsidiaries

As of March 31, 2013, there were 186 consolidated subsidiaries.

ii) Major consolidated subsidiaries

- Shinsei Trust & Banking Co., Ltd. (trust banking)
- Shinsei Securities Co., Ltd. (securities)
- APLUS FINANCIAL Co., Ltd. (installment credit)
- Showa Leasing Co., Ltd. (leasing)
- SHINKI Co., Ltd. (consumer finance)
- SHINSEI FINANCIAL Co., Ltd. (consumer finance)

(3) NUMBER OF FINANCIAL AFFILIATES UNDER THE ACCORD'S ARTICLE 32 AND NAME AND BUSINESS OF MAJOR FINANCIAL AFFILIATES

As of March 31, 2013, there were no financial affiliates applied for proportional consolidation method.

(4) NUMBER OF UNCONSOLIDATED SUBSIDIARIES SUBJECTED TO DEDUCTIONS FROM CAPITAL BASED ON THE ACCORD'S ARTICLE 31.1.2. A TO C AND NAME AND BUSINESS OF MAJOR NON-CONSOLIDATED SUBSIDIARIES

As of March 31, 2013, there were 83 non-consolidated subsidiaries. 75 of these non-consolidated subsidiaries are subsidiaries of Showa Leasing Co., Ltd. The majority of the Showa Leasing subsidiaries are partnerships set up to accommodate leveraged leases.

(5) NUMBER OF COMPANIES WHICH DO NOT BELONG TO CONSOLIDATED GROUP BUT EXCLUSIVELY ENGAGE IN DEPENDENT BUSINESS OF ARTICLE 16.2.1.11 OR ARTICLE 16.2.1.12 OF BANKING ACT (ACT NUMBER 59 OF 1981) AND NAME AND BUSINESS OF MAJOR THOSE COMPANIES

As of March 31, 2013, there were no companies which did not belong to consolidated group but came under above Banking Act.

(6) SUMMARY OF RESTRICTIONS ON TRANSFER OF CASH AND CAPITAL IN CONSOLIDATED GROUP

As of March 31, 2013, there were no restrictions excluding restrictions under general regulations such as regulations on large-lot credit based on Banking Act.

2. TYPES OF CAPITAL INSTRUMENTS

The Bank has issued common shares, preferred securities, perpetual subordinated bonds and loans, and dated subordinated bonds and loans. Please see "Management Discussion and Analysis of Financial Condition and Results of Operations - Capital Ratios" for details on the amount outstanding for each type of capital instrument.

QUALITATIVE DISCLOSURE (CONTINUED)

3. ASSESSMENT OF CAPITAL ADEQUACY OF THE BANK GROUP

As part of its comprehensive risk management, the Bank, at the start of its fiscal year, determines a Risk Capital budget in consideration of its regulatory capital. This Risk Capital budget is allocated to each business line and monitored. Each month the Executive Committee receives a report on the amount of Risk Capital used and the relevant regulatory capital. In this way, senior management can monitor and assess the availability of capital to support current and future activities. At least once a year, the Bank performs stress tests on its estimates of Risk Capital and regulatory capital.

The capital ratios remain at a sufficient level. The Bank will aim to stabilize management and strengthen its financial basis by improving profitability and enforcing appropriate measures led to strengthen capital basis taking market environment into consideration, although it is expected to increase risk assets following increase loans.

4. CREDIT RISK MANAGEMENT POLICIES AND PROCEDURES**CREDIT RISK MANAGEMENT SYSTEM**

Credit risk is defined as the risk of loss due to a counterpart defaulting on contractual debt obligations. Our model for credit risk management focuses on securing adequate return on risk, avoiding excessive concentration in particular sectors or to particular obligors, and managing the risk with an awareness of maximum loss amount from credit portfolio.

To achieve these goals, the Bank defines the concrete policy regarding customer attributes to gain or control risks, products, markets, the type of industry and the form of transaction etc. in "Credit Risk Policy," and clarifies basic policies of credit operations and specific guidelines for credit risk management in this "Credit Risk Policy," "Credit Procedures" and other procedures. The credit risk management processes are roughly classified into credit risk management for individual transactions and portfolio-based credit risk management, as follows.

CREDIT RISK MANAGEMENT FOR INDIVIDUAL TRANSACTIONS**(1) Organization and Systems**

In principle, a credit provision is consulted jointly by the sales promotion divisions and the risk management divisions that are independent from the sales promotion divisions. Thus the transparent and strict decision making process are secured and the framework to put a brake on the sales promotion division has

been established. Each transaction is discussed and approved by the Credit Committee or other committees. The level of approval authority is decided based mainly on the total exposure to the obligor group and ratings, and the decision is made strictly.

As for transactions that require discussions about financial, legal and/or compliance issues, a certain framework has established: the relevant transactions are discussed by Transaction Approval Committee of which participants includes members of the divisions in charge of such issues so that the transactions can be assessed comprehensively and an appropriate decision can be made.

And among receivables that must be paid attention, for those that falls under a certain category decided by rating, the exposure, reserve, etc., the obligor's business performance are monitored by the Doubtful Debt Committee so that Shinsei is able to take preventive measures, and by deciding the measures to handle the obligor in future, Shinsei is making efforts to minimize credit-related costs and to ensure soundness of assets.

(2) Obligor Rating System

For corporate exposures, the Bank uses an internal obligor rating system with the following characteristics:

- Increasing model accuracy and reflecting appropriate qualitative factors
- Benchmarked against external ratings
- Ensuring conformity with rating systems among industry classifications

More specifically, obligor ratings are determined by applying adjustments with qualitative factors to the model ratings calculated by our estimation models, which are based on external ratings. Obligor ratings shall be determined at the "Credit Rating Review Committee" in order to ensure objectivity and transparency. Moreover, we ensure conformity of obligor ratings with obligor categories based on the regulatory self-assessment requirements.

Obligor ratings are used in the standards of credit approval authority procedures and portfolio controls, and are the foundation for credit risk management.

Furthermore, the Bank also applies a facility rating system based on expected losses that allows for improvement in the credit status, such as collateral and/or covenants, from the perspective of obligor ratings and the credit status of individual transactions.

An obligor rating system and facility rating system similar to those adopted in the Bank have been introduced for major customers of leasing receivables at Showa Leasing.

QUALITATIVE DISCLOSURE (CONTINUED)**(3) Pool Classification**

The Bank assigns retail exposures to specific pools based on risk profile such as obligor characteristics and transaction characteristics that create reasonably homogeneous sub-portfolios. Major retail exposures to which pool classification is applied are housing loans of the Bank, installment credit receivables of APLUS and Zen-Nichi Shinpan, and small-lot leasing transactions of Showa Leasing.

PORTFOLIO-BASED CREDIT RISK MANAGEMENT

Controls must be carried out in such a way that risks are diversified in terms of industries and other criteria. This is done on a portfolio basis, which is an aggregation of transactions, and operations of individual transactions must be conducted based on appropriate risk analyses. At the Bank, Portfolio and Risk Management Division undertakes risk analyses of portfolios, and monitors the segment-specific risk distribution status including industry classifications, ratings, products and areas and also rating fluctuations related to customers within the portfolios. The Division uses this information to provide reports to senior management and the Chief Risk Officer on a monthly as well as ad hoc basis.

PRINCIPAL "CREDIT RISK MANAGEMENT STANDARDS"

For Basel Regulation, the Foundation Internal Ratings-Based Approach (F-IRB) has been adopted by the Bank for calculation of credit risk-weighted assets. In accordance with this approach, the Bank established "Credit Risk Management Standards," which document the framework. This documentation also covers the details of the Bank's internal rating system, which covers rating design and operations, internal control, use of internal rating and risk quantification.

