9 Net Income attributable to owners of the parent company	44.2	38.4	(13%)	(5.8)

1. Total Revenue

**+JPY 17.3bn (+20%)
year-on-year**

- Net Interest Income: Increased margins in both institutional and individual businesses, as well as stronger interest income from Securities Investments, including CLO, RMBS etc. and Japanese government bonds
- Noninterest Income: Increased due to higher stable earnings, as well as contributions from diversified revenue sources, including securitization, capital gains, and inorganic growth.

2. Expenses

**Expense ratio improved to 43.5%
(vs. 50.2% in the previous fiscal year)**

- Expenses increased slightly year-on-year, primarily due to higher system-related costs

4. Net Credit Costs

Remained at a low level

- Net credit costs remained under control, supported by the accumulation of high-quality assets under appropriate credit risk management, in line with the previous fiscal year

8. Income Taxes

**(JPY 21.0bn)
year-on-year**

- In the previous fiscal year, income tax decreased due to an increase in deferred tax assets resulting from an extension of the estimated period for future taxable income
- In the current fiscal year, tax loss carryforwards were fully utilized as a result of continued profit generation. Consequently, the tax rate increased

(2) Profit and Loss ① Net Interest Income

(Unit : JPY bn)

- Net Interest Income increased significantly to JPY 47.1bn, up 52% year-on-year
- Higher asset yields from the rising interest-rate environment continued to drive improvement in Net Interest Income

1 Financial Summary

(2) Profit and Loss ② Interest Rates on JPY Loans* (Unit : JPY tn, %)

- Interest rates on institutional loans increased to 1.52%, in line with the policy rate hikes
- Housing loan rates rose to 1.04% (+35bps) following the interest rate revision implemented in May 2026

Trend in JPY Loan Rates

Balance by interest Rate Type (as of the end of June 2026)

* Attributed to the Bank only, rates represent weighted averages applied to lending and deposit balances as of each EOM, calculated based on the respective outstanding balances

(2) Profit and Loss ③ Noninterest Income

(Unit : JPY bn)

- Profit increased, driven by growth in leasing and installment sales income as well as fee income (including housing loans, APLUS, and institutional businesses), in addition to gains from securities investments and the recognition of negative goodwill from inorganic initiatives
- Since joining the SBI Group, noninterest income has increased every fiscal year

Noninterest Income by Revenue

Trend in Noninterest Income

*Investment recoveries from private equity operations and gains on the sale of equities in the securities investment business

1

Financial Summary

(2) Profit and Loss ④ Expenses and Expense Ratio

(Unit : JPY bn)

- Expense ratio improved significantly year-on-year to 43.5%. While total revenue increased, expenses remained well controlled
- Expenses increased slightly year-on-year, mainly due to higher personnel and system-related expenses

Personnel Expenses, Property Expenses, and Expense Ratio

Improved Profitability through Operational Efficiency

- Net credit costs remained at a low level, supported by continued disciplined risk control
- Credit cost ratio*1 remained at a low level of 0.06%

Trend in Net Credit Costs

(4) Enhancing ROE, Introduction of Interim Dividend Policy (Unit : JPY bn)

- Steady execution of our capital management strategy, driving solid quarterly earnings and improving ROE to 12.6%
- **Interim dividend policy has been determined since this fiscal year**, aiming to enhance flexibility of shareholder returns due to a significant increase of the number of shareholders
 - **Interim dividend forecast at JPY 10 per share for FY2026**
- Considering solid earnings progress, we aim for **annual dividend forecast of JPY 42 per share or more. DPS of JPY 42 is the level paid in the previous fiscal year**

*1 ROE Calculation formula (same as TSE definition):