These Standards contain "Basic Principles of the Internal Rating System for Credit Risk," and also provide the details of management policy and procedures in the form of specific rules for each group of exposures in the portfolio.

INTERNAL CONTROL ROLES AND RESPONSIBILITIES

The Bank Group's internal control system for credit risk management has been set up in accordance with current regulations.

(1) Credit Risk Management Divisions

The risk management divisions of the Bank and its subsidiaries undertake the roles and responsibilities for the Bank Group's management of credit risk. Credit Risk Management Sections are responsible for the management of each asset category, and Credit Risk Control Section (a section specified in Risk Management Group of the Bank) is responsible for management across asset categories.

(2) Senior Management Control/Oversight

Control and oversight for internal rating systems by senior management is defined in "Credit Risk Management Standards," and is performed in an appropriate manner.

(3) Audit Section

Internal Audit Division evaluates the Bank's internal rating system and ensures the system is in compliance with existing regulations.

APPLICATION OF THE INTERNAL RATING SYSTEM

The Bank uses its own internal rating systems for portfolios to which the F-IRB Approach are applied. These items are listed in the "Exhibit" for each portfolio.

The internal rating system is applied to corporate and retail exposures as categorized below. The rules for applying the internal rating system are part of the Bank's overall "Credit Risk Management Standards."

(1) Corporate Exposure

Corporate exposure, financial institution exposure, and sovereign exposure are included. Basic standards and related detailed rules for design and operations of internal rating system, which are benchmarked against R&I rating and categorized as 0A, and 1A-9E, are applied. Corporate exposure includes Specialized Lending such as Non-Recourse Real Estate Loans, and Project Finance etc. using slotting criteria categorized as Strong, Good, Satisfactory, Weak, and Default. Specific rating standards are established for each type of finance.

(2) Retail Exposure

Retail exposures are defined as:

- Exposures subject to pool management
- Claims against an individual (except for a claim for the purpose of funding business operations), or claims against a corporation (including an individual with the purpose of funding a business) with an outstanding amount of less than ¥100 million after the "aggregation" (*nayose*) on a consolidated basis.

Features of these products and credit analysis standards may vary between the Bank and its subsidiaries. As such, specific pool classification systems for each product are applied at each entity, in accordance with established guidelines.

ESTIMATION AND VALIDATION OF PARAMETERS

The approach for estimation and validation of parameters such as Probability of Default (PD), Loss Given Default (LGD), and Exposure at Default (EAD) is set forth in "Credit Risk Management Standards." Ratings, pool classifications and estimated parameters are also used for internal control. Depending

QUALITATIVE DISCLOSURE (CONTINUED)

on the specific characteristics of the Bank Group's portfolios, the parameters used for internal control may differ from the parameters used in the course of calculating the regulatory capital ratio of the Bank Group. The existence of differences and the rationale for such differences is stated in the guidelines for parameter estimation and validation.

STRESS TESTS

Specific implementation guidelines are established for stress tests used in the assessment of capital adequacy, and credit risk stress tests to assess the effect of certain specific conditions on the Bank's regulatory capital requirements. Stress test results are reported to senior management at least once a year.

RESERVE POLICY

A reserve for credit losses of the Bank and its subsidiaries is provided as detailed below, pursuant to the predetermined internal rules for providing such reserves according to the obligor categorizations based on the self assessment of their assets.

A general reserve for claims against normal obligors, need-caution obligors and substandard obligors is provided based on the specific actual past loss experience.

A specific reserve for claims to possibly bankrupt, virtually bankrupt and legally bankrupt obligors is provided based on the full amount of the unsecured, un-guaranteed portion of the respective claims after a solvency assessment.

For claims against obligors that are possibly bankrupt (that is, those that are not presently bankrupt but are likely to go bankrupt in the future), a specific reserve is provided for the amount considered to be necessary based on an overall solvency assessment performed for the amount of claims, net of amounts expected to be collected through the disposal of collateral or execution of guarantees.

For claims against obligors that are legally bankrupt (due to bankruptcy and special liquidation) or virtually bankrupt, a specific reserve is provided based on the amount of claims, net of amounts expected to be collected through the disposal of collateral or execution of guarantees.

The reserve for loans to restructuring countries is provided based on the amount of expected losses due to the political and economic situation in each country.

Additionally, with regard to claims against possibly bankrupt obligors and substandard obligors, a reserve is provided based on the discounted cash flow method when the obligor's future cash flows for debt service are reasonably estimable and the balance of claims to such obligors is large.

TRANSITION PLAN FOR MOVING A PORTION OF THE BANK'S PORTFOLIO, WHICH HAS NOT YET APPLIED F-IRB, FROM THE STANDARDIZED APPROACH TO THE F-IRB APPROACH

Two portfolios in the Bank and two entities are currently evaluated using the Standardized Approach, and the F-IRB Approach will be applied at a future date as "roll-out" assets, to secure sufficient data observation periods. Expected IRB roll-out periods are as follows:

- (1) Residential mortgages at the Bank: March end 2015 (prospect)
- (2) SHINKI: March end 2014
- (3) Shinsei Financial: March end 2014
- (4) Card Loan Lake at the Bank: March end 2017

In the case of portfolios to which the Standardized Approach is applied, the Bank will use ratings from the following qualified rating agencies to determine exposure risk weights:

S&P, Moody's, Fitch, R&I and JCR.

5. CREDIT RISK MITIGATION POLICIES AND PROCEDURES

- (1) Policies and framework for mitigating credit risk

The Bank mitigates credit exposure with collateral and guarantees to reduce the credit risk of obligors. The Bank has a clear framework regarding methods for mitigating credit risk. Basic procedures and descriptions of controls, as well as types of standard collateral, guarantees necessary in granting credit, evaluation methods for different types of credit and collateral, possible "haircuts" to collateral and regular revaluation of collateral, are stipulated in the Bank's credit procedures.

- (2) Controls concerning overall methods to mitigate credit risk

The Bank uses net exposure for capital calculations after netting deposit and loan claims. All collateral and guarantees are registered in a dedicated system. The information is linked to obligor and credit account data. Collateral and guarantees are revalued at least once a year. Perfection of security interest, currency, date and correlation between collateral and counterparty are checked.

- (3) Eligible financial asset collateral

Financial asset collateral types are defined by the Bank to include deposits, fixed income securities, equities and commercial paper.

QUALITATIVE DISCLOSURE (CONTINUED)**(4) Eligible collateralized claims**

Collateral types in this category include commercial bills, rights to claim return of security deposits, rights to claim return of construction funds, loan receivables, leasing and sales installment receivables and beneficial interests in trust.

(5) Eligible real estate collateral

Collateral types in this category include land and buildings, plants and foundations including industrial foundations.

(6) Other asset-backed collateral

Eligible other asset-backed collateral is defined by the Bank as aircraft and ships.

(7) Guarantees

Guarantors are classified into the following categories: governments, central banks, municipalities, public institutions, credit guarantee associations, banks, general business entities and individuals.

6. POLICIES AND PROCEDURES FOR COUNTERPARTIES OF DERIVATIVE PRODUCT AND TRANSACTIONS WITH LONG-HORIZON SETTLEMENT PERIODS

(1) COUNTERPARTY RISK

Credit risk arising from market trading, such as derivatives, is controlled based on current fair value and estimation of future fair value volatility.

As the risk associated with market trade changes by market rate fluctuation after the trade, the Bank controls it based on estimation of future fair value volatility.

(2) ALLOCATION OF CREDIT LIMITS

Counterparty limits due to derivatives transactions are established based on counterparty's specific situation, and credit limits are managed as appropriate on both a counterparty limit basis, and total credit limit basis where counterparty limit is added to any other credit exposure for each obligor in order to reflect the Bank's overall exposure.

As risk embedded in market transactions changes with market movement, the Bank strictly manages its exposures using estimation of future market volatilities.

(3) CREDIT ENHANCEMENT BASED ON COLLATERAL AND RESERVES

Credit enhancement measures are taken to mitigate the Bank's concerns regarding certain obligors' credit quality as well as concentration risk in the Bank's portfolio.

The Bank follows the guidelines outlined in the ISDA Credit Support Annex (CSA), which has been accepted by many financial institutions. Reserves are calculated based on expected losses according to the counterparty's credit quality, and are taken into consideration in the mark-to-market process.

(4) POSSIBILITY OF THE BANK POSTING ADDITIONAL COLLATERAL DUE TO A DECLINE IN THE BANK'S CREDIT QUALITY

If the Bank's credit quality were to decline and be reflected as such in the assignment of lower external ratings, the Bank may be required to provide additional collateral to counterparties in transactions subject to the ISDA Credit Support Annex (CSA).

7. EQUITY RISK MANAGEMENT

The Bank's equity investments are mainly composed of strategic merger/acquisition or business alliance related transactions, which are approved by the Executive Committee, and investment business related transactions, which are approved by the Transaction Approval Committee (TAC).

The risk management methodologies for these investments are determined based on their investment types and purposes. Each risk is recognized and monitored appropriately by evaluating underlying assets/enterprise value. For securities that do not have fair market value, self assessment is conducted every quarter.

Investments in subsidiaries and affiliates are carried at cost determined by the moving average method. Available-for-sale securities are carried at fair value at the balance sheet date (cost of securities sold is determined by the moving average method) in principle, with the exception of those whose fair value cannot be reliably determined, which are carried at cost determined by the moving average method.

8. SECURITIZATION EXPOSURE RISK MANAGEMENT POLICIES AND CHARACTERISTICS

BANK RULES

The Bank manages securitization transactions as follows:

(1) Originator

For fundraising, mitigation of exposure concentration, transfer of credit risk and balance sheet management purposes, the Bank securitizes loans and the Bank's subsidiaries securitize financial assets such as credit card and consumer loan receivables.

As an originator, the Bank manages the credit risk of its securitized transactions using the assumption that original assets are maintained on its books. Since the purpose of these transactions

QUALITATIVE DISCLOSURE (CONTINUED)

includes acquiring funds, mitigating exposure concentration, transferring credit risk and managing the Bank's balance sheet, securitization transactions are a tool to control liquidity risk.

(2) Investor

In order to invest in assets whose credit risks are different from those of existing corporate exposure and to enhance the profit-earning opportunity, the Bank selectively invests in securitization transactions, including re-securitization as well as securitization defined as non-re-securitization as per Clause 2 a or b in Article 1 of Administrative Notice) which are backed by various financial products.

The Bank also re-securitizes some securitized products of which the Bank has purchased and may hold the subordinated/residual portion.

As a general rule, Risk Management Group which is fully independent from Business Groups, manages the risks arising from securitization exposure, and risk management/monitoring methodologies and risk taking/reduction policies are specified according to the types of products. Although the Bank does not actively intend to increase securitization exposure at this moment, aforementioned procedure defined in "4. Credit Risk Management and Procedures, Credit Risk Management of Specific Transactions" will be followed for new investments after specifying and recognizing the risk profile, product specifics, nature of underlying assets and structure including credit enhancement, etc.

(3) Servicer

The Bank acts as a servicer when loans, which were originated by the Bank, are used as underlying assets in securitization.

Similarly, when financial assets such as credit card and consumer loan receivables originated by the Bank's subsidiaries are used as underlying assets for a securitization, the subsidiary serves as a servicer.

(4) Swap provider

In some transactions wherein the Bank is the arranger, the Bank provides swaps in order to mitigate interest rate risk within a specified range or to manage any cashflow difference between interest from underlying assets and coupons from the securities backed by the same assets.

Securitized exposure includes various risk characteristics that are unique to each product, as well as the following general risk characteristics.

(a) Market risk

Market risk is the risk of changes in the market value of positions held, caused by changes in the securitization market environment or interest rates.

(b) Credit risk

Credit risk primarily refers to the risk of interest/dividends on positions held not paid as scheduled due to default of some or all of debtors of underlying assets. Moreover, credit risk includes the risk of default of parties participating in the structure, such as originator, servicer, and swap counterparty.

(c) Liquidity risk

Liquidity risk is the risk of failure to sell the positions held at appropriate prices in a short period of time.

(d) Exchange risk

Exchange risk is the risk of changes in exchange rates in relation to the positions held in which investments were made in foreign currencies.

(e) Legal risk

Legal risk is the risk of suffering disadvantages due to inappropriate legal structure.

PREPARATION AND MANAGEMENT STATUSES OF THE FRAMEWORK DEFINED IN CLAUSE 4-3 THROUGH CLAUSE 4-6 OF ARTICLE 249 OF ADMINISTRATIVE NOTICE ON CAPITAL ADEQUACY RULES (INCLUDING INSTANCES WHERE THE RELEVANT PROVISIONS ARE APPLIED *MUTATIS MUTANDIS* BASED ON CLAUSE 2 OF ARTICLE 254 AND CLAUSE 4-1 OF ARTICLE 302 OF ADMINISTRATIVE NOTICE ON CAPITAL ADEQUACY RULES): OVERVIEW

When the Bank acquires and monitors securitized exposures, outside ratings and their changes are closely watched as one of the effective indicators. Moreover, when the Bank assigns internal ratings, risk characteristics and structural characteristics are understood and future performance forecast is analyzed, without depending solely on outside ratings.

Investment decisions are made based on the results of such analysis and expected return. Even after an investment is made, various covenants and triggers are checked based on trustee reports and servicer reports. A continuous and regular monitoring framework is established whereby information on comprehensive risk characteristics and performance of securitized exposures and underlying assets is captured in a timely manner.

Risk capital is measured based on internal ratings assigned for each transaction. For investments in securities without a fair market value or its track record, risks are understood and controlled through self-assessments.

QUALITATIVE DISCLOSURE (CONTINUED)

In terms of the reporting, overall situation of the Bank's portfolio including the securitization exposure is reported to the senior management via the Risk Policy Committee etc on a monthly or a quarterly basis. The report includes information of exposure, risk quantification, change in the portfolio, and risk profiles.

POLICIES USING SECURITIZATION TRANSACTIONS FOR CREDIT RISK MITIGATION

The Bank is not using securitization transactions for credit risk mitigation.

CALCULATION METHODS FOR DETERMINING THE AMOUNT OF CREDIT RISK IN THE CONTEXT OF SECURITIZATION EXPOSURE

Risk weights are calculated based on internal rules entitled "Standards for Administering Risk Weight Calculation for Securitization Exposure." In general, the amount of credit risk assets related to securitization exposures is calculated using the Ratings-Based Approach (RBA).

In certain cases, where ratings have not been assigned by qualified rating agencies, Risk Management Group and Finance Group may approve exceptions to using the RBA. For such transactions, the Bank has sufficient data to estimate PDs and LGDs of the original assets, and therefore can calculate the transaction-specific PDs, LGDs and credit risk amount based on the Supervisory Formula Approach.

Where no ratings are assigned by qualified rating agencies and no data are available for estimating the PDs and LGDs of original assets, the Bank's investment amount is deducted from the Bank's capital.

CALCULATION METHODS FOR DETERMINING THE AMOUNT OF MARKET RISK IN THE CONTEXT OF SECURITIZATION EXPOSURE

The amount of the general market risk of the market risk related to securitization exposures is calculated using the internal model approach. The amount of the specific risk of the market risk related to securitization exposures is calculated using the standardized approach.