Net income attributable to owners of the parent

$$\frac{\{(Total\ net\ assets\ at\ the\ beginning\ of\ the\ period - Stock\ acquisition\ rights\ at\ the\ beginning\ of\ the\ period - Noncontrolling\ interests\ at\ the\ beginning\ of\ the\ period) + (Total\ net\ assets\ at\ the\ end\ of\ the\ period - Stock\ acquisition\ rights\ at\ the\ end\ of\ the\ period - Noncontrolling\ interests\ at\ the\ end\ of\ the\ period)\}}{2}$$

*2 Annualized basis (numerator: three months of net income annualized)

(5) Profit and Loss by Business Segment Institutional Business Results

(Unit : JPY bn)

- Net interest income increased significantly, driven by balance growth in Corporate Business and Structured Finance Business, as well as improved yields in Corporate Business
- Noninterest income decreased mainly due to the absence of investment recoveries in the Private Equity Business that were recorded in the same period of the previous fiscal year

	Institutional Business

Changing External Environment

(3) Emergence of Next-Generation Finance

- On-chain finance is advancing through the implementation of both digital money and digital assets

Implementation of Digital Money and Next-Generation Payment Systems

- ✓ Diversification of digital money options (including stablecoins, tokenized deposits, and CBDCs)
- ✓ Integration of existing payment networks with digital infrastructure (supporting stablecoin payments via Visa and Mastercard)
- ✓ Preparations for the practical implementation of cross-border and corporate payments (initiatives by three megabanks and SWIFT)
- ✓ Progress in regulatory development (including the enforcement of the amended Payment Services Act)

Integration of Digital Assets into Financial Markets

- ✓ Expansion of tokenizable assets (from real estate and corporate bonds to funds, RWAs, and more)
- ✓ Evolution from issuance-centric activities to comprehensive market development including secondary trading and settlement (ODX's ST secondary market, "START")
- ✓ Delivery-versus-Payment (DvP) Settlement of Digital Assets and Digital Money (proof of concept for DvP settlement of security tokens (STs) using tokenized deposits)
- ✓ Development of Markets as Platforms for Investment and Fundraising (transition of crypto assets to the regulatory framework of the Financial Instruments and Exchange Act (FIEA))

On-chain finance, which enables the issuance, trading, and settlement of money and financial assets on a digital ledger through an integrated process, is moving from the proof-of-concept stage to integration into mainstream financial services

Higher-Quality Growth

(1) Enhancing Profit of Stock Businesses

① Strengthening the Funding Base

(Unit : JPY tn)

- SBI Hyper Deposits expanded to approximately **580 thousand accounts** and **JPY 1.4 trillion** in deposits within about 10 months of its launch. Both deposit balances and the number of accounts continuing to grow steadily and demonstrating strong customer stickiness.
- Although balances temporarily declined in April and May, reflecting increased transfers to securities accounts amid stronger investment demand driven by changes in market conditions, the growth trend resumed in June
- noninterest-rate initiatives, including the SpaceX-related campaign, proved effective, supporting continued growth in the number of accounts

- Since joining the SBI Group in December 2021, both the number of individual accounts and individual deposit balances have expanded
- Following the launch of SBI Hyper Deposits, deposits growth has been driven primarily by liquidity deposits

Higher-Quality Growth (4) Implementation of On-Chain Finance <Next-Generation Finance>

■ Launch of Japan's First Trust-Based Stablecoin "JPYSC" Service

Overview

JPYSC

- A group-wide initiative, in which SBI Shinsei Trust Bank serves as the issuer and SBI VC Trade is responsible for distribution
- Adopting a trust-based scheme, the stablecoin is intended for use in retail and corporate payments as well as large-value fund transfers
- **Through expanded applications in areas such as international remittances and tokenized asset settlements, we aim to advance next-generation financial infrastructure**

Significance

"Revenue Opportunities"

By leveraging the Group's unique structure, under which issuance, distribution, and asset management are all conducted within the Group, we seek to create new revenue opportunities by capturing the growth of the digital asset market

"Funding Base"

Through the expanded adoption of JPYSC, we aim to increase deposits serving as the underlying assets, thereby strengthening our stable and low-cost funding base