TYPE OF SECURITIZATION-PURPOSE-CONDUITS FOR SECURITIZATION TRANSACTIONS OF THIRD PARTIES' ASSETS, AND WHETHER THE BANK HOLDS RELATED SECURITIZATION EXPOSURE

The Bank securitizes third parties' assets using "trust" as a part of its businesses. However, the Bank does not hold related securitization exposure.

NON-CONSOLIDATED SUBSIDIARIES AND AFFILIATES WHO HOLD SECURITIZATION EXPOSURES RELATED TO THE BANK'S ORIGINATED SECURITIZATION TRANSACTIONS

No securitization exposures related to the Bank's originated securitization transactions are held by the Bank's non-consolidated subsidiaries and affiliates.

ACCOUNTING POLICY ADOPTED FOR SECURITIZATION TRANSACTIONS

(1) When assets to be securitized are owned by the Bank, securitization assets are removed from the balance sheet and assignment of gains and losses are calculated based on the financial component (zaimu-kousei-youso) approach.

The assets sold and retained interests are recognized as separate components of a transfer of financial assets. Those components in the transferred assets are measured by allocating the previous carrying amount between the assets sold and retained interests based on the relative fair values at the time of transfer. Based on the calculated values of assets that are sold, gains or losses on the transfer are recognized.

However, when assets are securitized for fundraising purposes, the book value to be credited on the balance sheet is adjusted in order to prevent generating any initial profits, after removing the assets from the balance sheet using the financial component approach.

(2) When the Bank purchases securitized products, Accounting Standards for Financial Products apply to each financial asset.

(3) Fee income earned by the Bank in arranging securitization for other parties (no investment) is treated as non-interest income.

QUALIFIED RATING AGENCIES WHOSE RATINGS ARE USED BY THE BANK IN DETERMINING SECURITIZED EXPOSURE TYPE-SPECIFIC RISK WEIGHTS:
S&P, Moody's, Fitch, R&I, and JCR.**SUMMARY OF INTERNAL VALUATION METHOD FOR SECURITIZATION**

The Bank is not using the internal valuation method for securitization.

SIGNIFICANT CHANGES OF QUANTITATIVE INFORMATION

There are no significant changes of quantitative information.

QUALITATIVE DISCLOSURE (CONTINUED)

9. MARKET RISK MANAGEMENT POLICIES AND PROCEDURES

a) POLICY AND PROCEDURE FOR RISK MANAGEMENT

(1) DEFINITION OF MARKET RISK

Market risk is the risk that makes loss by effect on balance sheet (including off balance sheet) fair value through fluctuations of various market risk factors in interest rates, FX rates, equities, and etc in trading businesses.

(2) MARKET RISK MANAGEMENT POLICY

For stipulating fundamental policies, frameworks and rules in trading businesses, the Executive Committee defines "Trading Business Risk Management Policy And Procedure." The Executive Committee also resolves qualitative limits of Value at Risk and Loss limit for the Bank and its Securities.

The Market Business Management Committee regularly controls market risk management and risk review of trading businesses. The Committee reviews individual limit settings, customer related business movement, profit and loss/market risk situation and inherent market products risk in the business as a whole and makes decision on risk management.

(3) MARKET RISK MANAGEMENT FRAMEWORK

We have established effective organizational framework for check and balance by making front office unit, back office unit and middle office management unit independent respectively. Each desk within the front office unit is assigned with limits.

Market Risk Management Division is responsible for the objective and timely recognition, monitoring and reporting of these market risks and carries out regular risk analysis and recommendations, as well as timely and appropriately providing management and front office unit.

(4) QUANTITATIVE MARKET RISK MANAGEMENT

The Bank is enhancing risk management by quantifying market risk, reporting it objectively, and making adjustments according to market situation on daily basis.

Market risk management is implemented by repetition of the following five-step process:

- First step : Construction of a transaction information database.
- Second step : Clarification of data according to the nature of the risk.
- Third step : Quantification of the risk based on the risk nature.
- Fourth step : Calculation and report of the overall risk.
- Fifth step : Appropriate adjustment and control based on the reported risk calculations.

To obtain a precise picture of the risk situation, transaction data must be accurate and complete. Measurement definitions must have clear rationale and valuation criteria such as rates and prices must be reliable. Market Risk Management Division is consistently responsible for risk measurement and its control stipulating its definitions and rules.

b) NAME OF METHODOLOGY FOR MARKET RISK MEASUREMENT

The internal-model method has been adopted for general market risk at market risk measurement and the standardized method for specific risk since March 31, 2007 for the Bank and Shinsei Securities. The standardized method is applied for FX related risks except Trading.

Market Risk Methodologies

		Trading	FX-related Risks except Trading
Shinsei Bank	General Market Risk	Internal Model Method • Historical Simulation Method	Standardized Method
	Specific Risk	Standardized method	
Shinsei Securities	General Market Risk	Internal Model Method • Historical Simulation Method	Standardized Method
	Specific Risk	Standardized Method	
Other Subsidiaries		—	Standardized Method

c) ADEQUATE PRICING METHOD ACCORDING TO TRANSACTION PROFILE TAKING POSSIBILITIES INTO CONSIDERATION THAT ACTUAL HOLDING PERIOD MAY EXCEED EXPECTED HOLDING PERIOD

The VaR framework is using this 10-day for holding period. Market liquidity of all trading book's products are high enough, and we evaluate adequately the pricing according to the products profile including the independent price valuation process.

d) INTERNAL MODEL METHOD AND BACK-TESTING, STRESS-TESTING

The Bank and Shinsei Securities use a historical simulation VaR for internal model at general market risk measurement (a 99% confidential level, 10 day holding period, 250 observation days). Please refer to following table for VaR data.

(VaR data table) VaR amounts as calculated at the end of March 2013 together with the high, mean and low VaR in this fiscal year (99% confidence level, 10 day holding period).

QUALITATIVE DISCLOSURE (CONTINUED)

	Millions of yen	
	Consolidated	Non-consolidated
VaR at the end of year	1,642	1,627
through FY		
High	2,770	2,724
Mean	1,539	1,498
Low	1,053	988

We have added Stress VaR to previous mentioned VaR for Basel capital requirement calculation since as of 2011 December end. Please refer to following table.

Stressed VaR amounts as calculated at the end of March 2013 together with the high, mean and low VaR in this fiscal year (99% confidence level, 10 day holding period).

	Millions of yen	
	Consolidated	Non-consolidated
Stressed VaR at the end of year	3,727	3,681
through FY		
High	5,962	5,685
Mean	3,588	3,472
Low	2,241	2,116

The validity of the VaR is verified through back-testing etc., which examines how frequently actual daily loss exceeds VaR for a one-day holding period. The back-testing results for fiscal year 2012 show that the number of days in which loss amount exceeded VaR for a one-day holding period on a consolidated basis was one.

For complementing the Internal Model method and figuring out loss possibility at stress, the Bank implements stress testing on a weekly basis. And the stress test results are reported to the Market Business Management Committee and etc.

e) INTERNAL MODEL SUMMARY IN CASE THAT INCREMENTAL RISK IS MEASURED BY INTERNAL MODEL
Not applicable.

f) INTERNAL MODEL SUMMARY IN CASE THAT COMPREHENSIVE RISK IS MEASURED BY INTERNAL MODEL
Not applicable.

g) ASSUMPTIONS AND VALUATION METHOD FOR INTERNAL EVALUATION OF CAPITAL SUFFICIENCY ON MARKET RISK

When we evaluate capital sufficiency for market risk using risk capital, we convert the above mentioned VaR calculation method into a one year horizon basis.

10. LIQUIDITY RISK MANAGEMENT

Liquidity risk management is implemented by the ALM Committee, by its approval of liquidity gap structure limits (limits for required funding amount on contract maturity basis) and minimum liquidity reserve levels. In addition, liquidity stress test is implemented monthly and reported to the ALM Committee.

Liquidity gap limit and minimum liquidity reserve level compliance is daily monitored by Market Risk Management Division and reported to the management. On the liquidity stress test implemented by Market Risk Management Division stress scenarios are reviewed at the ALM Committee in periodical manner for its appropriateness.

Liquidity management framework, including these monitoring and test implement, is defined by the "Cash Liquidity Risk Management Policy" and is periodically reviewed.

11. BANKING BOOK INTEREST RATE RISK MANAGEMENT

a) Risk management policy and procedure

(1) Interest Rate Risk Management policy and procedure

The Bank's risk management of banking book assets and liabilities, which bears interest rate risk, is managed based on "Asset Liability Management Policy for Banking Account." In addition to daily risk monitoring, the ALM Committee meets on a monthly basis, in principle, in order to provide management with timely and appropriate reports on interest rate risk situation and etc., and reviews / makes decisions on ALM strategy and related topics.

Various limits are also set for ALM interest rate risks on assets and liabilities and monitored appropriately.

For banking book interest rate risk management, limits, scenario analysis and net interest income simulation are used for risk monitoring to evaluate the impact on assets and liabilities.

(2) Outlier criteria and stress scenarios

In the context of the outlier criteria for the second pillar of Basel Regulation, the Bank has adopted a 2% shift scenario. This measures fluctuation in the value of assets and liabilities on the banking book as a result of a 2% interest rate shock. This scenario is consistent with the 100bpv, which is used for internal control purposes.

(3) Calculation method for interest rate risk

Following assumptions are set for interest rate risk management.

QUALITATIVE DISCLOSURE (CONTINUED)

- Housing loan prepayments

The Bank estimates interest rate risk using the cash flows derived from an internal hazard model for housing loans, considering historical prepayment.

- Definition of core deposits

Retail saving deposits and 2 week maturity deposits are regarded as core deposits. The Bank has adopted an internal model for the maturity of core deposits and estimates maturities of ordinary deposits by customer criteria.

The parameters and models for core deposits are reviewed as timely and appropriately.

b) Banking book interest rate risk calculation method by consolidated subsidiaries for internal management purpose

Consolidated subsidiaries' risks are managed under the supervision of the ALM Committee.

Interest rate risk at consolidated subsidiaries, which have interest rate-sensitive assets and liabilities, are calculated based on each subsidiary's interest rate risk management method. The Bank calculates interest rate risk on consolidated basis using them and conducts risk management by monitoring them.

The change in economic values for applied interest rate shock of 2% in the banking book at the end of March 2013:

	Billions of yen	
	Consolidated	Non-consolidated
JPY	¥ (73.3)	¥ (45.0)
USD	(0.7)	(0.7)
Other	(2.9)	(2.9)
Total	¥ (77.1)	¥ (48.8)

12. OPERATIONAL RISK MANAGEMENT POLICIES AND PROCEDURES

MANAGEMENT POLICIES AND PROCEDURES

(1) Definition of Operational Risk

The Bank classifies operational risk into several risk categories, such as operational and administrative risk, compliance risk, labor-related risk, systems risk, extensive disaster risk and material object risk, which are applied across the Bank and its consolidated subsidiaries.

(2) Operational Risk Management System

The Bank manages operational risk at multiple levels as follows:

- Management by business lines according to the nature of each business

- Cross-organizational management by designated management divisions for respective risk categories mentioned above (hereinafter "designated management divisions") and by the firm-wide management division of operational risk (hereinafter "firm-wide management division")
- Verification by Internal Audit Division on the appropriateness and effectiveness of the overall risk management system
- Based on reports and proposals, the Board of Directors etc. makes decisions on important items, including general rules and organizational changes related to operational risk management

The designated management divisions and the firm-wide management division are independent from business lines, which are accountable for earnings, and promoting management of overall operational risk and each risk category. The divisions develop uniform management standards and procedures, capture and evaluate errors and irregularities, conduct causal analysis and support establishment of recurrence prevention measures. Moreover, the divisions meet on a monthly basis to discuss challenges and measures for operational risk management, as well as to share information.

Operational risk is recognized and evaluated through review of internal errors and irregularities that have occurred, as well as through consideration of potential errors and irregularity scenarios that may occur less frequently but may have a significant impact. Uniform standards for collection and evaluation of errors and irregularities are established to capture and/or evaluate significant actual errors and/or irregularities on a regular basis. Procedures are determined to ensure that potential errors and irregular scenarios for each business operation are specified and their frequency and severity are evaluated in a complete and appropriate manner on an at least an annual basis.

Such identified and evaluated risks are reported to senior management by the designated management divisions and the firm-wide management division and are used in Risk Capital measurement for internal management purposes.

(3) "Operational Risk Management Standards"

"Operational Risk Management Standards" are a set of policies and procedures used to define the organizational framework, specific methods and processes for operational risk management. They are composed of the following:

- "Operational Risk Management Policy"
- Specific management rules
- Management rules at consolidated subsidiaries

QUALITATIVE DISCLOSURE (CONTINUED)

“Operational Risk Management Policy” is the highest set of rules on operational risk management. To ensure comprehensive and consistent operational risk management within the Bank Group, the Policy establishes risk definitions, governance and basic policies on operational risk management, and the basic framework for risk capture, evaluation, monitoring, reporting, control and mitigation.

Specific management rules include management standards and procedures for each respective operational risk category, and for new businesses and products.

Management rules at each consolidated subsidiary are composed of comprehensive rules on overall operational risk management and specific rules for respective operational risk categories. Consolidated subsidiaries establish, revise and repeal rules with the approval of their Board of Directors, according to their risk characteristics and specific internal controls. Their establishment, revision and repeal are subject to prior discussions with and after-the-fact reports to the Bank to ensure consistency with the Bank’s risk management rules.

METHODOLOGY TO CALCULATE OPERATIONAL RISK UNDER BASEL REGULATION

The Standardized Approach is adopted by the Bank.

Amount of required capital for Operational Risk at the end of fiscal year 2012:

	Millions of yen	
	Required capital amount (Consolidated)	Required capital amount (Non-consolidated)
The Standardized Approach	¥ 29,487	¥ 13,797

QUALITATIVE DISCLOSURE (CONTINUED)

EXHIBIT: SUMMARY OF INTERNAL RATING SYSTEM

Type of Exposures		Shinsei Bank (Non-Consolidated)	
		(a) Corporate Exposures, (b) Sovereign Exposures, (c) Exposures to Banks, and (d) Equity Exposures (Exposures to which Internal Rating and PD/LGD approach is applied)	(e) Specialized Lending
Type of Internal Rating Approaches to be Used		<ul style="list-style-type: none"> • Obligor rating based on the rating estimation model • Facility rating based on the obligor ratings/expected losses 	Facility rating considering financial indices and risk assessment of assets and the business
Structure of Internal Rating System	Summary of Rating System	<p>For corporate exposures, the Bank uses an internal obligor rating system with the following characteristics:</p> <ul style="list-style-type: none"> • Increasing model accuracy and reflecting appropriate qualitative factors • Benchmarked against external ratings • Ensuring conformity with rating systems among industry classifications <p>Obligor ratings are used in the standards of credit approval procedures and portfolio controls, and are the foundation for credit risk management. Furthermore, the Bank also applies a facility rating system based on expected losses that allows for improvement in the credit status, such as collateral and/or covenants, from the perspective of obligor rating and the credit status of individual transactions.</p>	<p>A rating system based on the transaction type is in place for special assets such as real-estate non-recourse loans and project finance whose interest payments and principal repayments are heavily dependent on the profit of assets and the business.</p> <p>Ratings for real-estate non-recourse loans are decided by adding qualitative adjustments to quantitative ratings based on the LTV.</p> <p>Ratings for project finance are decided by comprehensively considering financial indices such as DSCR and the assessment of each risk factor that has an impact on the operation of the project.</p>
	Obligor Rating (Corporate) Facility Rating (Corporate)	<p>Obligor Rating</p> <p>i) Model score: A quantitative model score is derived based on the financial data of a customer by applying a neural network model prepared by using external ratings as a benchmark. Financial data from "Nikkei Needs Financial Information" and "Shinsei Financial Analysis System Data" were used for calculation of model scores.</p> <p>ii) Verification of reliability of obligor financial data.</p> <p>iii) Overall adjustment: Unrealized profit or loss future financial projection, etc.</p> <p>Obligor ratings for Sovereign/Bank exposures are assigned based on specific rules as "Obligors Subject to Special Treatment."</p> <p>Facility Rating</p> <p>Derived on the basis of expected loss rate by taking into account the following factors.</p> <p>i) Probability of Default (PD) corresponding to an obligor rating/term of credit.</p> <p>ii) Loss Given Default (LGD) corresponding to the status of credit enhancement of a facility.</p> <p>Facility rating system is not implemented for equity exposures.</p>	<p>Facility Rating</p> <p>A facility rating which represents the size of the expected loss in each transaction is assigned under the aforementioned framework.</p>
Usage of Various Estimated Values (Use Test)		<p>Facility rating is derived and assigned based on Expected Loss (EL) calculated from the PD corresponding to the credit rating.</p> <p>EL using the foregoing PD is also applied to pricing.</p> <p>PDs are used for calculating and allocating Risk Capital.</p> <p>No specific pricing rule with PD/LGD Approach for Equity exposures.</p>	In the rating system, a rating derived in accordance with the above is also used for credit assessment of a transaction.
Management of Internal Rating System and Validation Procedures	Management of Internal Rating System, and Rating Assignment Procedures	<p>Portfolio and Risk Management Division (PRMD: Credit Risk Control Section) of the Bank is in charge of designing the rating system and ratings are assigned by the Credit Rating Review Committee.</p> <p>PRMD is in charge of estimation and validation of parameters.</p> <p>Internal Audit Division (IAD) of the Bank audits all these processes.</p>	<p>Credit Risk Management Section (CRMS) of the Bank and PRMD of the Bank are jointly in charge of the design and validation of the rating system.</p> <p>Ratings are assigned by the Credit Rating Review Committee or CRMS of the Bank depending on the transaction type.</p> <p>IAD audits all these processes.</p>
	Validation Procedures	<p>Quantitative Validation</p> <p>Model ratings and final credit ratings are validated in a manner as multifaceted as possible using Shinsei Bank data, Showa Leasing data and external databases.</p> <p>1) Back Testing: using historical data, credit ratings goodness of fit, and Accuracy Ratio (AR) by segments, such as industry and sales scale, are validated.</p> <p>2) Benchmarking: Comparison between internal and external ratings and mapping analysis are performed for the obligors with external ratings.</p> <p>Qualitative Validation</p> <p>Examinations of the newly defaulting obligors and rating transition analyses are conducted, and operations of individual assessments are examined.</p>	Based on the type and actual default of transactions, back testing and rating transition analyses are conducted in order to verify the reasonability of the rating and appropriateness of the rating process.
Estimation of Parameters		<p>PDs of corporate exposures are estimated by defining a default as the case obligor categorization under self assessment falls to sub-standard (9B) or lower, etc.</p> <p>The data used for estimation are as follows:</p> <p>1) Characterization of the Bank's internal data: Observation period is from end of March 2001, and population is obligors with loan exposures in (a) - (c).</p> <p>2) Estimated PD data of the population that is treated as the corporate exposures at Showa Leasing (observation period: from end of March 2003).</p> <p>3) For obligors at 3 rank or higher where track record of default is scarce, the PDs are estimated based on cumulative default rates from internal data, corporate bond spreads and data published by external rating agencies.</p> <p>4) For Sovereign exposures, estimated PD for 0A and 1A is 0.00% and 0.01% respectively for required regulatory capital calculation purposes.</p>	Internal ratings are allocated to slotting criteria, and parameters are not estimated.

QUALITATIVE DISCLOSURE (CONTINUED)

EXHIBIT: SUMMARY OF INTERNAL RATING SYSTEM

Type of Exposures		Shinsei Bank (Non-Consolidated)	Showa Leasing
		(f) Purchased Residential Mortgage Exposures (A portion is classified as Purchased Other Retail Exposures)	(g) Exposures to Corporate, etc.
Type of Internal Rating Approaches to be Used		Pool classification by portfolio and by delinquency status	Obligor rating based on a rating estimation model Facility rating based on an obligor rating/ expected loss
Structure of Internal Rating System	Summary of Rating System	These exposures are housing loans originated by lenders other than the Bank, and purchased as portfolios by the Bank. Pools are classified on a portfolio basis and delinquency basis. Business purpose loans collateralized by real estate to retail customers are classified as purchased other retail exposures or purchased corporate exposures.	An obligor rating system has been introduced that is identical to the system used at the Bank. Facility ratings based on EL for each transaction are established.
	Obligor Rating (Corporate) Facility Rating (Corporate) Pool Classification (Retail)	Pool Classification Normal, Delinquent and Default pools are established for each portfolio.	Obligor Rating Same as (a) (b) and (c). Facility Rating The facility rating is established based on the EL of each transaction by reflecting the characteristics of risk profile of a transaction as well as the risk profile of an obligor.
Usage of Various Estimated Values (Use Test)		PDs and LGDs are used for calculating and allocating Risk Capital.	<ul style="list-style-type: none"> The facility rating is assigned based on EL using PD corresponding to the credit rating. EL using PD is also applied to pricing. PDs are used for calculating and allocating Risk Capital.
Management of Internal Rating System and Validation Procedures	Management of Internal Rating System, and Rating Assignment Procedures	Credit Risk Management Section (CRMS) of the Bank is in charge of rating system design and pool assignment. CRMS of the Bank estimates/validates parameters with support by PRMD of the Bank. IAD audits all these processes.	PRMD of the Bank and Credit Risk Management Section (CRMS) of the Company are jointly responsible for the design of the rating system, and CRMS of the Company is in charge of rating assignment. PRMD of the Bank is in charge of the final approval process of parameter estimation and validation. Audit Division (AD) of the Company and IAD of the Bank jointly audit all these processes.
	Validation Procedures	PD Binominal test, comparison with track record of defaults in other housing loan portfolios. LGD Validation if estimated LGDs remain within a certain confidence level, and comparison with the track record of loss rate in other housing loan portfolios.	Same as (a) (b) and (c).
Estimation of Parameters		Definition of Default Any of the following: i) three month delinquency, ii) relaxation of terms and conditions, iii) legal bankruptcy, iv) payment in subrogation by guarantors, etc. PD PDs are estimated based on historical data of each purchased housing loan portfolio. Period before loan purchase is also included in data observation period. LGD LGDs are estimated based on historical data of each purchased housing loan portfolio. EAD EAD for on-balance sheet items is the outstanding balance of beneficiary interest in trust. EAD for off-balance sheet items is zero, since no undrawn amount exists.	Default is defined as any of the following: i) three month delinquency, ii) relaxation of terms and conditions, iii) legal bankruptcy, iv) Special Supervision or lower in self assessment of assets, etc. PD estimation process is same as (a) (b) and (c).

QUALITATIVE DISCLOSURE (CONTINUED)

EXHIBIT: SUMMARY OF INTERNAL RATING SYSTEM

Type of Exposures		Showa Leasing	APLUS FINANCIAL, APLUS, APLUS PERSONAL LOAN, and Zen-Nichi Shinpan
		(h) Other Retail Exposures	(i) Residential Mortgage/Qualifying Revolving Retail/Other Retail Exposures
Type of Internal Rating Approaches to be Used		Pool classification based on a matrix of obligor and transaction attributes and delinquency	Pool classification based on a matrix of obligor and transaction attributes and delinquency
Structure of Internal Rating System	Summary of Rating System	Small-lot lease receivables to corporate obligors in the Company are managed on a pool basis, and are treated as "retail" exposures. A credit rating is assigned to each obligor based on such factors as whether equity of obligor is listed or not, size of annual income, length of business history, credit score assigned by a credit agency. In addition, classification by type of asset leased is also implemented.	Main portfolio of the Group (APLUS FINANCIAL (including APLUS and APLUS PERSONAL LOAN), and Zen-Nichi Shinpan) is installment credit receivable, classified as other retail exposures. Credit is also extended through credit/loan cards, part of which are classified as qualifying revolving retail exposures. The Group retains but no longer originates housing loans. R-rating is assigned to each exposure of APLUS. R-ratings are risk grades based on obligor attributes, borrowing behavior information provided by credit information agencies and transaction history with the Company. For installment credit receivables, pool classification is also determined by type of asset being financed. For card exposures, card type, and situation of card utilization etc. is employed as criteria of pool classification. In APLUS FINANCIAL, a holding company, and APLUS and APLUS PERSONAL LOAN, subsidiaries, risks are managed comprehensively by APLUS FINANCIAL, as well as in each company, and major Credit Risk Management Standards, pool classification and parameter estimates are shared by these 3 companies. In Zen-Nichi Shinpan, which started adopting Foundation IRB from the end of March 2010, pool classification is established by portfolio such as installment credit receivables and card exposures.
	Pool Classification (Retail)	Criteria for pool classification are i) credit rating, ii) type of asset leased, and iii) obligor classification including delinquency.	Key criteria for pool classification are as follows: i) Obligor attributes such as R-rating ii) Transaction attributes such as type of assets financed for installment credit receivables, or situation of card utilization etc. for card exposures iii) Delinquency
Usage of Various Estimated Values (Use Test)		PDs and LGDs are used for calculating and allocating Risk Capital. For pricing purposes, PDs and LGDs, which are derived assuming that defaulted exposures do not recover to non-default status, are utilized.	PDs, LGDs and Credit Conversion Factors (CCFs) are used for calculating and allocating Risk Capital.
Management of Internal Rating System and Validation Procedures	Management of Internal Rating System, and Rating Assignment Procedures	CRMS of the Company and PRMD of the Bank are jointly in charge of the rating system design. Business Divisions/Branches of the Company assign exposures to pools, and CRMSs confirm and oversee pool assignment. CRMS and PRMD of the Bank jointly estimate and validate parameters, based on data provided by the Company. AD of the Company and IAD of the Bank jointly audit all these processes.	CRMS of the Group and PRMD of the Bank are jointly in charge of the rating system design. Business Divisions/Branches of the Group assign exposures to pools, and CRMS confirms and oversees pool assignment. CRMS and PRMD of the Bank jointly estimate and validate parameters, based on data provided by the Group. Internal Audit Section of the Group and IAD of the Bank jointly audit all these processes.
	Validation Procedures	PD Binominal test and verification of PDs and ratings goodness of fit. LGD Validation if estimated LGDs are remaining within a certain confidence level. Pool Classification Validation by Accuracy Ratio (AR).	PD Binominal test and verification of PDs and ratings goodness of fit. LGD Validation if estimated LGDs are remaining within a certain confidence level. Pool Classification Validation by Accuracy Ratio (AR).
Estimation of Parameters		Definition of Default Any of the following: i) three month delinquency, ii) relaxation of terms and conditions, iii) legal bankruptcy, iv) Special Supervision or lower in self assessment of assets, etc. PD PDs are estimated on the Company's historical data. LGD LGDs are estimated on the Company's historical data. EAD EAD on on-balance sheet items is defined as outstanding balance in compliance with U.S. Financial Accounting Standards Board (FASB). EAD for off-balance sheet items is zero, since no undrawn amount exists. Data Observation Period From April 2002 (from April 2005 for PD).	Definition of Default Any of the following: i) three month delinquency, ii) relaxation of terms and conditions, iii) legal bankruptcy, etc. PD PDs are estimated using the Group's historical data. LGD LGDs are estimated using the Group's historical data. EAD EAD on on-balance sheet items is the outstanding amount of principal plus uncollected commissions/interest/guarantee fee. EAD for off-balance sheet items is calculated by committed line amount of card exposures multiplied by Credit Conversion Factors (CCFs). CCFs are estimated for each card type, using historical data of the Group. Data Observation Period From April 2001 for installment credit receivables and card exposures of APLUS.

QUALITATIVE DISCLOSURE (CONTINUED)

SHINSEI BANK CORPORATE OBLIGOR RATING SYSTEM

Obligor Rating Categories	Corresponding Rating Assigned by R & I	Summary
0A	/	1. Japanese Government, BOJ 2. Government-affiliated agencies, expected high certainty from strong backup by the Government.
1A	AAA	Highest capability to meet its financial commitments on the obligations and many other positive factors.
2A	AA+	Very high capability to meet its financial commitment on the obligation and other positive factors.
2B	AA	
2C	AA-	
3A	A+	
3B	A	
3C	A-	High capability to meet its financial commitments on the obligations and some good factors.

DISCLOSURE ITEMS CONCERNING REMUNERATION, ETC.**1. MATTERS CONCERNING THE SITUATION OF SETTING UP AN ORGANIZATIONAL STRUCTURE REGARDING REMUNERATION, ETC. FOR APPLICABLE OFFICERS AND EMPLOYEES OF SHINSEI BANK (GROUP)**

(1) Scope of "Applicable Officers and Employees"

The scopes of "Applicable Officers" and "Applicable Employees" (collectively, "Applicable Officers and Employees") prescribed in the announcement on remuneration subject to disclosure are as shown below.

1) Scope of "Applicable Officers"

Applicable Officers refer to the Directors and Statutory Auditors of Shinsei Bank, excluding outside Directors and outside Statutory Auditors.

2) Scope of "Applicable Employees, etc."

At Shinsei Bank, "Applicable Employees, etc." who are subject to disclosure refer to the "persons who receive a large

amount of remuneration, etc." and who have a material impact on business operation or the situation of assets of Shinsei Bank and its major consolidated subsidiaries, etc. among the officers and employees of Shinsei Bank and officers and employees of its major consolidated subsidiaries, etc., excluding Applicable Officers.

(a) Scope of "major consolidated subsidiaries, etc."

Major consolidated subsidiaries etc. refer to the subsidiaries that are independently mentioned in the business report and consolidated financial statements and which are important for the operation of the Shinsei Bank Group, taking into account the significance of their impact on the financial conditions and business results of the Shinsei Bank Group. More specifically, they refer to the following six companies. While there are three consolidated subsidiaries, etc. with total assets accounting for 2% or more of consolidated total asset, all of those three companies are included in the following six companies.

DISCLOSURE ITEMS CONCERNING REMUNERATION, ETC. (CONTINUED)

Shinsei Trust & Banking Co., Ltd.
 Shinsei Securities Co., Ltd.
 APLUS Financial Co., Ltd.
 Showa Leasing Co., Ltd.
 SHINKI Co., Ltd.
 Shinsei Financial Co., Ltd.

- (b) Scope of the “persons who receive a large amount of remuneration, etc.”

The “persons who receive large remuneration, etc.” refer to the persons who receive remuneration, etc. at the amount equal to or above the “average amount of remuneration paid to Applicable Officers (which was 40 million yen in the fiscal year reported).” In the fiscal year reported, there were five Applicable Employees who receive remuneration at the amount equal to or above the “average amount of remuneration paid to Applicable Officers.”

With respect to lump-sum retirement allowances, the amount calculated by deducting from the amount of remuneration etc. the entire amount of the lump-sum retirement allowance and then adding the “amount obtained by dividing the lump-sum retirement allowance by the number of years of service” shall be deemed as the amount of remuneration, etc. for the relevant person in making judgment as to whether the said person is a “person who receives a large amount of remuneration, etc.”

- (c) Scope of the “persons who have a material impact on business operation or the situation of assets of the Shinsei Bank Group”

The “persons who have a material impact on business operation or the situation of assets of the Shinsei Bank Group” refer to the persons who, in their normal duties, execute transactions and manage matters which have a significant degree of impact on the business operation of Shinsei Bank, Shinsei Bank Group, and its major consolidated subsidiaries, etc. or who have a material impact on the situation of assets through losses incurred in transactions, etc. More specifically, these include the Executive Officers and persons in similar positions at Shinsei Bank, and Directors, Executive Officers, etc. of its major consolidated subsidiaries.

In the fiscal year reported, there were five Applicable Employees who fell under (b). All of them were considered to be “persons who have a material impact on business operation or the situation of assets of the Group.”

- (2) Determination of remuneration, etc. for Applicable Officers and Employees

- 1) Determination of remuneration, etc. of Applicable Officers
 At Shinsei Bank, the General Meeting of Shareholders deter-

mines the total maximum amount of remuneration paid to its officers (for Directors: up to 180 million yen a year (of this amount, 50 million yen is for outside directors); for Statutory Auditors: up to 60 million yen a year). The allocation to each individual of the remuneration of Directors approved at the General Meeting of Shareholders is left to the discretion of the Board of Directors. The allocation to each individual of the remuneration for Statutory Auditors is left to the consultations among Statutory Auditors.

- 2) Determination of remuneration, etc. of Applicable Employees, etc.

Remuneration, etc. paid to employees of the Shinsei Bank Group is determined and paid under the remuneration system designed based on the management policy and human resources policy of Shinsei Bank and its major consolidated subsidiaries, etc. Such remuneration system is designed and documented by the Human Resources Divisions, etc. of Shinsei Bank and its major consolidated subsidiaries, etc., which are independent from business promotion groups. Furthermore, policies regarding salaries, etc. of Shinsei Bank’s major consolidated subsidiaries, etc. are reported to the Human Resources Division of the Bank on a periodical basis for the said Division to check their contents.

2. MATTERS CONCERNING THE EVALUATION OF THE APPROPRIATENESS OF THE DESIGN AND APPLICATION OF THE SYSTEM RELATED TO REMUNERATION, ETC. FOR APPLICABLE OFFICERS AND EMPLOYEES OF SHINSEI BANK (GROUP)

- (1) Policy on remuneration, etc.

1) Policy on remuneration, etc. for “Applicable Officers”
 Remuneration for Applicable Officers of Shinsei Bank is determined at the Board of Directors attended by four outside Directors, Standing Statutory Auditors, and two outside Statutory Auditors, based on an appropriate evaluation of the responsibilities, and contributions to the Bank’s performance, of each officer in his/her duties and sufficient discussions taking into account the Bank’s business results, market standards, etc.

2) Policy on remuneration, etc. for “Applicable Employees, etc.”
 Remuneration for Applicable Employees of the Shinsei Bank Group is determined based on performance evaluation against individual targets which are broken down under the quantitative and qualitative business plan prepared with a medium- to long-term viewpoint. With its emphasis on both medium- and long-term quantitative targets and achievement against qualitative targets, our system enables evaluations that do not excessively rely on short-term results.

DISCLOSURE ITEMS CONCERNING REMUNERATION, ETC. (CONTINUED)

3. MATTERS CONCERNING CONSISTENCY BETWEEN THE SYSTEM FOR REMUNERATION, ETC. OF APPLICABLE OFFICERS AND EMPLOYEES OF SHINSEI BANK (GROUP) AND RISK MANAGEMENT AND THE LINKAGE BETWEEN REMUNERATION, ETC. AND BUSINESS RESULTS

When determining remuneration, etc. of Applicable Officers, the total amounts of remuneration payable to Directors and Statutory Auditors are each determined at the General Meeting of Shareholders, while the amount of remuneration, etc. payable to each Director and Statutory Auditor is determined at the Board of

Directors or through consultations among Statutory Auditors, respectively. Furthermore, remuneration, etc. of Applicable Employees is determined taking into account the financial conditions, etc. of each member company of the Shinsei Bank Group.

While business results are taken into account in determining remuneration, etc. of Applicable Officers and Employees of the Shinsei Bank Group, the portion of performance-based remuneration, etc. paid to Applicable Officers and Employees is very small. Accordingly, we cannot say that our remuneration system is linked to performance. Also, our remuneration system will not have a negative impact on risk management.

4. MATTERS CONCERNING TYPES, TOTAL AMOUNT PAYABLE, AND PAYMENT METHOD OF REMUNERATION, ETC. FOR APPLICABLE OFFICERS AND EMPLOYEES OF SHINSEI BANK (GROUP)

Total amount of remuneration, etc. for Applicable Officers and Employees (from April 1, 2012 to March 31, 2013)
(For both consolidated / and non-consolidated bases)

Category	Number of people	Total amount of remuneration, etc. (in million yen)	Total amount of fixed remuneration				Total amount of variable remuneration				Retirement allowance	Other
			Basic remuneration	Stock option given as compensation	Other	Basic remuneration	Bonus	Other				
Applicable Officers (excl. outside officers)	4	144	128	128	0	0	13	0	13	0	3	0
Applicable Employees, etc.	5	400	365	167	10	188	10	0	10	0	25	0

- Notes: (1) Because Applicable Employees, etc. only include employees of Shinsei Bank, the figures on consolidated and non-consolidated bases are the same.
(2) Applicable Officers include four people in total consisting of two fulltime Directors, one Standing Statutory Auditor, and one Standing Statutory Auditor who resigned during the fiscal year reported.
(3) The amount of remuneration paid to Applicable Officers includes remuneration paid during the fiscal year reported; that is, remuneration paid to them as employees before being appointed as officers and remuneration paid to them as employees after resigning as officers.
(4) The total amount of remuneration paid to fulltime officers (fulltime Directors and Standing Statutory Auditors), excluding remuneration paid when they were employees, was 120 million yen (including bonuses paid to Executive Officers). The average number of the payees during the year was three and the average amount of remuneration paid to fulltime officers was 40 million yen.
(5) Five people who received remuneration at or over 40 million yen as shown in the certificate of income and withholding tax were identified as Applicable Employees, etc. The table shows the amount of remuneration paid to these five people during the fiscal year reported (April 2012 to March 2013).
(6) Specific comments on the breakdown of remuneration are as below.
1) Fixed remuneration
• Stock option given as compensation
This refers to the amount posted as expenses during the fiscal year reported with respect to stock options granted in previous years.
• Other
This refers to the amount posted as the reserve during the fiscal year reported with respect to deferred remuneration based on contracts concluded in previous years and bonuses which payment is guaranteed.
2) Variable remuneration
• Bonuses
This refers to the bonuses paid during the fiscal year reported.
3) Retirement allowance
This refers to the amount posted as retirement benefit expenses (service cost) for applicable persons and severance pay during the fiscal year reported.
(7) The exercise periods of stock options granted as compensation are as shown below.

	Exercise period	
Shinsei Bank, Ltd. 1st Warrant	From July 1, 2006 to June 23, 2014	From July 1, 2007 to June 23, 2014
